"A. Offsets of forty-five (45) degrees or less. An offset in a vertical stack, with a change of direction of forty-five (45) degrees or less from the vertical, may be sized as a straight vertical stack. In case a horizontal branch connects to the stack within two (2) feet above or below the offset, a relief vent shall be installed in accordance with paragraph 82-81B-3 of this Code."

"B. Above Highest Branch. An offset above the highest horizontal branch is an offset in the stack-vent and shall be considered only as it affects the developed length of the vent."

"C. Below Lowest Branch. In the case of an offset in a soil or waste stack below the lowest horizontal branch, no change in diameter of the stack because of the offset shall be required if it is made at an angle of not greater than forty-five degrees (45°). If such an offset is made at an angle greater than forty-five degrees (45°), the required diameter of the offset and the stack below it shall be determined as for a house drain. See Table 82-71-B of this Code."

"D. Offsets of more than forty-five degrees (45°). A stack with an offset of more than forty-five degrees (45°) from the vertical shall be sized as follows:

The portion of the stack above the offset shall be sized as for a regular stack based on the total number of fixture units above the offset. The offset shall be sized as for a house drain. See Table 82-71-B of this Code. The portion of the stack below the offset shall be sized as for the offset or based on the total number of fixture units on the entire stack, whichever is the larger. See Table 82-71-A of this Code. A relief vent for the offset shall be installed as provided in Section 82-81-B-3 of this Code and in no case shall a horizontal branch connect to the stack within two (2) feet above or below the offset."

"E. No soil or waste line shall be installed directly above any equipment used to prepare or store any food products, except where provided with protection from drips with a water tight safe pan extending four (4) inches in each direction from the pipe wall and turned up at least one-half (½) the diameter of the pipe but not less than two (2) inches. The pan shall extend at least one(1) foot, beyond the fixtures or tables or any place where food is stored."

SECTION 35. The Municipal Code of Chicago, Chapter 82, Section 82-75, is hereby amended by deleting certain language, contained in brackets below, and by adding certain language, in Italics below, as follows:

"82-75. No other fixture connection shall be made to a lead closet bend. [No soil or waste vent or circuit or loop vent above the highest installed fixture on the branch or main shall thereafter be used as a soil or waste pipe.] *No vent shall be used as a drainage pipe nor shall a drainage pipe be used as a vent, except that the waste of a fixture with a value of not more than one fixture unit may be installed to wash out the base of a vent stack."*

SECTION 36. The Municipal Code of Chicago, Chapter 82, Section 82-77, is hereby amended by deleting certain language, contained in brackets below, and by adding certain language, in Italics below, as follows:

"82-77. [Vertical soil, waste, and vent pipes] *Drainage stack vents, or vent stacks* shall extend through and above the roof at least six (6) inches and shall have a diameter at least one inch greater than that of the pipe proper; but in no case shall it be less than four (4) inches in diameter through and above the roof. When roof is used as a floor, such extension shall not be less than seven (7) feet above the roof. [and shall have a slope of not less than forty-five degrees from the horizontal.] The increaser shall extend at least one (1) foot below the roof. Where it is desirable to avoid many openings in the roof, [vertical soil, waste, and main vent pipes may be connected to a horizontal vent pipe which shall be connected to a main soil or waste vent at least one (1) foot below the roof. The diameter of the horizontal vent and its extension through the roof shall equal the combined areas of the vertical vent pipes connected therewith.] *stack-vents and vent stacks may be connected into a common vent header at the top of the stacks and then extended to the open air at one point. This header shall be sized in accordance with the requirements of Table 82-82, of this Code, the number of fixture units being the sum of all stacks connected thereto and the developed length being the longest vent length from the intersection at the base of the most distant stack to the vent terminal in the open air as a direct extension of one stack.*

"All vent terminals through roofs shall be flashed with a minimum of two and one-half (2½) pound sheet lead, or cast-iron roof collar."

Section 38. The Municipal Code of Chicago, Chapter 82, Section 82-79, is hereby amended by deleting certain language contained in brackets below, and by adding certain language, in Italics below, as follows:

"82-79. *The plumbing system shall be provided with a system of vent piping which will permit the admission or emission of air so that under normal and intended use the seal of any fixture trap shall not be subjected to a pressure differential of more than one (1) inch of water.* Every [new] fixture trap shall be [fully] protected against siphonage and back pressure, [and air circulation assured] by means of a [soil or waste stack vent,] continuous [waste or soil] vent *connecting to a branch vent, main vent, stack vent, or vent stack.* No crown vent shall be installed."

Section 39. The Municipal Code of Chicago, Chapter 82, Section 82-80, is hereby amended by deleting certain language, contained in brackets below, and by adding certain language, in Italics below, as follows:

"82-80. No trap shall be placed more than five *(5)* feet, horizontal developed length from its vent. The distance shall be measured [along the central line of the waste or soil pipe] from the [vertical inlet of the] trap *weir* to the vent [opening] *fitting.* The vent *pipe* opening from the soil or waste pipe, except for water closets and similar fixtures, shall not be below the [dips] *weir* of the trap.[No fixture shall be installed in any building more than forty (40) feet distant, measured along the central line of the soil waste or vent pipe.]"

Section 40. The Municipal Code of Chicago, Chapter 82, Section 82-81, is hereby amended by deleting the present section in its entirety, contained in brackets below, and by adding a new section, in Italics below, as follows:

"82-83. *Drainage stacks that receive wastes from sinks, automatic dishwashers, laundry trays, laundry washing machines, and similar fixtures shall have the drainage and vent piping so arranged that suds pressures will not affect fixtures in the lower portion of the drainage system. No fixture drain or branch or branch vent shall connect to any stack in a suds pressure zone. Such zones shall be considered to exist at any offset of sixty degrees (60°) to ninety degrees (90°) or at the base of any drainage stack.*

"a) When the drainage portion of a stack exceeds sixteen (16) feet in height above a sixty degrees (60°) to ninety degrees (90°) offset or house drain, it shall have its lower portion consisting of thirty percent (30%) of its height from such offset free of any fixture drain or branch. Such suds pressure zone of the drainage stack need not exceed twenty-four (24) feet in height.

"b) In an offset of sixty degrees (60°) to ninety degrees (90°) or a house drain, when the drainage portion of a stack exceeds sixteen (16) feet in height, a zone in the horizontal piping consisting of thirty percent (30%) upstream of the drainage stack connection shall be free of any drainage openings. Such suds pressure zone of the offset or house drain need not exceed twenty-four (24) feet.

"c) In an offset of sixty degrees (60°) to ninety degrees (90°) or a house drain, when the drainage portion of a stack exceeds sixteen (16) feet in height, a zone in the horizontal piping consisting of fifteen percent (15%) downstream of the drainage stack connection shall be free of any drainage openings. Such suds pressure zone of the offset or house drain need not exceed twelve (12) feet.

d) The drains are a maximum of fifteen (15) feet on centers.

e) The runoff capacity is sufficient to carry away all normal amounts of water splashed or displaced into them without flooding of the overflow gutter.

f) The overflow gutter has a minimum depth of four (4) inches.

g) The overflow gutter is of the open, rollover or semi-recessed type, having a smooth finish and having an opening sufficient to permit satisfactory cleaning of the overflow channel.

The area of the strainer openings is five (5) to ten (10) times the area of the inlet pipe to the strainer.

The hair and lint catcher is so constructed that it can easily and quickly be taken down for cleaning.

A removable cylindrical strainer, with slotted openings, is provided unless sufficient cause can be shown for using some other type.

C. Every non-private swimming pool shall be provided with equipment for the adequate disinfection of all pool water. This requirement shall be deemed to have been satisfied when:

1) Chlorine, chlorine compounds, or bromine are used as disinfectants.

2) The disinfection equipment has sufficient capacity to feed up to three (3) parts per million of available disinfectant at indoor pool installations based upon the recirculation rate.

The capacity at out-door pools should be a feed rate up to eight (8) parts per million based on the recirculation rate. This capacity shall be increased where abnormally high demands are encountered.

3) The disinfectant is introduced into the recirculation system ahead of the filters where sand media is employed.

D. The system of every non-private swimming pool shall include equipment for the introduction of chemicals necessary for maintaining the pool water in proper balance chemically; and/or for the application of a compound, such as alum coagulant, to form a filter aid-floc on the surface of sand filter beds. 2. When a coagulant solution is to be applied, the point of application is far enough ahead of the sand filters to obtain a thorough mix with the water flowing in the recirculation piping.

E. Filtration equipment shall be provided on all non-private swimming pools. This requirement, in the case of sand filter units, shall be deemed to have been satisfied when:

1) Sufficient filter area is provided to filter the entire contents of the pool in six (6) hours at the rate of not more than three (3) gallons per square foot per minute.

2) When a standard type underdrain system is used the gravel bed is at least twelve (12) inches in depth and varies in gravel size from approximately one and one-half (1½) inches at the bottom to approximately one-eighth (⅛) inch at the top.

3) The filter sand depth is not less than twenty (20) inches; the effective grain size is between 0.45 and 0.55 millimeters; the uniformity coefficient does not exceed 1.6, and there is sufficient distance between the top of the filter to the point of discharge of the wash water to allow for filter media expansion during the backwashing at the specified rate without loss of filter media.

4) Loss-of-head gauges are installed on each gravity filter.

5) The underdrain system is properly designed to collect efficiently the filtered water and to distribute properly the backwash water at a rate of not less than fifteen (15) gallons per minute per square foot of filter area.

6) The pressure sand filter system is provided with:

a) Gauges for each battery on the inlet and outlet pipes for determining loss-of-head in filter media.

b) Air releases with a manual control on the highest point of each filter.

c) A readily removable head or a large manhole to facilitate inspection and repairs.

d) A rate-of-flow indicator having satisfactory range shall be provided. It should be located in the recirculation line so that the rate of flow either during normal circulation or during the filter backwashing operation can be determined.

7) Filter media other than sand is employed; special requirements are satisfied. The process involving filtration through a coating of filter-aid material such as diatomaceous earth on porous tubes or elements is satisfactory when:

a) Sufficient element surface area is provided to filter the entire contents of the pool in six (6) hours at the rate of two (2) gallons or less per square foot per minute.

b) Slurry feeding equipment is provided for the continuous application, at an accurate and uniform rate, of filter-aid material into the filter influent line; except that such feeders may be omitted at pools where filter-aid units have sufficient element surface area to filter the pool volume in six (6) hours at a rate not to exceed one and one-half (1½) gallons per square foot per minute.

c) Pressure gauges are installed on both the influent and the effluent side of each filter unit.

d) A rate-of-flow indicator properly located and having satisfactory range is provided on the effluent line from the filters.

e) Suffcient head room and facilities are available in the filter room for periodic removal of the filter head and element assembly for manual cleaning purposes.

8) An easily removed sight glass on the waste discharge line (unless the wash-water discharge is plainly visible) for indicating the progress in filter-washing or the clarity when filtering-to-waste.

9) The filter piping arrangement is as simple as possible to accomplish filtration, backwashing, and filtering-to-waste. Sand filter units designed for performance at high rates of filtration are acceptable for installation at pools of small to moderate size and which are planned to accomodate only light swimmer loading; provided further that such filter units have been tested and approved by a nationally recognized testing laboratory to function satisfactorily at the rate or rates specified. If a high-rate sand filter unit installed at a swimming pool fails to produce results satisfactory to the Department it must be replaced with an adequate and approved filter unit of conventional design.

F. All non-private swimming pools shall be equipped with provisions for adding make-up water. Only water from the Chicago Water Works System shall be used for make-up-water.

G. No piping arrangements shall exist which under any conditions will permit sewage or waste water to enter the recirculation system, or water from the recirculation system or pool to enter the make-up-water supply. This requirement shall be deemed to have been satisfied when:

1) No pipe furnishing water for the make-up water supply is physically connected to the recirculation system regardless of valve arrangements, unless an approved vacuum breaker is properly installed on the make-up water line.

2) The make-up water line discharging directly to the pool has its point of discharge at least six (6) inches above the walk area adjacent to the pool.

3) The make-up water line discharging to a surge or balancing tank has its point of discharge at least six (6) inches above the rim of the tank.

4) The main drain line, and the filters' backwash and filter-to-waste lines have a free-fall discharge to the sewer or drain at such elevation that a surcharged sewer or drain could not force contamination back into the pool or recirculation system.

5) All other accessories to the recirculation system such as chemical solution feeders, water-fed chlorinators, etc., are protected against back siphonage into the water supply.

H. Cleanouts shall be provided at such points in the recirculation system as will enable obstructions, accumulations, etc., to be readily removed.

I. Filters and other equipment shall be accessible. This requirement shall be deemed to have been satisfied when the recirculation equipment is conveniently located for inspection and servicing. Special attention is called to the necessity of providing adequate head room above pressure filters.

J. Every non-private swimming pool shall be provided with an outfit for the determination of hydrogen-ion concentration; this requirement shall be deemed to have been satisfied when an approved outfit for the determination of hydrogen-ion concentration in the pH range 6.8 to 8.0 is provided.

Water for flushing or cooling, or otherwise to be instilled into such a vessel shall be obtained by gravity through an indirect connection. If water under pressure is required, it may be supplied only by means of an auxiliary pump taking suction from a suction tank provided for this purpose only with an over-rim supply having an indirect connection.

"B. Chemical, Contaminated Water, or Sewage Lines or Vessels. There shall be no direct connection between the city water lines and lines, equipment or vessels containing raw or contaminated water, contaminating chemicals or sewage. "83-46. [Where required. Wherever in any building the service pipe supplying water thereto is two (2) inches or less in internal diameter and the pressure of the water supplied through such service is insufficient to furnish an adequate supply, an automatic compression pressure increasing device or high level gravity storage tank may be installed. Each such compression device shall consist of a water pump and compression tank, and shall be provided with all the regulating and control appurtenances and devices which are necessary to insure complete automatic operation.]

"When the water pressure in the city water main is insufficient to furnish an adequate water supply for any purpose in any building, structure, or premises, a hydro-pneumatic system, booster pump system, or gravity tank shall be installed.

1) Hydro-Pneumatic System: All hydro-pneumatic systems shall consist of a water pump or pumps and a pressure tank and shall be provided with controls to insure complete automatic operation. The material and construction of the tank shall be in accordance with the American Society of Mechanical Engineers "Rules for the Construction of Unfired Pressure Vessels" Section VIII dated 1973. Each pump serving such tanks shall have a pressure relief valve on the discharge side capable of relieving water pressures in excess of the designed working pressure of such tanks. This valve discharge shall be connected indirectly to the drainage system of the building, with a minimum air gap of six (6) inches. In addition a pressure relief valve shall be installed on the top of such tanks capable or relieving pneumatic pressure in excess of the designed working pressure of such tanks. No pressure relief valve shall be less than three-fourths (¾) inch and shall be equipped with a test lever. In addition an automatic vacuum relief valve shall be installed on such tanks and be provided with a 24 mesh screen of bronze, or stainless steel, the area of the screening shall be fifty percent (50%) greater than the opening it serves. All equipment of a hydro-pneumatic system shall be capable to withstand the designed working pressure of the system.

[Construction and connections.] Each compression tank shall be so [constructed and] connected that the air content thereof shall be not less than twenty-five percent (25%) of its total capacity. Each compression tank shall be provided with a sludge drain pipe which shall be connected to such tank at the lowest level of the bottom section thereof and shall discharge through an [open] *indirect* connection into the drainage system [of the building] *with a minimum air gap of six (6) inches.* Each sludge drain pipe shall be [provided] *equal in size to the inlet pipe but need not exceed two (2) inches and be provided* with a control valve with a clear water way equal in area to that of the sludge drain pipe. [No water shall enter into any water supply pipe at a lower level than four (4) inches above the bottom of such compression tank.] *The discharge pipe of such compression tank shall not be lower than four (4) inches* *above the bottom. If an air compressor is used for said tank the air shall be filtered and taken from an area that does not impart any toxicity to the water stored in the tank. This compressor shall not be used for any other purpose. All hydro-pneumatic systems when installed shall be hydrostatically tested, in the presence of a plumbing inspector, to a pressure fifty percent (50%) greater than the designed working pressure of the system, and not less than one hundred (100) psi.*

2) Booster Pump System: Each pump or pumps shall have sufficient capacity to furnish an adequate supply of water for any purpose. When one pump is installed it shall run continuously or when a multi-pump system is installed the lead pump shall run continuously. A pressure reducing valve shall be installed on the discharge side of each pump.

3) Gravity tanks operating at atmospheric pressure shall be installed as required by section 83-42 of this Code.

4) The water piping system and equipment supplied by the systems enumerated in this section shall be capable of withstanding the total pressure developed by any such system at any elevation that these pressures occur.

5) Low Pressure Cut-off: When a pump is directly connected to a city water main there shall be installed a low pressure cut-off switch on the pump to prevent the creation of pressures less than five (5) psi on the suction side of the water system, and within five (5) feet of the pump suction inlet, and a pressure gauge shall be installed between the shut-off valve and pump."

SECTION 18. The Municipal Code of Chicago, Chapter 83, Section 83-47, is hereby amended by deleting said section in its entirety, contained in brackets below, and by adding a new section in Italics below, as follows:

"83-47. [All Plumbing fixtures shall be provided with a sufficient supply of water for flushing to maintain them in a sanitary condition. Every water closet or other plumbing fixture or appliance shall be designed to be cleansed by flushing with water and shall, at each flush, be supplied with a sufficient quantity of water to remove quickly all waste matter and properly cleanse the interior surfaces exposed to atmosphere. Every water closet or urinal shall be flushed by means of an approved flushing tank, except as hereinafter provided.

Each water closet flushing tank shall have a flushing capacity of not less than four (4) gallons and each urinal flushing tank a capacity of not less than two (2) gallons and shall be adjusted to prevent waste of water by excess flushing. No water closet flushing pipe shall be less than one and one fourth (1¼) inches internal diameter and no water from flushing tanks shall be used for any other purpose than that herein described. Water closets and urinals may be flushed by means of an approved flushing valve. 1) Every water closet, urinal or similar fixture designed to be cleansed by flushing shall be supplied with a sufficient quantity of water to remove quickly all waste matter and properly cleanse the interior surfaces exposed to the atmosphere. Every water closet, urinal or similar fixture shall be flushed by means of a flushing tank or flushometer valve.

2) Flushing Tanks. Each water closet flushing tank shall have a flushing capacity of not less than four (4) gallons and each urinal flushing tank a flushing capacity of not less than two (2) gallons. "Not more than one fixture shall be served by a single flush valve, except that a battery of not more than three urinals may be flushed with a single one (1) inch flush valve when such valve is automatically timed.

"Every flushometer valve for a water closet or similar fixture shall be only used in combination with an approved atmospheric vacuum breaker installed on the discharge side of the flushometer valve. The bottom of a vacuum breaker, or the critical level line shown on the vacuum breaker, shall not be less than six (6) inches above the flood level rim of the fixture. Flushometer valves for urinals with syphon jet action and water inlet openings at or below the flood level rim of the fixture shall only be used in combination with an approved atmospheric vacuum breaker installed on the discharge side of the flushometer valve. The bottom of a vacuum breaker, or the critical level line shown on the vacuum breaker, shall not be less than twelve (12) inches above the spray pipe.

"Except in residential units all flushometer valve actuating handles shall be a minimum of twenty-four (24) inches above the spill line of the closet bowl.

5) Every bidet shall be supplied with hot and cold water. An approved atmospheric vacuum breaker shall be installed on the discharge side of the control valve. The bottom of a vacuum breaker, or the critical level line shown on the vacuum breaker, shall not be less than six (6) inches above the flood level rim of the bidet. The water temperature to this fixture shall not exceed 100° F."

SECTION 19. The Municipal Code of Chicago, Chapter 83, Section 83-48, is hereby amended by deleting said section in its entirety, contained in brackets below, and by adding a new section, in Italics below, as follows:

"83-48. [No plumbing fixture shall be installed unless the water supply enters said fixture a minimum distance of one (1) inch above overflow rim of the fixture. Twice the internal diameter of the water supply is the minimum distance permitted above the top rim of the fixture.]

Water supply pipe to plumbing fixtures, water using appliances and equipment, wall hydrants and hose bibbs shall be as follows:

1) No plumbing fixture shall be installed unless the water supply enters said fixture with an air gap of twice the internal diameter of the water supply pipe but not less than one (1) inch above the flood level rim of the fixture except for fixtures listed in Section 83-47 of this Code.

2) Dishwashing and clothes washing machine water supply pipes shall have an air gap as required for plumbing fixtures, except that dishwashing machine water supply pipes may enter through an approved atmospheric vacuum breaker located on the discharge side of the last control valve. The bottom of the vacuum breaker, shall not be less than six (6) inches above the flood level rim of the machine or related equipment.

3) All hose connections, directly connected to the water supply, shall be provided with an atmospheric type vacuum breaker located seven (7) feet six (6) inches above the floor on the discharge side of the control valve. Where, in the opinion of the commissioner of water and sewers, it is not possible to provide this type of installation the hose connection shall have a nonremovable approved pressure type vacuum breaker or back flow preventor and when subject to freezing shall be capable of draining.

4) Every water supply pipe serving a beverage carbonator shall receive its supply through a receiving tank constructed in accordance with Section 83-42 of this Code or shall have installed in the pipe an approved stainless steel in line pressure type back flow preventor consisting of two check valves separated by an open air port. The air port shall not be directly connected to the drainage system. The back flow preventor shall be installed in an accessible location on the discharge side of the carbonator water supply valve. No copper tube or pipe or copper lined components shall be used for the receiving tank or its piping to the carbonator or the outlet of the stainless back flow preventor."

SECTION 20. The Municipal Code of Chicago, Chapter 83, Section 83-51 is hereby amended by deleting said section in its entirety, contained in brackets below, and by adding a new section, in Italics below, as follows:

"83-51. [The minimum internal diameter of any branch distributing pipe which supplies water and is directly connected to any valve, cock, bibb, spigot, faucet, or other device which is attached to and becomes a part of any plumbing fixture or appliance shall be as shown in the following table:]

The maximum length of such branch pipes shall be:

In the graduation of the sizes of such pipes and their connections the following table shall be observed; provided, however, that no riser pipe of an internal diameter less than three-fourth (¾) of an inch and no branch distributing pipe of three-eighth (⅜) inches internal diameter of a length greater than two (2) feet shall be installed:]

The water supply system shall be designed on the basis of the minimum available pressure at the water main or other source of water supply. The minimum available pressure will be given by the Bureau of Water and Sewers for each location.

The water supply demand load in the distributing system shall be based upon the number, type, and probable simultaneous use of the fixtures to be supplied. The size of piping shall be such that the velocity of water flow during maximum demand will not exceed eight (8) fps velocity in riser pipes, branch distributing pipes, distributing pipes and will not exceed ten (10) fps velocity in the service pipe, main supply pipe, principal supply pipe, and branch supply pipe, except that when a water service requires a pump the velocity of flow in the service shall not exceed five (5) fps velocity. The minimum constant pressure at the highest water discharge outlet shall be not less than eight (8) psi for all fixtures except for direct flush-valves, for which it shall not be less than fifteen (15) psi, and except where fixtures or special equipment is used requiring higher pressures. In determining the available pressure to overcome friction in the piping system, head meter and other losses shall be deducted from the minimum available pressure source. When the pressure exceeds eighty (80) psi at any plumbing fixture, the pressure shall be reduced by an approved type reducing valve. The minimum size of fixture supply pipes are shown in Table 83-51-A.

1. *For supply outlets likely to impose continuous demands, estimate continuous supply separately and add to total demand for fixtures.*
2. *For fixtures not listed, weights may be assumed by comparing the fixture to a listed one using water in similar quantities and at similar rates.*
3. *The given weights are for total demand. For fixtures with both hot and cold water supplies, the weights for maximum separate demand may be taken as three-fourths (¾) the listed demand for supply.*

Step 2. Convert the total water demand from fixture units to gallons per minute using Table 83-51-C; also add any continuous supply demand in gpm such as lawn sprinklers, air conditioning, industrial uses, etc., to the sum of the total demand for fixtures, the result is the total required gpm demand.

All distributing pipes, riser pipes and branch distributing pipes shall be sized in accordance with the demand indicated in Table 83-51-C of this code.

Beyond the capacity of Table 83-51-C the service pipe, main supply pipe, principal supply pipe and the branch supply pipe shall be sized to meet the velocity of water flow provisions of this chapter. Data shall be provided by the designer to substantiate this.

Interpolate for Intermediate Valves

Step 3. Determine the elevation of the highest fixture or group of fixtures or water opening above the city water main or other source of pressure supply.

Multiply this elevation in feet by 0.434, the result is the loss in static pressure in pounds per square inch.

Step 4. Compute the size of meter necessary for a total water demand. See Chart 83-51-A.
Step 5. Compute the pressure loss through the meter. See Chart 83-51-A.

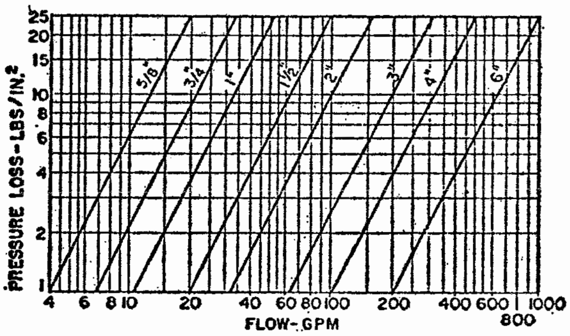

CHART 83-51-A

Chart 83-51-A is the estimated pressure losses for disk type meter, for other type meters or more accurate pressure losses, consult manufacturers data. Omit steps 4 and 5 if meter losses are not to be considered.

Step 6. Compute the available pressure to overcome friction in the piping system. First compute all losses such as:

(a) Loss in rise from the main or other source of supply to the top outlet.

(b) Loss due to minimum pressure required at the highest fixture or outlet.

(c) Loss through the meter.

(d) Other losses such as tankless heaters filter, etc.

Subtract the above losses from the minimum service pressure in the water main or other source of supply. The remaining is the available pressure to overcome friction within an upfeed piping system.

In the case of a gravity water tank, determine the vertical distance between the minimum tank water line and the highest fixture or group of fixtures or water opening. To find the available pressure to overcome friction in the downfeed piping system, multiply the distance defined above by 0.434 and subtract the loss of eight (8) psi or fifteen (15) psi and any other losses such as tankless heaters filter, etc. The remaining is the available pressure to overcome friction within the downfeed piping system.

Step 7. Compute the developed length of the basic circuit of piping from the main in the street, or the house pump, or the outlet side of the pressure reducing valve or other source of supply pressure to the highest and farthest outlet. In the case of a gravity water tank compute the developed length of the basic circuit of the piping from the tank connection to the highest and most remote outlet. Add to the developed length of pipe the friction losses in valves, and fittings converted to equivalent lengths of pipe. (See Table 83-51-D) or add 50% to the developed length of piping. Developed length plus 50% will equal the equivalent length run ELR.

6	20	12	30	6	4	165	80

Step 8. Compute the pressure factor per one hundred (100) feet of developed length. Knowing the pressure available for friction loss in psi, (Step 6) divided by the equivalent length run (ELR) (Step 7) multiplied by one hundred (100) will be the maximum uniform pressure loss for friction in the piping of the basic circuit.

$$\frac{P \times 100}{ELR} = P.$$

P = pressure available for friction loss.

ELR = greatest developed length plus fifty percent (50%).

P. = permissible uniform pressure loss per one hundred (100) feet of pipe.

Step 9. Knowing the permissible uniform friction loss per one hundred (100) feet of pipe and the fixture gpm and all continuous demands in gpm, the diameter of the building service and main supply pipe to the cold and hot water branch or the first branch other than a hose bibb may be obtained from charts 83-51-B-C or D whichever is applicable. The diameter of pipe on or next above the coordinate point corresponding to the estimated demand and the permissible uniform friction loss shall be the size of the service and main supply pipe to cold and hot water branch or the first branch other than a hose bibb. All other piping in the water supply system shall be sized according to the full listed demand weight, except that piping to supply fixtures with both cold and hot water supply may be sized at three-fourths (3/4) of the listed demand weight for cold or hot water piping. All continuous demands on the piping system shall be included in the fixture gpm demand. For fixtures not listed, demand weights may be assumed by comparing the fixture to a listed one using water in similar quantities and at similar rates.

The cold and hot water principal supply pipe, branches and risers may be obtained from charts 83-51-B-C or D whichever is applicable. The diameter of pipe on or next above the coordinate point corresponding to the estimates demand and the permissible uniform friction loss shall be the size of the pipe. No service shall be less than 1" nominal pipe size and where 1" flushometer valves are used the minimum size of water service shall be 1 1/2" nominal pipe size and the minimum size of the riser shall be 1 1/4" nominal pipe size. No riser shall be less than three-fourths (3/4) nominal pipe size.

Allowable number of 1-inch flush valves that may be served by various sizes of pipes is as follows:

Pipe Size in.	*No. of 1" Flush Valves*
1¼	*1*
1½	*2-4*
2	*5-12*
2½	*13-25*
3	*26-40*
4	*41-100*

Article VII

Title to the said Flight Kitchen and related improvements to the Demised Premises and to any and all subsequent alterations, modifications, and enlargements thereof, shall upon completion vest in Landlord.

In the event that the Demised Premises are required for Airport purposes prior to the expiration of this Agreement, the Commissioner of Aviation may, upon sixty (60) days advance written notice to the Tenant, direct Tenant to vacate the same provided that Landlord, within sixty (60) days after Tenant's removal therefrom, will pay to Tenant the unamortized portion of the cost of the permanent structures and improvements constructed and installed thereon; such amortization to be computed on a straight line basis over the period from the completion of said improvements to the expiration date of the initial term hereof.

Article VIII

Landlord hereby grants to Tenant the right of access and ingress to and egress from the Demised Premises by Tenant and its employees, contractors, suppliers, servicemen, sublessees, guests, patrons and invitees; provided, that such rights of access, ingress and egress, are at all times exercised in conformance with any and all regulations promulgated by Landlord or the Commissioner of Aviation or other lawful authority, for the care, operation, maintenance and protection of the Airport and the public.

Tenant and its employees, invitees, and those doing business with it shall have no right hereunder to park vehicles upon the Airport premises, other than in places demised to Tenant pursuant to this Agreement, or except in regular parking areas upon payment of regular charges therefor.

Article IX

Tenant shall provide a complete and proper arrangement for the adequate sanitary handling and disposal off the Airport of all trash, garbage and other refuse caused as a result of the operation of its business. In event the improvements on the Demised Premises are financed by a loan or loans for that purpose secured by an assignment of Tenant's interest in and to this Agreement, the fire and extended coverage insurance on such improvements shall be payable to such assignee, subject to an agreement (which may be contained in such assignment) that the proceeds thereof shall be applied to the cost of rebuilding, but that if for reasons beyond the control of Tenant and such assignee the said improvements cannot be rebuilt, or if it would be impractical at the time to so rebuild, then the proceeds of such insurance shall be applied first to the payment of any such then outstanding loan and the balance thereof shall be paid over to the Landlord.

Upon determination by said Comptroller of all insurance required, in the forms, kinds and amounts directed to be procured, Tenant shall deliver all policy originals or duplicate originals and endorsements thereto or certificates showing such insurance to be in effect, to Comptroller which shall be appended hereto as Exhibit C.

In any event, Tenant is not to commence to exercise any of the rights and privileges granted under this Agreement until such time as all insurance directed and required to be furnished by Tenant is in full force and effect.

Tenant expressly understands and agrees that any insurance protection furnished by Tenant hereunder shall in no way limit its responsibility to indemnify and save harmless Landlord under the provisions of this Agreement.

Tenant shall, before commencing construction of Flight Kitchen, furnish to Comptroller a Performance Bond in form similar to City Form No. P.W.O. 62 in the full amount of the Flight Kitchen contract with sureties satisfactory to said Comptroller.

Third persons as used herein shall include the United States of America, State of Illinois or any of their agencies and all persons other than the City of Chicago.

Except as to the Demised Premises the Landlord reserves the right to regulate, police, and further develop, improve, reconstruct, modify or otherwise alter said O'Hare Airport and any portion in such manner as Landlord sees fit, regardless of the desires or views of the Tenant.

The Tenant shall assume all risks incident to or in connection with its business to be conducted hereunder and shall be solely responsible for all accidents or injuries of whatever nature or kind to persons or property caused by its operations at said Airport and shall indemnify, defend and save harmless the Landlord, its authorized agents and representatives, from any penalties for violation of any law, ordinance or regulation affecting its operations, and from any and all claims, suits, losses, damages or injuries to persons or property of whatsoever kind or nature arising directly or indirectly out of the operation of such business, or resulting from the carelessness, negligence or improper conduct of the Tenant, or any of its agents or employees.

Landlord shall not be liable to Tenant for damage to property of Tenant or any loss of revenues to Tenant resulting from Landlord's acts, omission or neglect in the maintenance and operation of the Airport facilities.

Article XIII

In the event the building to be constructed upon the Demised Premises shall be damaged or destroyed by fire or other casualty, the same shall be promptly repaired or rebuilt by Landlord at its expense from, after and only to the extent of insurance proceeds received by Landlord therefor, but Landlord shall not be obligated to repair or rebuild any fixtures, equipment and other personal property installed by Tenant pursuant to this Agreement.

In the event of any damage or destruction by fire or other casualty to the Demised Premises Tenant shall immediately, at its expense, replace and repair any and all fixtures, equipment and other personal property, installed by it pursuant to this Agreement.

Article XIV

Tenant, its officers, agents, employees, and any other persons over which Tenant has control, shall comply with all lawful rules and regulations and amendments or supplements thereto governing or related to the use of the Airport or of the Demised Premises as may from time to time be promulgated by Landlord in the interests of health, safety, sanitation and good order which are not inconsistent with applicable rules and regulations of any Federal State or local governmental body having jurisdiction with respect thereto.

Tenant shall at all times faithfully obey and comply with all lawful present and future laws and ordinances of Federal, State or local governmental bodies and rules and regulations lawfully promulgated thereunder, whether or not of the type enumerated, applicable to, or affecting Tenant and its operations and activities in the Demised Premises or elsewhere at the Airport not inconsistent with the provisions of this Agreement.

Article XV

Tenant covenants not to assign, transfer, not to sublet, license or permit the use of the premises or any part thereof, except to a wholly owned, affiliated or subsidiary company, without the consent in writing of the Commissioner of Aviation and the City Council first had and obtained, nor permit any transfer by operation of law of its interest created thereby. Any such assignment, transfer, sublease, license or permission when and if approved shall be in writing and promptly upon execution thereof, Tenant shall furnish two (2) copies to Landlord for its files.

It is contemplated that the Tenant may seek to finance the improvements designated herein as the Flight Kitchen by obtaining a loan. It is agreed that the Tenant may, without further approval of the Landlord, assign and set over to such lender all of Tenant's right, title and interest in and to this Agreement for the purpose of securing such loan. Any such assignee-lender shall thereupon acquire no greater interest in the Demised Premises than that of the Tenant as herein provided. In event of any foreclosure under such financing, and then only during the initial term hereof, the assignee-lender shall have the further right to assign its interest in this Agreement to a person or company of good reputation and qualified to operate the type of business herein authorized and who will be subject to the same terms and conditions as herein contained.

In the event an assignment, sublease, license or permit to use the aforesaid premises, or any part thereof, is approved by Landlord, under no circumstances shall the income derived by Tenant there from exceed the amount of a proportionate share of Tenant's obligations and expenses, under the terms of this Agreement. Landlord expressly reserves the right to assess an extra charge against any approved assignee, sublessee, license or permittee hereunder.

It is expressly understood and agreed that the only activity which Tenant may conduct on or from the Demised Premises, directly or indirectly, alone or through others, is only as authorized under the terms of this Agreement.

This Agreement does not constitute either party the agent or representative of the other for any purpose whatsoever.

Landlord covenants that Tenant shall and may peaceably and quietly have, hold and enjoy the premises or space leased exclusively to it during the term of the letting thereof and any extension of said term, unless such term or extension thereof shall cease, close or expire sooner or shall be terminated as provided in this instrument.

Article XVI

Tenant, in performing under this agreement, shall not discriminate against any worker, employee or applicant, or any member of the public, because of race, creed, color, religion, age, sex or national origin, nor otherwise commit an unfair employment practice.

Tenant will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, creed, color, religion, age, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

Tenant agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause. Tenant further agrees that this clause will be incorporated in all contracts entered into with suppliers of materials or services, contractors and subcontractors and all labor organizations, furnishing skilled, unskilled and craft union skilled labor, or who may perform any such labor or services in connection with this agreement.

Attention is called to Executive Order 11246 issued September 24, 1965, 3 CFR, 1964-65 Compilation, p. 339, as modified by Executive Order 11375 issued October 13, 1967, 3 CFR, 1967 Compilation, p. 320; The Civil Rights Act of 1964, Pub. Code of the City of Chicago, Ch. 198.7A); and the provisions of 41 CFR Chapter 60, and Part 21, Regulations of the Office of the Secretary of Transportation.

To demonstrate compliance the Tenant and his contractors and subcontractors will furnish such reports and information as requested by the Chicago Commission on Human Relations.

Article XVII

This Agreement shall not and will not, nor shall any copy thereof, or any statement, paper or affidavit, in any way or manner referring hereto, be filed in the office of the Recorder of Deeds of Cook or DuPage Counties, Illinois, or in any other public office, by Tenant or any one acting for Tenant and that if the same be so filed, this Agreement and each and every provision hereof shall, at the option of Landlord, be and become absolutely null and void and Landlord may declare such filing a breach of this Agreement.

Article XVIII

In any of the following events Landlord, at any time hereafter, shall have the right at Landlord's election immediately to terminate this Agreement.

In the event Tenant shall fail to pay the rent in the amounts and at the times and in the manner herein provided and such failure shall continue for fifteen (15) or more days after written notice thereof shall have been given to Tenant.

In the event Tenant shall fail to keep and perform or shall violate the terms, covenants and conditions of this Agreement on its part to be kept and performed, and Tenant shall not have cured or corrected such failure or violation within thirty (30) days after written notice thereof shall have been given to Tenant.

If Tenant shall make an assignment for the benefit of creditors, or shall file a petition in bankruptcy, or shall be adjudged a bankrupt, and such adjudication be not stayed or vacated within 90 days thereafter, or the interest of Tenant under this Agreement shall be levied upon and sold upon execution or shall by operation of law become vested in another person, firm or corporation because of the insolvency of Tenant; or in the event that a receiver or Trustee shall be appointed for Tenant or the interest of Tenant under this Agreement, and such appointment has not been vacated within 90 days thereafter.

In the event Tenant shall vacate or abandon said premises, or shall permit the same to remain vacant or unoccupied without the consent of Landlord first had and obtained.

Article XIX

Upon the occurrence of any one or more of the events of default herein specified, Tenant's right to possession of the Demised Premises shall terminate and Tenant shall surrender possession thereof immediately. In such event Tenant hereby grants to Landlord full and free license to enter into and upon said premises, or any part thereof, to take possession thereof, with or without process of law, and to expel and remove Tenant or any other person who may be occupying the said premises, or any part thereof, and Landlord may use such force in and about expelling and removing Tenant and said other person as may reasonably be necessary; and Landlord may repossess itself of the said premises as of its former estate, but said entry of said premises shall not constitute a trespass or forcible entry or detainer, nor shall it cause a forfeiture of rents due by virtue hereof, nor a waiver of any covenant, agreement or promise in said lease contained, to be performed by Tenant. Tenant shall make no claim of any kind against Landlord, its agents and representatives by reason of such termination or any act incident thereto.

In addition to terminating this Agreement Landlord may sue for and recover all damages and rent accrued or accruing under this Agreement or arising out of any breach thereof.

Landlord may, if it so elects, pursue any other remedies provided by law for the breach of this Agreement or any of its terms, covenants, conditions or stipulations. No right or remedy herein conferred upon or reserved to Landlord or Tenant is intended to be exclusive of any other right or remedy, and each and every right and remedy shall be cumulative and in addition to any other right or remedy given hereunder, or now hereafter existing at law or at equity or by statute.

The acceptance of rent by Landlord, whether in a single instance or repeatedly, after it falls due, or after knowledge of any breach hereof by Tenant, or the giving or making of any notice or demand, whether according to any statutory provision or not, or any act or series of acts except an express waiver in writing, shall not be construed as a waiver of Landlord's right to act or of any other right hereby given Landlord, or as an election not to proceed under the provisions of this Agreement.

Tenant agrees to use its best efforts in every proper manner to maintain and develop the business conducted by it under this agreement and increase same and not to divert or cause, or allow, to be diverted, any business from Pier.

Article X

This agreement shall not and will not, nor shall any copy thereof, or any statement, paper or affidavit, in any way or manner referring hereto, be filed in the office of the Recorder of Deeds of Cook County, Illinois, or in any other public office, by Tenant or anyone acting for Tenant and that if the same be so filed, this agreement and each and every provision hereof shall, at the option of Landlord, be and become absolutely null and void and Landlord may declare such filing a breach of this agreement.

Tenant hereby waives all notice of any election made by Landlord under this agreement, demand for rent, notice to quit, demand for possession and any and all notices and demands whatsoever, of any and every nature, which may or shall be required by any statute of this State relating to forcible entry and detainer, or to Landlord and Tenant, or any other statute or by the common law during the terms of this agreement. The acceptance of rent, whether in a single instance or repeatedly, after it falls due, or after knowledge of any breach hereof by Tenant, or the giving or making of any notice or demand, whether according to any statutory provisions or not, or any act or series of acts, except an express written waiver, shall not be construed as a waiver of Landlord's right to act without notice or demand or of any other right hereby given Landlord, or as an election not to proceed under the provisions of this agreement.

If default be made in the payment of the rent, or other charges here reserved, or of any installment thereof, as herein provided, Tenant does hereby irrevocably constitute any attorney of any Court of Record in this State, attorney for it and in its name, from time to time, to waive the issuance of process and service thereof, to waive trial by jury, to confess judgment in favor of Landlord and against Tenant for the amount of rent which may be then due, by virtue of the terms hereof, or of any extensions or renewals hereof, or by virtue of any holdover after the termination hereof, and which may be in default, as aforesaid, together with the costs of such proceedings and for said purposes to file in said cause his cognovit thereof, and to make an agreement in said cognovit, or elsewhere, waiving and releasing all errors which may intervene in any such proceeding and waiving and releasing all right of appeal and right to writ of error, and consenting to an immediate execution upon such judgment, and Tenant hereby confirms all that said attorney may lawfully do by virtue hereof. Landlord shall have a first lien on Tenant's interest hereunder, and on Tenant's property now or hereafter located in said premises, or elsewhere, to secure the payment of all moneys due hereunder, which lien may be foreclosed in equity and in case of any such foreclosure proceedings, a receiver shall be appointed to take possession of said premises and property and relet the premises under order of court.

The obligation of Tenant to pay the rent reserved hereby during the balance of the term hereof, or during any extension thereof, shall not be deemed to be waived, released or terminated, nor shall the right and power to confess judgment given in the preceding paragraph hereof be deemed to be waived or terminated by the service of any five-day notice, other notice to collect, demand for possession, or notice that the tenancy hereby created will be terminated on the date therein named, the institution of any action of forcible detainer or ejectment, or any judgment for possession that may be rendered in such action, or any other act or acts resulting in the termination of Tenant's right to possession of the premises. The Landlord may collect and receive any rent due from Tenant and payment or receipts thereof shall not waive or affect any such notice, demand, suit or judgment, or in any manner whatsoever waive, affect, change, modify or alter any rights or remedies which Landlord may have by virtue hereof.

Tenant shall pay and discharge all costs, expenses and attorney's fees which shall be incurred and expended by Landlord in enforcing the covenants and agreements of this agreement, whether by the institution of litigation or in the taking advice of counsel, or otherwise.

The rights and remedies hereby created are cumulative and the use of one remedy shall not be taken to exclude or waive the right to the use of another.

Article XII

Tenant shall observe and comply with all laws, ordinances, rules and regulations of the United States Government, State of Illinois, County of Cook, City of Chicago and all agencies thereof which may be applicable to its operations or to the operation, management, maintenance or administration of the Pier, now in effect or hereafter promulgated.

Article XIII

Tenant, upon performing the covenants, conditions and agreements herein contained, shall and may peacefully have, hold and enjoy the premises and privileges hereinafter granted.

Article XIV

Landlord may furnish security service, heat, sanitary facilities and utilities as designated at outlets and at points as shown on attachment hereto. Tenant shall pay any and all charges and costs therefor whether or not metered or billed directly from Landlord upon estimates of such costs made solely by Landlord.

Article XVI

Tenant, in performing under this contract, shall not discriminate against any worker, employee or applicant, or any member of the public, because of race, creed, color, religion, age, sex or national origin, nor otherwise commit an unfair employment practice. Tenant will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, creed, color, religion, age, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Upon the termination of Tenant's right of possession, as aforesaid, whether this agreement be terminated or not, Tenant agrees to surrender possession of the premises immediately, without the receipt of any demand for rent, notice to quit or demand for possession of the premises whatsoever, and Tenant hereby grants to Landlord full and free license to enter into and upon said premises, or any part thereof, to take possession thereof without process of law and to expel and remove Tenant, or any other person who may be occupying the premises, or any part thereof.

Landlord may use such force in and about expelling and removing Tenant and said other person as may reasonably be necessary and Landlord may repossess itself of the said premises as of its former estate, but said entry of said premises shall not constitute a trespass or forcible entry or detainer, nor shall it cause forfeiture of charges due by virtue hereof, nor a waiver of any covenant, agreement or promise contained in said agreement, to be performed by Tenant.

Tenant hereby waives all notice of any election made by Landlord under this agreement, demand for rent, notice to quit, demand for possession, and any and all notices and demands whatsoever, of any and every nature, which may or shall be required by any statute of this State relating to forcible entry and detainer, or to Landlord and Tenant, or any other statute, or by the common law during the terms of this agreement.

The acceptance of rent, whether in a single instance or repeatedly, after it falls due, or after knowledge of any breach hereof by Tenant, or the giving or making of any notice or demand, whether according to any statutory provisions or not, or any act or series of acts, except an express written waiver, shall not be construed as a waiver of Landlord's right to act without notice or demand or of any other right hereby given Landlord, or as an election not to proceed under the provisions of this agreement.

If default to be made in the payment of the rent, or other charges herein reserved, or of any installment thereof, as herein provided, Tenant does hereby irrevocably constitute any attorney of any Court of Record in this State attorney for it and, in its name, from time to time, to waive the issuance of process and service thereof, to waive trial by jury, to confess judgment in favor of Landlord and against Tenant for the amount of rent which may be then due, by virtue of the terms hereof, or of any extensions or renewals hereof, or by virtue of any holdover after the termination hereof, and which may be in default, as aforesaid, together with the costs of such proceedings and for said purposes to file in said cause his cognovit thereof, and to make an agreement in said cognovit, or elsewhere, waiving and releasing all errors which may intervene in any such proceeding and waiving and releasing all right of appeal and right to writ of error, and consenting to an immediate execution upon such judgment, and Tenant hereby confirms all that said attorney may lawfully do by virtue hereof.

Landlord shall have a first lien on Tenant's interest hereunder, and on Tenant's property now or hereafter located in said premises, or elsewhere, to secure payment of all moneys due hereunder, which lien may be foreclosed in equity and in case of any such foreclosure proceeding, a receiver shall be appointed to take possession of said premises and property and relet the premises under order of court.

The obligation of Tenant to pay the rent reserved hereby during the balance of the term hereof, or during any extension thereof, shall not be deemed to be waived, released or terminated, nor shall the right and power to confess judgment given in the preceding paragraphs hereof be deemed to be waived or terminated by the service of any five-day notice, other notice to collect, demand for possession, or notice that the tenancy hereby created will be terminated on the date therein named, the institution of any action of forcible detainer or ejectment, or any judgment for possession that may be rendered in such action, or any other act or acts resulting in the termination of Tenant's right to possession of the premises.

The Landlord may collect and receive any rent due from Tenant and payment or receipts thereof shall not waive or affect any such notice, demand, suit or judgment, or in any manner whatsoever waive, affect, change, modify or alter any rights or remedies which Landlord may have by virtue hereof.

Tenant shall pay and discharge all costs, expenses and attorney's fees which shall be incurred and expended by Landlord in enforcing the covenants and agreements of this agreement, whether by the institution of litigation or in the taking advice of counsel, or otherwise.

The rights and remedies hereby created are cumulative and the use of one remedy shall not be taken to exclude or waive the right to the use of another.

Article XII

Tenant shall observe and comply with all laws, ordinances, rules and regulations of the United States Government, State of Illinois, Counties of Cook and DuPage, City of Chicago and all agencies thereof which may be applicable to its operations or to the operation, management, maintenance or administration of the Airport, now in effect or hereafter promulgated.

Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

Execution of Agreement Authorized between City of Chicago and State of Illinois for Relocation of City-Owned Electrical and Water Utilities in Connection with Improvement of Streets, Highways, and Expressways on Federal-Aid and State-Aid Systems within City of Chicago.

The Committee on Finance submitted a report recommending that the City Council pass the following proposed ordinance transmitted therewith:

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. That the Mayor be and he is hereby authorized and directed to execute, the City Clerk to attest, the Commissioners of the Departments of Public Works, Streets and Sanitation, and Water and Sewers to approve, and the City Comptroller to accept and file for record, upon the approval of the Corporation Counsel, a certain Agreement between the City of Chicago and the State of Illinois regarding the relocation and/or adjustments of City-owned electrical and water utilities in connection with the construction and/or improvement of streets, highways and expressways on Federal-Aid and State-Aid systems within the City of Chicago, which Agreement is in form and substance as follows:

Agreement

City of Chicago
State of Illinois

Electrical and Water
Utilities

Adjustments-Highways-Force Account

This Agreement made and entered into between the City of Chicago, a Municipal Corporation in the State of Illinois, acting by and through its Department of Public Works, hereinafter referred to as "City", and the State of Illinois, acting by and through its State Department of Transportation, hereinafter referred to as "State".

Witnesseth:

Whereas, State and/or City desires to construct and/or improve Federal-Aid access controlled Expressways, urban segments of the Federal-Aid Primary Highway System and/or arterial segments on any Federal System, and/or arterial segments on any State roadway system, all within the City of Chicago, in accordance with plans, specifications and cost estimates to be prepared by City and to be approved by State, or prepared by State and approved by City; and

Whereas, such highway construction will necessitate certain relocation and/or adjustments on occasion to City's electrical and water facilities, it is desirable that City perform this work because of its specialized nature and because City is adequately staffed to perform this work; and

Whereas, for all Federal-Aid projects, in order to make the cost of such work eligible for Federal reimbursement, it is necessary for the parties to comply with the applicable terms and provisions of the Federal-Aid Highway Program Manual, Volume 1, Chapter 4, Section 4 and Volume 6, Chapter 6, Section 3, and all supplements and amendments thereto all of which, by this reference, are hereby made a part of this agreement.

Now, Therefore, City and State agree as follows:

Section 1. The City, at State expense, will perform preliminary engineering necessary and will submit to the State, through City's Department of Public Works, for State's approval, two (2) sets of the detail plans and specifications and five (5) sets of the cost estimates for the proposed relocations and/or adjustments of City's electrical and water facilities which are necessitated by the proposed State or City project. The City's submittal shall conform with the requirements of Federal-Aid Highway Program Manual, Volume 1, Chapter 4, Section 4 and Volume 6, Section 3, and shall be transmitted well in advance of any proposed State contract award to avoid or minimize delay.

Section 2. City will have its forces make necessary relocations and/or adjustments in its electric and water facilities for the project involved, in accordance with the approved plans, but will not start on any project without written notice from State that City is authorized to proceed with such work for that project, and City shall notify State at least 48 hours prior to City forces beginning work. City shall assume full responsibility for the correctness of its work including lines and grades, unless otherwise stated in the project construction contract.

Section 3. State and/or City will designate an engineer to oversee City's utility relocation, adjustments, removals, and alterations and to provide City personnel with information regarding the projects on which City work is to be performed; City's engineers and foreman on the project shall be responsible to State's and/or City's engineer and shall submit written documentation to him on the work performed, the manner of performance and rate of progress. Such documentation shall include daily reports, for State's and/or City's engineer's verification and approval, showing complete personnel classification and the number of personnel in each classification, amounts of materials (quantities of units as set forth in City's estimate) used, types and numbers of equipment items employed and, if necessary to substantiate time-rate charges, the time intervals the equipment items are used. State's and/or City's engineer shall be furnished a copy of such daily reports. Such reports shall be available to State, City and the FHWA at any time during project construction and as set forth in Section 4. All such documentation shall carry the State Job Number, State Section Number, City project designation, and, if Federal-Aid, the Federal-Aid Project Number. All material salvaged shall be itemized by City, verified and inspected by representatives of all participating agencies. Prior notification shall be given to State and City in writing as to the time and location of said salvage inspection. State and City shall retain one (1) copy of City salvage report to expedite audit and payment of final bill.

Section 4. City shall bill State for all work for any project which City anticipates is reimbursable according to the terms of this agreement as augmented hereinbefore by documents made part of it by reference. City's bills shall be properly identified as to State Job Number, State Section Number, City project designation, and, if applicable, the Federal-Aid Project Number, and shall be submitted in sets of four (4) copies.

For any project where the estimated cost of reimbursable work by City is $25,000.00 or less, the City, within 90 days after completion of its work, will submit a final detailed itemized statement showing all reimbursable actual cost and expense. After State has checked the City's statement and has ascertained that it is correct, conforms to the City's cost estimate for reimbursable work and to other requirements of the Federal-Aid Highway Program Manual, Volume 1, Chapter 4, Section 4, and is otherwise proper, State will reimburse City for one hundred (100) percent of the amount thus billed subject to adjustment upon completion of State audit.

For any project where the reimbursable work by City is estimated to exceed $25,000.00, City may submit partial bills, not more often than one bill per month, and such partial billing shall show appropriate credit for estimated materials salvaged during the billing period. A City partial bill for the project shall be paid by State after it has checked the bill, has ascertained that it conforms to the corresponding estimate and is otherwise proper. In such cases, after City has completed its work for a particular project, City will submit a statement of complete and final billing showing therein a listing of, and credit for, all partial payments previously made. After approving this bill, State will pay City any amount necessary to make the total amount paid to City one hundred (100) percent of the total billing, subject to adjustment upon completion of State audit.

All cost records of the City pertaining to any project will be subject to inspection at any time by State and/or FHWA representatives during City working hours, and shall be retained for a minimum of three (3) years following the date of final reimbursing payment.

Section 5. In the event City incurs additional costs in the authorized work due to any extra work or material which may be required, then, prior to proceeding therewith, City will request State in writing to approve such extra work for payment, setting forth detailed justification therefor. In event of emergency, in which the work delay incurred by waiting for written approval before beginning work would be detrimental to State's interests, City may request State to give verbal approval contingent upon written approval, and, upon such verbal approval, may proceed with such work.

Section 6. Any work of altering and maintaining the utilities covered by this agreement, at any time after they have been adjusted by City as herein provided, shall be done by City at its sole expense. Such work shall be interpreted to include all repairs and revisions necessary to maintain the utility so that it will not in any way interfere with or endanger the public in its use of any highway constructed by State and/or City and/or maintained by State, but excluding adjustments or relocations necessitated by highway changes or other construction initiated by State and/or City, City shall not maintain any facilities from the through traffic-lanes, or shoulders of controlled access Expressways or from the ramp pavements or shoulders of interchanges therewith. Emergency maintenance may be performed but only under advice and direction of the State's District Engineer.

In Witness Whereof, City has caused this agreement to be executed in its behalf by its proper officers pursuant to an ordinance passed by its City Council on the .... day of ...., 1975, and State has caused this agreement to be executed in its behalf by the Secretary of the Department of Transportation and attested by its Director of Highways, a certified copy of which ordinance is attached hereto and made a part hereof, the agreement becoming effective on the date of State approval.

SECTION 2. The City Clerk is directed to transmit two (2) certified copies of this ordinance to the Department of Transportation of the State of Illinois, through the District Engineer for the Northeast Region of said Department of Transportation.

[Signature forms omitted]

Whereas, the City paid the Municipality the sum of $308,432.60 for the total costs of constructing the forty-eight inch (48″) water main within the City limits, from W. Bryn Mawr Avenue to W. Devon Avenue, and now owns, operates and maintains said water main as part of its water works system; and

Whereas, the water supply contract No. 25274 is now expired and the Municipality has, through its corporate authorities, made application for a new agreement for a supply of water for consumers within the corporate limits of the Municipality and four (4) consumers located outside the corporate limits of the Municipality; and

1984	7.000	14.000

(3) The Municipality expressly agrees to purchase, take and pay for the minimum quantities of water shown in Section (2) of this contract. Compliance with this minimum requirement will be determined by averaging the consumption on a semiannual basis. If, after June 30th and/or December 31st of any calendar year, the meter registrations show that the Municipality has taken less than the minimum quantities of water herein agreed upon, the City will render an additional bill to the Municipality for the quantities of water it failed to take under the minimum purchase terms of this agreement. The Municipality may purchase and take more than said minimum quantities of water but shall not take more than the maximum quantities shown in Section (2) on any one day.

Rates and Discounts

(4) Charges for water furnished by the City for use within the corporate limits of the Municipality, and for water not taken by the Municipality under the minimum purchase terms of this contract, shall be at the rate fixed for metered water use inside the City, said rate being fixed by City ordinance and subject to change by amendment at any time.

(5) Charges for water furnished by the City for use outside the corporate limits of the Municipality shall be fifty per cent (50%) higher than rate fixed for metered water use inside the City, said rate being fixed by City ordinance and subject to change by amendment at any time.

(7) The City reserves the right at any time during the term of this contract to classify water consumers and to fix rates for each class of consumer; also to fix rates for water furnished to the Municipality and other municipalities and persons or other waters users, for consumption outside the corporate limits of the City, higher than the rates fixed for water furnished to consumers of the same class for consumption within the corporate limits of the City, subject to such limitations as are then applicable by law.

Period of Contract

(8) This contract shall be in force and continue in effect for a period not longer than ten years from the date hereof unless sooner terminated as herein provided.

Meters and Meter Equipment

(9) The Municipality, at its own cost and expense, shall provide and install the meter vaults, the meters and meter equipment measuring and controlling the said supply of water, which vaults, meters and meter equipment shall be of such type, size and design as shall be satisfactory to and approved by the Commissioner of Water and Sewers of the City and shall be located in or near the City limits at a location to be approved by said Commissioner of Water and Sewers. The control valves shall be located within the City and such meters, meter equipment, meter vaults and valves shall at all times be under the control of the City, but the full and complete maintenance and protection of such meters, meter equipment and meter vaults shall be the obligation of the Municipality.

(10) The properly authorized officials, agents and representatives of the City shall at all times have free access to the meter or meters and all other facilities herein provided for, for the purpose of shutting off the water for failure to pay the water rates or charges in this agreement provided to be paid by the Municipality and for the purpose of reading the registrations of said meter or meters, and to examine, shut off and test the same to ascertain whether or not they are in good condition and repair and to make such repairs upon the same as may be necessary, the expense of any and all necessary repairs to be borne by the Municipality.

(11) If at any time the said meter or meters shall fail to register correctly the quantity of water furnished and taken hereunder, or shall fail to register the flow of water through said meter or meters, the unregistered, under-registered or over-registered amount of water furnished and taken shall be determined by taking an average of the twelve (12) preceding readings of such meter or meters exclusive of deficient or excessive readings. Where said meter or meters have been installed for a period of less than one (1) year, or where less than twelve (12) competent readings exist, such average or estimate may be based upon a lesser number than twelve (12) readings taken preceding or subsequent to such in-correct or stopped registrations. In both instances, the Commissioner of Water and Sewers of the City shall determine which are excessive or which are deficient readings and shall also determine the number of months upon which such estimate is to be based.

Terms and Conditions of Service:

(12) The Municipality at its own cost and expense, shall provide, make and keep in repair all feeder mains, connections, meter vaults, receiving tank or tanks, booster or other pumps and slow-acting valves, or other appliances deemed necessary by the Commissioner of Water and Sewers of the City at the points of connection herein designated. If at any time the meter or meters or meter

housing, which are also to be provided by the Municipality, shall prove unsatisfactory to said Commissioner of Water and Sewers, or be out of repair, they shall be replaced or repaired by the City and the cost and expense of such replacements or repairs shall be charged to and paid by the Municipality.

(13) The Municipality shall provide, install, maintain and operate at its own cost and expense and at such locations as shall be designated by the Commissioner of Water and Sewers of the City, the following:

(14) The water supply furnished and taken hereunder shall be drawn by the Municipality at a substantial uniform rate of flow throughout twenty-four (24) hours of each day of the year.

It is hereby agreed that the Commissioner of Water and Sewers of the City and his authorized representatives shall have access to and the right to adjust and control valves and meters in order to limit the flow of water as herein provided and for the purpose of meeting any and all emergencies and necessitous requirements.

(15) The Municipality agrees to comply with any and all sanitary regulations of the City and the present and future rules, regulations and instructions of the Department of Water and Sewers of the City applicable to cross-connections and dual water supplies as are in force in the Chicago Water System. The Municipality further agrees that the duly authorized engineers and inspectors of the City, in collaboration with the representatives of the Municipality, shall be allowed to make inspections and require tests for tightness of the piping of the water works installations, and of all plants or other buildings of water users within the territorial limits of the Municipality and the Municipality further agrees to make such changes in its piping and to eliminate such cross-connections or other connections as in the judgment of the Commissioner of Water and Sewers of the City are necessary. The failure, neglect or refusal on the part of the Municipality to make promptly and properly such changes in its piping, to maintain tightness or to eliminate undesirable connections upon notice in writing so to do from said Commissioner of Water and Sewers, shall furnish sufficient grounds for the City to shut off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the Municipality.

(16) The Municipality agrees to prevent excessive use and waste of water.

(17) The Municipality agrees to appropriate annually sufficient money or so much thereof, as may be necessary, to provide sufficient funds for the water furnished by the City hereunder. The Municipality further agrees that it will at all times charge its water consumers sufficient rates in order to provide adequate funds for the payment of water furnished it by the City.

(18) It is further agreed that the City may either in law or equity, by suit, mandamus or other proceedings, enforce or compel performance of any and all covenants herein contained.

(19) In order to safeguard its water supply received hereunder and the City's water supply, the Municipality hereby agrees to maintain a safe water supply throughout its system and to provide, maintain and operate at all times during the period of this contract, chlorinating equipment or other equally effective health protecting process equipment of such kind and capacity that a proper chlorine residual or similarly effective result may be carried throughout its water supply system. All proposed water works improvements, which must be approved by the Commissioner of Water and Sewers of the City, shall be disinfected in accordance with the requirements of the Department of Water and Sewers of the City, said water works improvements shall not be placed into service until approved as to sanitary quality.

(20) The City may adopt any protective or health measures it deems advisable or desirable for the benefit to its water consumers, such as the fluoridation of its water, in any manner that the Commissioner of Water and Sewers of the City shall see fit.

(21) The Municipality agrees to notify the Commissioner of Water and Sewers of the City as promptly as possible of all emergency and other conditions which may directly or indirectly affect the quality of the water received hereunder, or the City's water supply, and further agrees that the duly authorized engineers and inspectors of the City shall be allowed to make inspections and required tests of the quality of the water supply as received hereunder, as well as the quality of the water within the Municipality distribution system.

(22) The Municipality agrees not to resell or permit any water furnished hereunder to be used to supply any other municipality or any consumer of water located or residing outside the corporate limits of the Municipality, except as provided for herein, unless it is specifically authorized so to do by the City Council of the City.

(23) The Municipality agrees to be responsible for any damages or adverse effects caused by the use of ground water in the distribution system.

(24) The Municipality further agrees not to sell, lease or give any interest in or right or privilege to utilize its water supply main or mains to any other municipality or any consumer of water whose premises are located outside the corporate limits of the Municipality, and further agrees not to permit any connection to be made to its water supply main or mains, except to supply consumers within the corporate limits of the Municipality, without first securing the consent in writing of the City Council of the City so to do.

(25) At the end of each calendar year during the term of this contract and not later than March 31st of each year, the Municipality agrees to submit to the Commissioner of Water and Sewers of the City a report in writing showing in cubic feet or gallons the amount of water furnished the Municipality and the amount in quantity and charges billed by it to consumers during the preceding year and to furnish such other information regarding billing, collections and delinquencies as may be requested from time to time by said Commissioner of Water and Sewers.

(26) At the end of each billing period, but at least quarterly, the Municipality agrees to submit to the Commissioner of Water and Sewers of the City a complete list of all water consumers of the Municipality located or residing outside its corporate limits, showing name, location, character of occupancy, amount of water in cubic feet or gallons furnished, charges billed and payment to the City of Chicago at the higher rate.

(27) To secure prompt payment of the water bills, the City shall have the right at any time to require the Municipality to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water required by the Municipality, for a period of ninety (90) days at the then prevailing metered rate, which said advance payment the Municipality hereby agrees to make upon demand.

(28) The City shall not be responsible in damages for any failure to supply water or for interruption of the water furnished hereunder. (31) If the Municipality shall refuse, neglect or fail to pay promptly the bills rendered for water supplied hereunder, within the time or times prescribed by the Ordinance of the City, or if the Municipality shall fail to comply with or perform any of the conditions or obligations on their part to be complied with, or to be performed hereunder, and if after such failure the City shall deliver to the Mayor of the City of Des Plaines, a notice in writing of its intention to shut off the supply of water on account of such failure, refusal or neglect, then the City shall have the right to shut off the supply at the expiration of five (5) days after the giving of such notice, and to terminate this contract unless within such five (5) days the Municipality shall make good such failure. The shutting off of the supply of water for any such cause shall not release the Municipality from its obligation to make payments of any amount or amounts due or to become due in accordance with the terms hereof.

(32) No assignment or transfer of this agreement shall be made by the Municipality.

(33) No officer, official or agent of the City has the power to amend, modify or alter this agreement or waive any of its conditions or to bind the City by making any promise or representation not contained herein.

(34) This agreement is subject to cancellation by the City of Chicago in the event the Supreme Court of the United States of America or any other court of competent jurisdiction decrees that the City has no right to contract for, sell, disperse, or distribute water or limits the amount of water the City may use for domestic pumpage or otherwise places a burden on the City in connection with the withdrawal of water from Lake Michigan or the disposal of water from Lake Michigan to any municipality or user residing outside of the limits of the City of Chicago.

(35) The authority of the officials of the City to execute this agreement is evidenced by the authority of the City Council of the City of Chicago given on the .... day of ...........................A.D. 19........, and published in the Journal of Proceedings of the City Council for said date on pages .... thereof.

(e) to submit plans and specifications for proposed water works improvements to the City and the Village for review and approval.

(f) not to resell or to permit any water so furnished to be used to supply any other municipality or any other consumer located outside its corporate limits except if and when it should be specifically authorized so to do by the City Council of the City and the Village.

Rates and Discounts

(4) The Village shall pay to the City all charges for water furnished hereunder to supply consumers within the corporate limits of the Village and within the corporate limits of the Village of Golf, when due, at the rate fixed by the ordinance of the City now in force and effect, or which may hereafter be amended, for water furnished through meters in like large quantities to consumers within the corporate limits of the City.

(5) The Village shall pay to the City all charges for water furnished hereunder to supply consumers located outside the corporate limits of the Village and outside the corporate limits of the Village of Golf, when due, at the rate of fifty percent (50%) higher than the rate fixed by the ordinance of the City now in force and effect, or which may hereafter be amended, for water furnished through meters in like large quantities to consumers within the corporate limits of the City.

(6) The Village shall be entitled to the same discount or benefit allowed to metered consumers of the City, as provided by the ordinances of the City now in force and effect, or which may hereinafter be amended, if the Village pays its water bills within the time prescribed by ordinance.

(7) The City reserves the right at any time during the term of this contract to classify water consumers and to fix rates for each class of consumer; also to fix rates for water furnished to the Village and other municipalities and persons or other water users, for consumption outside the corporate limits of the City, higher than the rates fixed for water furnished to consumers of the same class for consumption within the corporate limits of the City, subject to such limitations as are then applicable by law.

Period of Contract

(8) This contract shall be in force and continue in effect for a period not longer than ten years from the date hereof unless sooner terminated as herein provided.

Meters and Meter Equipment

(9) The Village, at its own cost and expense, shall provide and install the meter vaults, the meters and meter equipment measuring and controlling the said supply of water, which vaults, meters and meter equipment shall be of such type, size and design as shall be satisfactory to and approved by the Commissioner of Water and Sewers of the City and shall be located in or near the City limits at a location to be approved by said Commissioner of Water and Sewers. The control valves shall be located within the City and such meters, meter equipment, meter vaults and valves shall at all times be under the control of the City, but the full and complete maintenance and protection of such meters, meter equipment and meter vaults shall be the obligation of the Village.

(10) The properly authorized officials, agents and representatives of the City shall at all times have free access to the meter or meters and all other facilities herein provided for, for the purpose of shutting off the water for failure to pay the water rates or charges in this agreement provided to be paid by the Village and for the purpose of reading the registrations of said meter or meters, and to examine, shut off and test the same to ascertain whether or not they are in good condition and repair and to make such repairs upon the same as may be necessary, the expense of any and all necessary repairs to be borne by the Village.

(11) If at any time the said meter or meters shall fail to register correctly the quantity of water furnished and taken hereunder, or shall fail to register the flow of water through said meter or meters, the unregistered, under-registered or over-registered amount of water furnished and taken shall be determined by taking an average of the twelve (12) preceding readings of such meter or meters exclusive of deficient or excessive readings. Where said meter or meters have been installed for a period of less than one (1) year, or where less than twelve (12) competent readings exist, such average or estimate may be based upon a lesser number than twelve (12) readings taken preceding or subsequent to such incorrect or stopped registrations. In both instances, the Commissioner of Water and Sewers of the City shall determine which are excessive or which are deficient readings and shall also determine the number of months upon which such estimate is to be based.

Terms and Conditions of Service:

(12) The Village at its own cost and expense, shall provide, make and keep in repair all feeder mains, connections, meter vaults, receiving tank or tanks, booster or other pumps and slow-acting valves, or other appliances deemed necessary by the Commissioner of Water and Sewers of the City at the points of connection herein designated. If at any time the meter or meters or meter housing, which are also to be provided by the Village, shall

prove unsatisfactory to said Commissioner of Water and Sewers, or be out of repair, they shall be replaced or repaired by the City and the cost and expense of such replacements or repairs shall be charged to and paid by the Village.

(13) The Village shall provide, install, maintain and operate at its own cost and expense and at such locations as shall be designated by the Commissioner of Water and Sewers of the City, the following:

> A shut-off gate or gates, reservoir or reservoirs of sufficient capacity to store not less than the maximum day's supply of water; receiving tank or tanks, booster or other pumps, slow-acting valves and such other appliances or devices as may be required by said Commissioner of Water and Sewers for the purpose of increasing, decreasing, and otherwise controlling the water supply furnished and taken hereunder, said equipment and appliances to be of such type, size and design as shall be satisfactory to and approved by said Commissioner of Water and Sewers, and the entire installation thereof shall be under the direction of and performed in a manner satisfactory to and approved by said Commissioner of Water and Sewers. The Village agrees to maintain and operate said reservoir or reservoirs of such capacity that water will be drawn from the City's mains at a substantial uniform rate of flow, as hereinafter provided during the period of this contract.

(14) The water supply furnished and taken hereunder shall be drawn by the Village at a substantial uniform rate of flow throughout twenty-four (24) hours of each day of the year.

It is hereby agreed that the Commissioner of Water and Sewers of the City and his authorized representatives shall have access to and the right to adjust and control valves and meters in order to limit the flow of water as herein provided and for the purpose of meeting any and all emergencies and necessitous requirements.

(15) The Village agrees to comply with any and all sanitary regulations of the City and the present and future rules, regulations and instructions of the Department of Water and Sewers of the City applicable to cross-connections and dual water supplies as are in force in the Chicago Water System. The Village further agrees that the duly authorized engineers and inspectors of the City, in collaboration with the representatives of the Village, shall be allowed to make inspections and require tests for tightness of the piping of the water works installations, and of all plants or other buildings of water users within the territorial limits of the Village and the Village further agrees to make such changes in its piping and to eliminate such cross-connections or other connections as in the judgment of the Commissioner of Water and Sewers of the City are necessary. The failure, neglect or refusal on the part of the Village to make promptly and properly such changes in its piping, to maintain tightness or to eliminate undesirable connections upon notice in writing so to do from said Commissioner of Water and Sewers, shall furnish sufficient grounds for the City to shut off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the Village.

(16) The Village agrees to prevent excessive use and waste of water.

(17) The Village agrees to appropriate annually sufficient money or so much thereof, as may be necessary, to provide sufficient funds for the water furnished by the City hereunder. The Village further agrees that it will at all times charge its water consumers sufficient rates in order to provide adequate funds for the payment of water furnished it by the City.

(18) It is further agreed that the City may either in law or equity, by suit, mandamus or other proceedings, enforce or compel performance of any and all covenants herein contained.

(19) In order to safeguard its water supply received hereunder and the City's water supply, the Village hereby agrees to maintain a safe water supply throughout its system and to provide, maintain and operate at all times during the period of this contract, chlorinating equipment or other equally effective health protecting process equipment of such kind and capacity that a proper chlorine residual or similarly effective result may be carried throughout its water supply system. All proposed water works improvements, which must be approved by the Commissioner of Water and Sewers of the City, shall be disinfected in accordance with the requirements of the Department of Water and Sewers of the City; said water works improvements shall not be placed into service until approved as to sanitary quality.

(20) The City may adopt any protective or health measures it deems advisable or desirable for the benefit of its water consumers, such as the fluoridation of its water, in any manner that the Commissioner of Water and Sewers of the City shall see fit.

(21) The Village agrees to notify the Commissioner of Water and Sewers of the City as promptly as possible of all emergency and other conditions which may directly or indirectly affect the quality of the water received hereunder and the City's water supply and further agrees that the duly authorized engineers and inspectors of the City shall be allowed to make inspections and required tests of the quality of the water supply as received hereunder, as well as the quality of the water within the Village distribution system.

(22) The Village agrees not to resell or permit any water furnished hereunder to be used to supply any other municipality or any consumer of water located or residing outside the corporate limits of the Village, except as provided for herein unless it is specifically authorized so to do by the City Council of the City.

(23) The Village agrees to use City water exclusively during the period of this contract.

(24) The Village further agrees not to sell, lease or give any interest in or right or privilege to utilize its water supply main or mains to any other municipality or any consumer of water whose premises are located outside the corporate limits of the Village, and further agrees not to permit any connection to be made to its water supply main or mains, except to supply consumers within the corporate limits of the Village, without first securing the consent in writing of the City Council of the City so to do.

(25) At the end of each calendar year during the term of this contract and not later than March 31st of each year, the Village agrees to submit to the Commissioner of Water and Sewers of the City a report in writing showing in cubic feet or gallons

the amount of water furnished the Village and the amount in quantity and charges billed by it to consumers during the preceding year and to furnish such other information regarding billing, collections and delinquencies as may be requested from time to time by said Commissioner of Water and Sewers.

(26) At the end of each billing period, but at least quarterly, the Village agrees to submit to the Commissioner of Water and Sewers of the City a complete list of all water consumers of the Village located or residing outside its corporate limits, showing name, locations, character of occupancy, amount of water in cubic feet or gallons furnished, charges billed and payments to the City of Chicago at the higher rate.

(27) To secure prompt payment of the water bills, the City shall have the right at any time to require the Village to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water required by the Village, for a period of ninety (90) days at the then prevailing metered rate, which said advance payment the Village hereby agrees to make upon demand.

(28) The City shall not be responsible in damages for any failure to supply water or for interruption of the water furnished hereunder. The Village agrees to save and keep harmless the City from all damages to real and personal property occasioned or caused by the making of the water connection or connections herein referred to or caused by the furnishing of water hereunder, and shall also save and keep harmless the City from all damage of any kind, nature and description which may arise as the result of the making of this agreement.

(29) The City reserves the right to its Commissioner of Water and Sewers to decide all questions arising as to the proper performance of this contract.

(30) In furtherance and not in limitation of this contract, it is mutually agreed that all rights of the City and the Village under the water supply contract No. 23920 dated March 5, 1963 by and between the City of Chicago and the Village of Morton Grove, and the amendment thereto dated November 12, 1963 and all rights of either party arising from the delivery of water prior to the date of the execution of this agreement are extinguished, except for the express reservation of the right of the City to obtain for or to enforce collection of any unpaid water charges accruing prior to the date of execution of this agreement.

(31) If the Village shall refuse, neglect or fail to pay promptly the water bills rendered for the water supplied it hereunder within the time or times prescribed by the Ordinance of the City, or if the Village shall fail to comply with or perform any of the conditions or obligations on their part to be complied with or to be performed hereunder, and if after such failure the City shall deliver at the Village Hall of the Village addressed to the President and Board of Trustees of the Village a notice in writing of its intention to shut off the supply of water on account of such failure, refusal or neglect, then the City shall have the right to shut off the supply at the expiration of five (5) days after the giving of such notice, and to terminate this contract unless within such five (5) days the Village shall make good such failure. The shutting off of the supply of water for any such cause shall not release the Village from its obligation to make payments of any amount or amounts due or to become due in accordance with the terms hereof.

(32) No assignment or transfer of this agreement shall be made by the Village.

(33) No officer, official or agent of the City has the power to amend, modify or alter this agreement or waive any of its conditions or to bind the City by making any promise or representation not contained herein.

(34) This agreement is subject to cancellation by the City of Chicago in the event the Supreme Court of the United States of America or any other court of competent jurisdiction decrees that the City has no right to contract for, sell, disperse, or distribute water or limits the amount of water the City may use for domestic pumpage or otherwise places a burden on the City in connection with the withdrawal of water from Lake Michigan or the disposal of water from Lake Michigan to any municipality or user residing outside of the limits of the City of Chicago.

(35) The authority of the officials of the City to execute this agreement is evidenced by the authority of the City Council of the City of Chicago given on the .... day of .... A.D. 19...., and published in the Journal of Proceedings of the City Council for said date on pages .... thereof.

(36) The authority of the officials of the Village to execute this agreement is evidenced by the resolution passed by the President and Board of Trustees of the Village of Morton Grove at a regular meeting of said President and Board of Trustees duly held on the .... day of .... A.D. 19.....

(37) In Witness Whereof, the City of Chicago has caused this agreement to be signed in quintuple originals (each signed copy constituting an original) by its Mayor and its Commissioner of Water and Sewers, accepted by its Comptroller and its Corporate Seal to be hereto affixed and duly attested by its Clerk, and the Village of Morton Grove has caused the same to be signed in quintuple originals (each signed copy constituting an original) by its President of the Board of Trustees and its Corporate Seal to be hereto affixed, duly attested by its Clerk on the day and year first above written.

Action Deferred—ON PROPOSED ORDINANCE ESTABLISHING PROCEDURES FOR ISSUANCE OF WATER REVENUE BONDS.

The Committee on Finance submitted the following report, which was, at the request of two aldermen present (Alderman Oberman and Alderman Simpson) *Deferred* and ordered published:

CHICAGO, May 26, 1975.

To the President and Members of the City Council:

Your Committee on Finance to which was referred a communication dated May 8, 1975 from the Office of the Mayor transmitting an ordinance establishing procedures for the issuance of water revenue bonds, having had the same under advisement, begs leave to report and recommend that Your Honorable Body pass the proposed ordinance transmitted herewith.

This recommendation was concurred in by a viva voce vote of the members of the committee.

Respectively submitted,
(Signed) MICHAEL A. BILANDIC,
Chairman.

The proposed ordinance transmitted with foregoing committee report reads as follows:

Whereas, The City of Chicago has heretofore constructed and is presently maintaining and operating a complete water system hereafter referred to as the Chicago Water System to meet the needs of its inhabitants and the users thereof and for fire protection; and

Whereas, The City of Chicago has heretofore, from time to time and pursuant to the authorization contained in Section 11-133-1 et seq. of the Illinois Municipal Code of 1961, as amended, issued its certificates of indebtedness for the purpose of paying the cost of constructing improvements and extensions to the Chicago Water System, such certificates of indebtedness by their terms being payable only from the revenues to be derived from the operation of said System, and many such certificates are presently outstanding and unpaid; and

Whereas, Section 6(a) of Article VII of the 1970 Constitution of Illinois provides that "any municipality which has a population of more than 25,000 (is) a Home Rule Unit" and may, therefore, "exercise any power and perform any function pertaining to its government and affairs . . . ;" and

Whereas, The City of Chicago has a population of more than 25,000 and is, therefore, a Home Rule Unit; now, therefore,

Be It Ordained By The City Council of the City Of Chicago:

Section 1. The Municipal Code of Chicago is amended in Chapter 7 thereof by adding the following new Sections, 7-67 through and including 7-74.

7-67. The City of Chicago, acting by its City Council, may from time to time, borrow money for the purpose of paying the cost of constructing extensions, improvements, or both, to the existing Chicago Water System and in evidence of such borrowing, issue its Water Revenue Bonds, which shall be payable, both as to principal and interest, solely and only from the revenues to be derived from the operation of the Water System of said City, which Water Revenue Bonds shall become due within 40 years of their date and shall not in any event constitute an indebtedness of said City within the meaning of any constitutional or statutory provision or limitation on indebtedness which may be incurred and the Water Revenue Bonds shall not be payable from ad valorem taxes to be levied and extended against taxable property situated within the City. The procedures for the issuance of Water Revenue Bonds shall be as substantially herein provided in Sections 68 through 74 of this chapter.

7-68. The City Council shall adopt an ordinance (hereinafter designated the "Water Revenue Bond Ordinance"), which shall set forth the amount of money necessary to be borrowed and the amount of the Water Revenue Bonds to be issued in evidence of such borrowing, shall describe in a general way the improvements, extensions, or both, necessary to be made and the estimated cost thereof. It shall not be necessary that such Water Revenue Bond Ordinance refer to or incorporate therein by reference detailed plans and specifications of such improvements, extensions, or both.

Prior to the adoption of any such Water Revenue Bond Ordinance, a public hearing shall be held thereon by the Finance Committee of the City Council, pursuant to a notice given of such public hearing, such notice to refer generally to the subject matter of the Water Revenue Bond Ordinance and to be published at least once in a newspaper published in and having a general circulation within the City of Chicago, the date of such publication to be not less than 10 days prior to the date of the public hearing.

7-69. The Water Revenue Bond Ordinance shall fix the details of the Bonds to be issued, including their date, number, denomination and maturity, which cannot exceed 40 years from their date and their maximum rate of interest which shall not exceed 8% per annum. The Bonds shall be sold in such manner as may be determined in the Water Revenue Bond Ordinance and they shall be sold at a price of not less than par. The Water Revenue Bond Ordinance shall further provide that it will be plainly stated on the face of each Water Revenue Bond that the same has been issued under and pursuant to the provisions of this Ordinance and that such Water Revenue Bond does not constitute an indebtedness of the City of Chicago within any constitutional or statutory provision or limitation as to debt. The Water Revenue Bond Ordinance shall further set forth and contain such provisions and covenants as may be deemed necessary or advisable for the assurance of the prompt payment of the Water Revenue Bonds thereby authorized and as may be thereafter authorized and including the prompt payment of Water Revenue Bonds or Certificates theretofore issued and which by their terms are payable from the revenues of the Chicago Water System and may be then outstanding.

7-70. Whenever Water Revenue Bonds are issued pursuant to the provisions of this Ordinance, the entire revenue received from the operation of the Chicago Water System shall be deposited in a separate fund designated as the "Water Fund of the Municipality of Chicago". This fund shall be used only in paying (1) the cost of maintenance and operation of the Chicago Water System; (2) obligations of the City of Chicago heretofore issued that are payable by their terms from the revenues of the System, whether such obligations were heretofore issued in the form of certificates, bonds or otherwise; (3) Water Revenue Bonds issued pursuant to the provisions of this code; and (4) establishing and maintaining all reserve funds or accounts as may be covenanted for in the bond ordinances adopted authorizing such Water Revenue Bonds. Provided, however, that any funds available after or not necessary for satisfying the above requirements may be used for any lawful purpose of the Chicago Water System.

Rates charged by the City for water used shall be sufficient to pay the cost of maintenance and operation of the Chicago Water System and to pay promptly when due the principal of and interest upon all the obligations of the City heretofore issued that are payable by their terms only from such revenues of the Water System and the payment of Water Revenue Bonds issued pursuant to the provisions of the Water Revenue Bond Sections of this Chapter, and to establish and maintain all reserve funds or accounts as may be covenanted for in bond ordinances adopted and authorizing the issuance of such Water Revenue Bonds. These rates charged shall not be reduced while any of such certificates or bonds or obligations are unpaid.

7-71. The Water Revenue Bond Ordinance shall authorize execution of the Bonds therein authorized on behalf of the City by being signed by the Mayor and by the City Comptroller and to be attested by the City Clerk, and by the respective proxies of said Mayor and City Comptroller, shall determine whether such Bonds to be issued shall be registered in the name of the owner as to principal only and shall indicate the place or places of payment of the principal and interest maturing on said bonds and shall also set forth the form of Water Revenue Bonds to be issued.

The Mayor and the City Comptroller may each designate another to act as their respective proxies and to affix their respective signatures to any such Water Revenue Bonds, and in such case, each shall send to the City Council written notice of the person so designated by each, such notice stating the name of the person so selected to sign as proxy for the Mayor and the City Comptroller, respectively. A written signature of the Mayor or of the City Comptroller, respectively, executed by the person so designated underneath, shall be attached to each notice. Each notice, with the signature attached, shall be recorded in the Journal of the Proceedings of the City Council and then filed with the City Clerk. When the signature of the Mayor is placed on a Water Revenue Bond at the direction of the Mayor in the specified manner, the bond, in all respects, shall be as binding on the City as if signed by the Mayor in person. When the Comptroller's signature is so affixed to a Water Revenue Bond at the Comptroller's direction, the bond, in all respects, shall be as binding on the City as if signed by the Comptroller in person.

7-72. In case any officer whose signature appears on the specified Bonds or the coupons attached thereto ceases to hold his office before the delivery of the Bonds to the purchaser, his signature nevertheless shall be valid and sufficient for all purposes, to the same effect as if he had remained in office until the delivery of the Bonds.

7-73. The provisions of any Water Revenue Bond Ordinance shall constitute an appropriation of the amounts required as therein referred to and described and upon the delivery of the Bonds therein authorized, the proceeds thereof shall be used solely and only for the purpose or purposes for which the Bonds were authorized. Upon the adoption of any such Bond Ordinance by the City Council and its approval by the Mayor, the same shall be published by the City Clerk in pamphlet form and shall be in full force and effect upon its publication. Such Water Revenue Bond Ordinance shall not be subject to referendum approval by the voters but shall become effective upon its publication as above provided for.

7-74. Pursuant to the authority granted by Section 6 of Article VII of the Constitution of Illinois 1970, the procedures hereby established for the issuance of Water Revenue Bonds payable from the revenues to be derived from the operation of the Chicago Water System as herein provided for shall be controlling and shall be complied with by the City Council in the borrowing of money through the issuance of Water Revenue Bonds payable from revenues to be derived from the Chicago Water System of the City notwithstanding anything to the contrary contained in the provisions of the Illinois Municipal Code of 1961 and all acts amendatory thereof and supplementary thereto and any other laws of the State of Illinois.

Section 2. This ordinance shall be in full force and effect immediately upon its passage by the City Council of the City of Chicago and its approval by the Mayor.

The proposed ordinance transmitted with the foregoing committee report reads as follows:

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. The Municipal Code of Chicago is hereby amended by adding new Sections to be numbered 100-29.4 through 100-29.13 as follows:

"100-29.4. For the purpose of Sections 100-29.5 through 100-29.13 the following terms shall have the meanings ascribed to them by this Section:

"a. The term "consumer commodity" means any article, product or commodity of any kind or class, which is produced or distributed for sale through retail sales outlets.

"b. The term "selling price" shall mean the price at which a consumer commodity is sold at retail on any given date. In the case of commodities weighed by retailers, the selling price shall only be computed by using the price per one pound as the basis for the sale; provided that the metric system may be employed where customary.

"c. The term "reference price" shall mean an advertised price to which a selling price is compared in advertising which employs comparative pricing. Reference price shall include the use of terms such as: if perfect, list price, regular price, full price, retail price, or words of similar import. Reference price may also be displayed as a higher price than the selling price with no qualification or may be implied by a statement such as, Save 40%.

"d. The term "comparative pricing" shall mean the use of two prices in advertising, the selling price and the reference price.

"100-29.5. It shall be unlawful for any person to advertise, sell, offer or expose for sale any consumer commodity unless the selling price is accurately stated in a clear and conspicuous manner using arabic numerals. On any pre-packaged consumer commodity the selling price shall be marked directly on the package.

On any consumer commodity which is not pre-packaged the selling price shall be stated on a sign contiguous to the point of display of the consumer commodity so priced:

Provided that when any consumer commodity is not pre-packaged and is sold out-of-doors the selling price numerals shall be not less than 3 inches in height and 1½ inches in width and any fractional numerals shall be not less than one-half the height and width of the whole numerals.

"100-29.6. It shall be unlawful for any person to advertise a reduction in price, either directly or indirectly through the use of terms such as 'sale' or 'reduced to' or terms of similar import unless:

"(a) The immediately preceding price was in effect for at least 30 days prior to the effective date of the reduction;

"(b) The immediate preceding price is disclosed in a clear and conspicuous manner or can be readily ascertained by disclosure of the stated dollar or percentage reduction in price; and

"(c) The immediately preceding price is disclosed in a clear and conspicuous manner if any other comparison price is advertised in connection with a price reduction.

"100-29.7. It shall be unlawful for any person to advertise a 'sale' or other temporary change in prices unless the duration of the sale or other temporary change in terms of time is disclosed by stating the number of days or termination date. Provided, however, that where a termination date has been advertised in good faith, the date may be extended.

"100-29.8. It shall be unlawful for any person to advertise a price for a commodity by comparing it with the price of another commodity unless the reference price of the other commodity is specifically identified as manufacturer's list price, the advertiser's own price, a competitor's offering price or other specific comparison which the advertiser can substantiate. In addition to substantiating the price comparison, the advertisement shall establish that:

"a. The comparability of the two commodities can be proved by reference to established standards of identity or performance; or

"b. The advertiser has otherwise established that the two commodities are substantially identical in all significant respects, or

"c. The other article is specifically identified.

100-29.9. It shall be unlawful for any person to advertise in a manner which expressly or impliedly offers lowered prices on commodities as a result of some unusual circumstances, unless the circumstances are true and the advertised prices are actually lower than the advertiser's usual prices.

"Unusual circumstances" shall include but is not limited to terms such as 'special purchase', 'exceptional purchase', 'clearance', and 'manufacturer's close out.'

"100-29.10. It shall be unlawful for any retailer to advertise a consumer commodity for sale by using terms such as 'wholesale' or 'factory' to describe prices unless the prices offered to consumers are the same prices as paid by retailers or as paid by those who purchase directly from the manufacturer for resale.

"100.29.11. It shall be unlawful for any retailer to advertise a consumer commodity for sale unless identification of the commodity is made at the place of display through use of prominent shelf tags or similar means.

"100-29.12. It shall be unlawful for any person to offer for sale any of the commodities listed in sub-section "a" of this section unless the unit price information is provided in a clear and conspicuous manner on a sign or shelf tag which lists the identity and brand name of the commodity, the quantity declaration of the packaged commodity, the total retail sales price, and the price per unit as set forth in sub-section "a".

(1) Compliance with Regulations: The contractor shall comply with the Regulations relative to nondiscrimination in Federally-assisted programs of the Department of Transportation (hereinafter, "DOT") Title 49, Code of Federal Regulations, Part 21, as they may be amended from time to time, (hereinafter referred to as the Regulations), which are herein incorporated by reference and made a part of this contract.

(2) Nondiscrimination: The contractor, with regard to the work performed by it during the contract, shall not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors, including procurements of materials and leases of equipment. The contractor shall not participate either directly or indirectly in the discrimination prohibited by section 21.5 of the Regulations.

(3) Solicitations for Subcontracts, Including Procurements of Materials and Equipment: In all solicitations either by competitive bidding or negotiation made by the contractor for work to be performed under a subcontract, including procurements of materials or leases of equipment, each potential subcontractor or supplier shall be notified by the contractor of the contractor's obligations under this contract and the Regulations relative to nondiscrimination on the grounds of race, color, or national origin.

(continued from page 505)

Now, therefore, for and in consideration of the benefits which will accrue to the parties hereto by virtue of this Agreement and the respective covenants herein contained, It Is Mutually Covenanted And Agreed as follows:

1. The City shall be the "Sponsor" of the project identified above, except as set forth in Paragraph 2 immediately hereafter following.
2. The Division shall act as agent for the accomplishment of the project by its rendering and furnishing of certain administrative services, as follows: documentation and project reporting liaison with the Federal Aviation Administration.
3. The City shall, by appropriate contract or amendment, or supplementary contract, cause adequate, capable and qualified project managers acceptable to the Division to be furnished by Landrum and Brown, Inc. (Consultant) and shall therein make provision to effectuate the provisions hereinafter set forth in Section 4; and shall therein provide that such project reports as shall be required by the Federal Aviation Administration, shall be prepared and forwarded to the Division by such project manager.
4. The Division is hereby authorized, empowered, appointed and directed to:
   a. to issue proceed notices and such stop-work orders as the Federal Aviation Administration shall determine to be necessary or expedient; as prescribed by the Airport and Airway Development Act;
   b. to procure and to forward to the Federal Aviation Administration such project documents and project reports, and to approve or disapprove periodic and final estimates and completed work as the latter shall require.
   c. to accept, receive, receipt for, and deposit with the State Treasurer to the account of said project any and all funds granted, allowed, paid or made available by the United States under the Airport and Airway Development Act and Congressional appropriations made pursuant thereto, and to disburse upon State warrant such funds in the payment of such project costs as the Division shall determine to be earned and payable;

   which agency responsibilities, duties and authorities the Division hereby accepts and assumes, for execution and discharge according to the best of its ability.
5. The City shall be signatory party, in its own name, stead, right and behalf, to the Project Application made or to be made to the Federal Aviation Administration, to the Acceptance of such Grant Offer as shall be tendered by the United States, through the Federal Aviation Administration, and to any and all Amendments to such Grant Agreement as shall be executed.
6. The estimated total costs for said project is $31,564. The Division hereby agrees, with the approval of the Governor, to participate in the project for payment of such project costs as are not barred by Section 34 of the Illinois Aeronautics Act, from funds appropriated to the Division by and under Section 12, Senate Bill 1345, in the amount of one-sixth (1/6) participation or $4,996 of project costs. The State will participate in the amount of one-third (1/3) of 5.3% of the Consultant's contract costs or $530 under Section 12, Senate Bill 1345 for State administrative costs. Payments to the Engineer, shall be made on the basis of monthly reports and approved by the Chief Engineer, up to ninety percent (90%) of said maximum State funds committed to and released for the project. The remaining ten percent (10%) may be retained by the Division until after the contract has been completed and accepted and all other requirements of the contract agreed to be performed by the Engineer are complied with.

   On the basis of the Project Application, it is expected that a Grant Offer from the United States will be tendered in the approximate amount of $21,042. Accordingly, it is estimated that the share of the City in the total project costs will be approximately $4,996. However, the City specifically agrees that in any event it will pay all project costs by which the total of actual project costs may and shall exceed the sum of the State funds as are herein committed and the Federal funds granted, or otherwise in order to complete the work called for by the project Grant Agreement with the United States, as the same may, with the express consent and approval of the City, be amended, changed, modified, or supplemented —subject, however, and only, to the limitations as to revenue and restrictions on bonded indebtedness imposed by State statutes and constitution.
7. The City agrees to comply at all times with the conditions prescribed in the second proviso of said Section 34 with respect to which the City is required to satisfy the Division under the terms thereof.
8. The airport shall be used, operated, and maintained at all times by the City for the use and benefit of the general public without unjust discriminaton, in accordance with all applicable Federal and State laws and the rules and regulations prescribed thereunder, and in accordance with the covenants and assurances of the City made with and to the United States.
9. The City should file with the Division, such reports concerning study documents as defined in Study Work Program, Section MP6; as the Division may require from time to time.
10. Notices, reports or other communications required by or transmitted pursuant to this Agreement to the Division shall be directed to the attention of the Director of Aeronautics, Division of Aeronautics, State of Illinois, Capital Airport, Springfield, Illinois.
11. To the extent that the Grant requires, this Agreement is made subject and subordinate to the provisions thereof. All commitments of the City hereunder are subject to Constitutional and statutory limitations binding upon it to the availability of funds which may lawfully be applied hereto.
12. In the event that the Federal Aviation Administration, acting for the United States shall refuse or fail to extend a Grant Offer on this project, this Agreement shall automatically be voided and become of no force and effect.

13. This Agreement shall be and is deemed to be one entered into pursuant to the Illinois Aeronautics Act of the State of Illinois, and shall be construed and given effect in accordance with said Act and not otherwise.

In Witness Whereof, the parties hereto have caused this Agreement to be executed and their respective seals affixed as of the dates respectively hereafter set forth.

Subject to rules and regulations promulgated by City in accordance with Article VIII hereof, Airline shall have the right and privilege over the Airport of ingress to and egress from (but not any other use of, except as authorized in this Agreement or in any other agreement between City and Airline) the areas and facilities described in this Article I for its employees, agents, passengers, guests, patrons and invitees, its or their suppliers of materials and furnishers of service, its or their equipment, vehicles, machinery and other property and except as in this Agreement or in any other agreement between City and Airline otherwise specifically provided, no charges, fees or tolls of any nature, direct or indirect, shall be imposed by City upon Airline, its employees, agents, passengers, guests, patrons and invitees, its or their suppliers of materials and furnishers of service for such right of ingress and egress, or for the privilege of purchasing, selling or using any materials or services purchased or otherwise obtained by Airline, as provided in subparagraphs (g) and (i) of this Section, or transporting, loading, unloading or handling persons, property, cargo or mail in connection with Airline's business or exercising any right or privilege granted by City hereunder. This grant is not to be construed as a lease of any space in any passenger terminal building, any adjacent ramp area leased by City to any air transportation company or other person, firm or corporation, any hangar, any air cargo building, any fueling system or any other building constructed or to be constructed by City at the Airport. Any ramp area at the Airport leased by City to one or more air transportation companies, persons, firms or corporations shall not be considered to be a public ramp area or a ramp area available for common use.

FLIGHT FEES FOR LANDING OF AIRCRAFT

SECTION 2.01. *Flight Fees for landing of aircraft.* In connection with each fee landing at the Airport of each aircraft operated by it, Airline shall pay to City a fee (hereinafter called "Flight Fee") determined as hereinafter provided.

Each separate landing at the Airport of an aircraft (whether in connection with a revenue or a non-revenue flight) operated by Airline or others, shall be a "fee landing", except that a "fee landing" shall not include the following:

(a) any landing at the Airport of an aircraft which shall have taken off from the Airport and, without making a stop at any other airport, returns to and lands at the Airport because of meteorological conditions, mechanical or operating causes, or any similar emergency or precautionary reason;

(b) any landing at the Airport of an aircraft returning to the Airport on a non-revenue flight from the Chicago Municipal Airport, known as Midway Airport, provided each such aircraft shall have taken off from the Airport on a non-revenue flight to Midway Airport without in either case making a stop at any other airport;

(c) any touch-and-go and similar operation in which an aircraft comes in contact with a runway at the Airport and without coming to a stop thereafter resumes flight by leaving the ground from the same runway and in the same direction;

(d) any landing of aircraft operated by the United States Government or the Illinois National Guard if and to the extent the lease entered into between City and the United States Government, dated May 16, 1958, relating to the Airport shall remain in effect and under the terms and conditions thereof, such landing is to be without charge, or if and to the extent that under the terms and conditions of assurances pursuant to the Federal Airport Act, or any other prior or future Acts of Congress or of the General Assembly of the State of Illinois that may provide for Grants in Aid of airport development, such landing is to be without charge; or

(e) any landing at the Airport of helicopter aircraft operated in local service between the Airport and any point within a radius of fifty (50) miles from the Airport.

SECTION 2.02. *Flight Fee rate after December 31, 1958 and while any Approved Revenue Bonds are outstanding.* During the fiscal year commencing January 1, 1959 and during each fiscal year thereafter, but only so long as any Approved Revenue Bonds are outstanding, the Flight Fee payable in connection with each fee landing at the Airport of an aircraft operated by Airline shall be such amount (computed to the nearest 1/10th of a cent) per each one thousand pounds (1,000 lbs.) of the approved maximum landing weight of such aircraft as equals the quotient obtained by dividing (a) the Flight Fee Revenue Requirements for the fiscal year in which such fee landing occurs by (b) the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport during such year, both as estimated by the Airport Consultant. So long as any Approved Revenue Bonds are outstanding, the Airport Consultant shall, prior to January 1 and July 1 of each year, commencing January 1, 1959, furnish an estimate of Flight Fee Revenue Requirements for such year and of the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties to be landed in fee landings at the Airport during such year and during the six-month periods commencing such January 1 or July 1, respectively, and shall recommend, based on such estimate, the Flight Fee rate for fee landings at the Airport during each such six-month period of aircraft operated by Airline Parties. The Airport Consultant in making any estimate of Flight Fee Revenue Requirements for any fiscal year at any time after the Budget, referred to in the Revenue Bond Ordinance, for such fiscal year shall have been adopted, shall use budgeted amounts wherever applicable, and insofar as such estimate involves any deferred income properly allocable to such year on account of the results of the next preceding fiscal year, any such estimate made after the filing of the audited statement, referred to in Section 6.08 of the Revenue Bond Ordinance, for such next preceding year shall take into account the amount shown as such deferred income in such audited statement. The Flight Fee rate for such fee landings shall be established (including, if required, any revision thereof as of July 1 of any year) according to such recommendation of the Airport Consultant.

Notwithstanding the foregoing provisions of this Section 2.02, in the event the effective date of this Agreement shall be subsequent to January 1, 1959, then the Flight Fee rate in effect immediately prior thereto shall continue in effect until a revised rate is established in accordance with the provisions of this Section 2.02. Promptly after such effective date, the Airport Consultant shall recommend whether or not a revised Flight Fee rate should be established for fee landings at the Airport for the period commencing as early as practicable following such effective date and ending on the next succeeding June 30 or December

31, as the case may be, and if such a revised rate is recommended, the date on which it should be placed in effect. Such recommendation shall be based on an estimate of the same character as that referred to in the preceding paragraph, which estimate, however, shall take into account the estimated expenses, and the estimated Revenues to be produced from the Flight Fee rate in effect during the period prior to the date on which any revised Flight Fee rate is recommended to be placed in effect. A Flight Fee rate shall be established in accordance with any such recommendation of the Airport Consultant.

SECTION 2.03. *Deficiency in Flight Fees while any Approved Revenue Bonds are outstanding.* In the event that in any fiscal year, beginning with the fiscal year commencing January 1, 1959, in which any Approved Revenue Bonds are outstanding, the Revenues under the Revenue Bond Ordinance for such fiscal year (excluding, however, any Flight Fee deficiency for such fiscal year) shall be less than the amount of Airport Expense for such fiscal year (such deficiency being herein referred to as the "Flight Fee deficiency"), then Airline shall pay to City the Airline's pro rata share of the Flight Fee deficiency for such year. Airline's pro rata share of a Flight Fee deficiency for any fiscal year shall be such amount as bears the same proportion to the amount of such deficiency as the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by Airline and landed in fee landings at the Airport during such year bears to the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport during such year. The City Comptroller shall, promptly, but not later than January 15, after the end of each such fiscal year, furnish to Airline an estimate of the Revenues under the Revenue Bond Ordinance and Airport Expense for such year, including an estimate as to whether or not any Flight Fee deficiency exists for such year, and Airline shall pay its pro rata share of any Flight Fee deficiency for such year shown by such estimate. In the event the Flight Fee deficiency for any fiscal year shown in the audited statement, referred to in Section 6.08 of the Revenue Bond Ordinance, for such year, shall exceed the Flight Fee deficiency for such year shown in the above-mentioned estimate of the City Comptroller for such year, then Airline shall pay its pro rata share of such excess, and in the event such audited statement for any fiscal year shall show a Flight Fee deficiency for such year, but no Flight Fee deficiency for such year shall have been shown in the above-mentioned estimate of the City Comptroller for such year, then Airline shall pay its pro rata share of the Flight Fee deficiency shown in such audited statement.

SECTION 2.04. *Flight Fee rate after effective date of Agreement and when no Approved Revenue Bonds are outstanding.* At any time after the effective date of this Agreement when no Approved Revenue Bonds are outstanding, the Flight Fee payable in connection with each fee landing at the Airport of an aircraft operated by Airline during each twelve-month period (or portion thereof during which no Approved Revenue Bonds are outstanding) commencing July 1 shall be such amount (computed to the nearest 1/10th of a cent) per each one thousand pounds (1,000 lbs.) of the approved maximum landing weight of such aircraft, as equals the quotient obtained by dividing (a) the Adjusted Net Airport Expense for the fiscal year next preceding the commencement of such twelve-month period by (b) the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport during such preceding fiscal year.

SECTION 2.05. *Minimum Flight Fee.* Notwithstanding the foregoing provisions, the Flight Fee payable in connection with each fee landing at the Airport of an aircraft operated by Airline shall at no time be less than a minimum of Six Cents ($0.06) per each one thousand pounds (1,000 lbs.) of the approved maximum landing weight of such aircraft.

SECTION 2.06. *Definitions.* Article XV hereof defines various terms used in this Article II.

ARTICLE III

AIRCRAFT PARKING FEES

In the event Airline shall park its passenger aircraft in any public passenger ramp area at the Airport for a period of more than forty-five (45) minutes, then at the discretion of City, removal of such aircraft may be directed by it and if upon the lapse of a fifteen (15) minute period after such direction, Airline shall fail to so remove its aircraft, it shall pay to City a fee of Five Dollars ($5.00) for each thirty (30) minutes or fraction thereof that such aircraft remains in such public passenger ramp area after such fifteen (15) minute period. In the event Airline shall park its cargo aircraft in any public cargo ramp area for a period of one hundred twenty (120) minutes, then at the discretion of City, removal of such aircraft may be directed by it and if upon the lapse of a fifteen (15) minute period after such direction, Airline shall fail to so remove such aircraft, it shall pay City a fee of Five Dollars ($5.00) for each thirty (30) minutes or fraction thereof that such aircraft remains in such public cargo ramp area after such fifteen (15) minute period.

City may charge Airline fees of not more than Ten Dollars ($10.00) for each twenty-four (24) hours or fraction thereof in excess of a free period of twenty-four (24) hours for the parking of its aircraft in public aircraft parking areas.

ARTICLE IV

Payment of Fees

City shall, within fifteen (15) days following the end of each calendar month, furnish to Airline a statement setting forth the amount of any Flight Fees and Aircraft Parking Fees payable by Airline hereunder for such month. The amount of any Flight Fees and Aircraft Parking Fees payable by Airline hereunder for any calendar month shall be due and payable by it on the last day of the next succeeding calendar month.

City shall, as promptly as practicable, furnish to Airline a statement setting forth any amount payable by Airline pursuant to Section 2.03 hereof as Airline's pro rata share of any Flight Fee deficiency and such amount payable by Airline shall be due and payable by it within twenty (20) days after such statement is mailed or otherwise delivered by City.

All amounts payable by Airline hereunder shall be paid to City at the office of the City Comptroller of City and any amount payable by Airline hereunder which is not paid when due shall bear interest at the rate of seven per cent (7%) per annum from the due date thereof until paid.

The payment by Airline to City of any amount thereunder and the acceptance thereof by City, shall not preclude either Airline or City from questioning, within a period of eighteen (18) months from the date of such payment by Airline, the accuracy of any statement on the basis of which such payment was made, or preclude City from making, within such period, any claim against Airline for any additional amount payable by Airline hereunder, or preclude Airline from making, within such period, any claim against City for credit for any excess amount paid by Airline hereunder.

Under the Lease of Terminal Facilities contemporaneously entered into between City and Airline, City has leased to Airline certain passenger ramp areas at the Airport and Airline has agreed to pay certain rentals therefor. It is recognized that rental payable by Airline to City for such areas is the equivalent of a commitment of payment by Airline of a minimum amount of Flight Fees under this Agreement, as provided in Section 4.02 of such Lease of Terminal Facilities. Accordingly, notwithstanding any other provision of this Agreement, any amount payable by Airline to City, pursuant to Section 4.02 of such Lease of Terminal Facilities, as rental for any calendar month for passenger ramp areas at the Airport leased to Airline shall be applied against the amount of Flight Fees otherwise payable by Airline to City hereunder for fee landings at the Airport of aircraft operated by Airline during the same calendar month or during any subsequent calendar month in the same fiscal year, and any amount of such rental so applied shall, to the extent so applied, be deemed the payment by Airline to City of a like amount of Flight Fees hereunder.

At the end of each fiscal year, and prior to the computation of any Flight Fee deficiency for such fiscal year as provided by Section 2.03 hereof, to the extent that the sum of

(a) Flight Fees payable by Airline for fee landings at the Airport during such fiscal year against which rentals for such passenger ramp areas have not been applied, and

(b) Rentals payable by Airline for such fiscal year for such passenger ramp areas, exceed the higher of total Flight Fees payable by Airline for fee landings at the Airport during such fiscal year, or the total rentals payable by Airline for such fiscal year for such passenger ramp areas, then the excess shall be available to Airline for application by it against any amount payable by Airline to City under this Agreement during the following fiscal year.

ARTICLE V

TERM OF AGREEMENT

SECTION 5.01. *Term.* The term of this Agreement shall be for a period of forty (40) years commencing on the date set forth in the first line of this Agreement.

SECTION 5.02. *Covenant to use Airport.* Airline covenants and agrees with City that subject to such orders, rules and regulations as may be promulgated from time to time by the Federal Government or any agency thereof, it will during each fiscal year any Approved Revenue Bonds are outstanding, use the Airport and provide for fee landings of its aircraft at the Airport; provided, however, that if Airline does not now have terminal building space at the Airport, the above covenant shall be applicable to Airline from and after such time as adequate terminal building space (or adequate cargo building space, if Airline is not certificated as a scheduled passenger carrier) is made available to it at the Airport.

ARTICLE VI

CONSTRUCTION, MAINTENANCE AND REPAIR BY AIRLINE

SECTION 6.01. *Construction, maintenance and repair by Airline.* Airline may either alone, or jointly with any one or more other Airline Parties, construct or install such communication, meteorological and aerial navigation equipment as may be reasonably necessary or convenient to the conduct by Airline of air transportation, and such conduits, pits, covered trenches, ducts and other facilities, as may be reasonably necessary or convenient for power, light and communication purposes or for use in connection with the handling and servicing of aircraft, all as may be approved by the Commissioner of Aviation.

All such construction or installation by Airline shall be made in accordance with applicable laws and ordinances and after obtaining any requisite building or construction licenses or permits. Plans and specifications of any such proposed construction or installation (including any substantial alteration or addition thereto) shall be submitted to and receive the approval of the Commissioner of Public Works prior to the commencement of construction or installation. Any structures, facilities and additions so constructed or installed by Airline shall be kept and maintained by it in good condition and repair. No restrictions, however, shall be placed upon Airline as to the architects, builders or contractors who may be employed by it in connection with any construction, installation, alteration, repair or maintenance of any such structures, facilities or additions.

SECTION 6.02. *Performance by City upon failure of Airline to maintain.* In the event Airline fails to perform for a period of thirty (30) days after notice from City so to do, any obligation required by this Article VI to be performed by Airline, City may do all things necessary to perform such obligation, charging the cost and expense thereof to Airline, and Airline agrees to pay City all such costs and expenses in addition to any other amounts payable by Airline hereunder; provided, however, that if Airline's failure to perform any such obligation endangers the safety of the public or of employees of City, and City so states in its notice to Airline, City may perform such obligation of Airline at any time after giving of such notice and charge to Airline, and Airline shall pay, as aforesaid, the cost and expense of said performance.

ARTICLE VII

MAINTENANCE AND OPERATION BY CITY

SECTION 7.01. *Maintenance and operation of Airport.* City shall operate, maintain and keep in good repair the areas and facilities described in Article I hereof, excepting any structures or facilities constructed or installed by Airline pursuant to Article VI hereof. City shall keep the Airport free from obstruction, including the removal of snow, vegetation, stones and other foreign matter, as reasonably as may be done, from landing, take-off, public ramp, and public parking areas.

City shall operate and maintain the Airport in all respects in a manner consistent with that of a reasonably prudent operator of an airport and in accordance with standards and ratings for airports of similar size and character issued by the Civil Aeronautics Administration and with the rules and regulations of the Civil Aeronautics Administration and any other governmental agency having jurisdiction thereof. City shall operate the Airport in a manner so as to produce, subject to the provisions of this Agreement, revenues from the Airport of a nature and amount which would be produced by a reasonably prudent operator of an airport.

In the event any operator selected by City for the purpose of providing transportation service to and from the Airport of passengers and their baggage shall not furnish such transportation in a satisfactory and efficient manner, City shall, upon request of the Airlines Representative, use its best efforts to correct such situation, including, if required, the selection of another operator if City has authority to do so under the terms of the applicable concession agreement, to the end that such transportation service is performed in a satisfactory and efficient manner.

City shall supply adequate lighting for the Airport, including adequate landing lights, floodlights, beacons and other field lighting.

City shall use its best efforts to keep the Airport open and in operation for landings and take-offs of aircraft of any type using facilities similar to those at the Airport.

City shall maintain order at the Airport.

Section 7.02. *Enjoyment of Rights and Privileges.* City agrees that Airline, performing its obligations hereunder, shall be entitled to and shall have the enjoyment of the rights and privileges granted to it hereunder, subject to the provisions hereof.

Section 7.03. *Performance by Airline upon failure of City to maintain and operate.* In the event City fails to perform, for a period of thirty (30) days after notice from Airline so to do, any obligation required by this Article VII to be performed by City, Airline may perform, by itself or jointly with any other Airline Parties, such obligation of City and bill City for the cost to Airline of such performance, but Airline shall not deduct any such cost from any amounts due hereunder or under any other agreement between Airline and City relating to the Airport unless at the time there are no Approved Revenue Bonds outstanding; provided, however, that if City's failure to perform any such obligation endangers the safety of Airline's operation at the Airport and Airline so states in its notice to City, Airline may perform, by itself or jointly with any other Airline Parties, such obligation of City at any time after the giving of such notice and bill City for its cost of such performance, but Airline shall not deduct any such cost from any amounts due hereunder or under any other agreement between Airline and City relating to the Airport unless at the time there are no Approved Revenue Bonds outstanding. City, however, shall not be liable to Airline for any loss of revenues to Airline resulting from any of City's acts, omissions or neglect in the maintenance and operation or otherwise by it of the Airport or any facilities now or hereafter connected therewith.

ARTICLE VIII

Rules and Regulations

Airline shall observe and obey all rules and regulations governing the conduct and operation of the Airport, promulgated from time to time by City, which are reasonably required for the prudent and efficient operation of the Airport and are not inconsistent with the reasonable exercise by Airline of any right or privilege granted to it hereunder or under any other agreement between Airline and City relating to the Airport or any part thereof, nor inconsistent with safety nor with the rules and regulations of any Federal or State agency having jurisdiction with respect thereto, nor inconsistent with the procedures prescribed or approved from time to time by the Civil Aeronautics Administration or any other governmental authority having jurisdiction over flight operations at the Airport.

City shall keep Airline supplied with five (5) sets of City's current Airport rules and regulations applicable to Airline. Except in cases of emergency, no such rule or regulation shall be applicable to Airline unless it has been given fifteen (15) days notice of the adoption thereof.

City, however, shall have no control over the rates, fares or charges that Airline may prescribe in connection with its conduct of an air transportation business.

ARTICLE IX

EXERCISE BY CITY OF GOVERNMENTAL FUNCTIONS

Nothing contained herein shall impair the right of City in the exercise of its governmental functions to require Airline to pay any tax or inspection fees or to procure necessary permits or licenses, provided such requirement is not inconsistent with the rights and privileges granted to Airline hereunder.

Nothing contained herein shall be deemed to be the grant of any franchise, license, permit or consent to Airline to operate motor coaches, buses, taxicabs or other vehicles carrying passengers or property for hire or other consideration over the public ways to and from the Airport.

ARTICLE X

INDEMNITY AND INSURANCE

Airline agrees to indemnify and hold City harmless from and against all liabilities, judgments, costs, damages and expenses which may accrue against, be charged to or recovered from City by reason or on account of damage to the property of City or the property of, injury to or death of any person, arising from Airline's use and occupancy of and operations at the Airport, including acts of its agents, contractors and subcontractors, except when caused by City's sole negligence or by the joint negligence of City and any person other than Airline, its agents, contractors and subcontractors; provided that City shall give Airline prompt and timely notice of any claim made or suit instituted which, in any way, affects Airline or its insurer, and Airline or its insurer shall have the right to compromise and defend the same to the extent of their own interests. Any final judgment rendered against City for any cause for which Airline is liable hereunder shall be conclusive against Airline as to liability and amount.

Airline shall, at its own expense, keep in force insurance of the following types and in not less than the following amounts, issued by a company or companies of sound and adequate financial responsibility, insuring Airline and City against all liabilities for accidents arising out of or in connection with Airline's use and occupancy of and operations at the Airport, except when caused by City's negligence alone or jointly with any person other than Airline, its agents, contractors and subcontractors, and shall furnish to City certificates evidencing such insurance, naming City as an additional assured thereunder, subject to the limitations set forth above in respect of City's negligence, to-wit:

Aircraft Public Liability Insurance	$ 100,000	per person
	$1,000,000	per accident
Aircraft Property Damage Insurance	$ 200,000	per accident
Comprehensive Public Liability Insurance	$ 100,000	per person
	$ 250,000	per accident
Comprehensive Property Damage Insurance	$ 100,000	per accident

If pursuant to any other agreement between Airline and City, Airline is complying with requirements identical with those of this Section, such compliance shall also serve as compliance with the requirements of this Section.

ARTICLE XI

Books, Records and Reports

City shall follow such procedures and keep and maintain such books, records and accounts as may be necessary or appropriate, in accordance with generally accepted sound accounting practices and principles, for the purpose of determining all capital expenditures, expenses and revenues properly allocable to the Airport for each fiscal year. All items affecting the computation of the Flight Fee or any Flight Fee deficiency payable by Airline for any period, and the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport, shall be recorded and reflected by City, in accordance with generally accepted sound accounting practices and principles, in such books, records and acounts.

City shall furnish to Airline, within four (4) months after the close of each fiscal year, beginning with the year 1958, a copy of an annual audit report, prepared in accordance with generally accepted sound accounting practices and principles and certified by a firm of independent certified public accountants of recognized standing, covering the operation by City of the Airport for such year. Such annual audit report shall contain, among other things, a statement of the aggregate approved maximum landing weight of all aircraft operated by each Airline Party, shown separately by name and by all Airline Parties in the aggregate, which were landed in fee landings at the Airport during such year; it shall also disclose the amount of the Flight Fee deficiency (if any) payable by each Airline Party and the basis of computation thereof; also, in respect of any year in which no Approved Revenue Bonds are outstanding, it shall contain a separate statement of the items affecting computation of the Flight Fee.

City shall advise the Airlines Representative, as early as practicable, of any capital expenditures (other than those included in the plans and specifications on file in the office of the City Clerk and approved by the Revenue Bond Ordinance) proposed to be made by City at or adjacent to the Airport, which involve an estimated cost to City of more than Fifty Thousand Dollars ($50,000). City shall furnish to such Representative, and any persons designated by him, all relevant information concerning such proposed capital expenditures, and City shall give due consideration to any suggestions made by such Representative, or any persons designated by him, with respect to such proposed capital expenditures and the cost, character and desirability thereof.

At least twenty (20) days before any concession arrangement is entered into between City and any concessionaire with respect to the use of any space or facilities at the Airport, City shall advise the Airlines Representative of the proposed concession arrangement and furnish to such Representative, and any persons designated by him, all relevant information concerning such proposed concession arrangement. The Commissioner of Aviation shall give due consideration to any suggestions made by such Representative, or any persons designated by him, with respect to such proposed concession arrangement.

City agrees that it will not, during the term of this Agreement, either lease or otherwise permit the use of any space, area or facility in any terminal building or otherwise upon the Airport, by way of a concession or otherwise, to any individual, partnership or corporation engaged in business as a travel agent or travel bureau for the purpose of selling, furnishing or delivering tickets available from any Airline Party for transportation by air.

City shall, prior to any appointment by it after the date hereof of an Airport Consultant or Consulting Engineer, consult with the Airlines Representative concerning such appointment and will give due consideration to any suggestions made by such Representative concerning such appointment.

Airline shall maintain at its office in Chicago, Illinois or at the Airport, books, records and accounts in connection with or having a bearing upon the determination of any Flight Fee payable by it, or if such books, records and accounts are not maintained at such office, it shall promptly furnish the Commissioner of Aviation and the City Comptroller with all information reasonably requested by them with respect to such books, records and accounts. The Commissioner of Aviation and the City Comptroller, and such persons as may be designated by them, shall have the right, at all reasonable times, to examine, make copies of, and take extracts from such books, records and accounts. The Airlines Representative, and such persons as may be designated by him, shall have the right, at all reasonable times, to examine, make copies of, and take extracts from, the books, records and accounts of City in connection with or having any bearing upon the determination of any Flight Fee payable by Airline Parties or any Flight Fee deficiency payable by any of them pursuant to Section 2.03 hereof.

ARTICLE XII

TERMINATION BY CITY

City may terminate this Agreement by giving Airline sixty (60) days advance notice upon or after the happening and during the continuance of any one of the following events:

(a) The filing by Airline of a voluntary petition in bankruptcy. In such event, City shall have the right to file a claim as a creditor and the amounts due and to become due, under the terms of this Agreement, shall be accelerated and become due and payable.

(b) The institution of proceedings in bankruptcy against Airline and the final adjudication of Airline as a bankrupt pursuant to such proceedings.

(c) The taking by a court of competent jurisdiction for a period of sixty (60) days of all or substantially all of Airline's assets pursuant to proceedings brought under the provisions of any Federal reorganization act.

(d) The appointment of a receiver of all or substantially all of Airline's assets and Airline's failure to vacate such appointment within sixty (60) days thereafter.

(e) The assignment by Airline of its assets for the benefit of its creditors.

(f) The abandonment by Airline of its conduct of air transportation at the Airport.

(g) The default by Airline in the performance of any covenant or agreement required to be performed by Airline herein and the failure of Airline to remedy such default, or to take prompt action to remedy such default, within a period of sixty (60) days after receipt from City of notice to remedy the same.

No waiver of City of default of any of the terms, covenants or conditions hereof to be performed, kept and observed by Airline shall be construed to be or act as a waiver of any subsequent default of any of such terms, covenants and conditions.

ARTICLE XIII

TERMINATION BY AIRLINE

After but only after the payment and retirement of all Approved Revenue Bonds, Airline may terminate this Agreement and any or all of its obligations hereunder at any time that Airline is not in default in the payment of any amount due from it to City hereunder by giving City sixty (60) days advance notice upon or after the happening and during the continuance of any one of the following events:

(a) The failure or refusal of the Civil Aeronautics Administration to approve all weather operations into and from the Airport of aircraft of any type operated by Airline in scheduled air transportation using facilities similar to those at the Airport and continuance thereof for a period of at least sixty (60) days.

(b) The issuance by any court of competent jurisdiction of an injunction in any way preventing or restraining the use of the Airport or any part thereof so as to substantially affect Airline's use of the Airport in its conduct of an air transportation system and the remaining in force of such injunction, not stayed by way of appeal or otherwise, for a period of at least sixty (60) days.

(c) The issuance of any order, rule or regulation or the taking of any action by the Civil Aeronautics Board or the Civil Aeronautics Administration or other competent government authority, or the occurrence of any fire, other casualty, act of God or the public enemy, substantially affecting, for a period of at least sixty (60) days, Airline's use of the Airport in its conduct of an air transportation system; provided, however, that none of the foregoing is due to any fault of Airline.

(d) The default by City in the performance of any covenant or agreement required to be performed by City herein or in any other agreement between City and Airline relating to the Airport or any part thereof, and the failure of City to remedy such default, or to take prompt action to remedy such default, within a period of sixty (60) days after receipt from Airline of notice to remedy the same.

(e) The substantial restriction of City's operation of the Airport by action of the Federal Government, or any department or agency thereof, under its wartime or emergency powers, or by action of the State of Illinois, or any department or agency thereof, and continuance thereof for a period of not less than sixty (60) days, provided such restriction adversely affects Airline's operations at the Airport.

Upon the exercise of this right of termination, all agreements and leases entered into between Airline and City relating to this Airport shall likewise stand terminated.

No waiver by Airline of default of any of the terms, covenants or conditions hereof, or of any other agreement between City and Airline relating to the Airport or any part thereof, to be performed, kept and observed by City shall be construed to be or act as a waiver of any subsequent default of any of such terms, covenants and conditions.

ARTICLE XIV

RIGHT OF AIRLINE TO REMOVE PROPERTY

Airline shall be entitled during the term of this Agreement and for a reasonable time after its termination, not to exceed forty-five (45) days, to remove from the Airport, or any part thereof, all aircraft, trade fixtures, tools, machinery, equipment, materials and supplies placed thereon by it pursuant to this Agreement, subject, however, to any valid lien which City may have thereon for unpaid fees or other amounts, payable by Airline to City hereunder or under any other agreement between City and Airline relating to the Airport or any part thereof, and provided that Airline shall repair all damage resulting from such removal.

ARTICLE XV

DEFINITIONS

The following terms, when used in this Agreement, shall have the following meanings:

SECTION 15.01. *Revenue Bond Ordinance.* "Revenue Bond Ordinance" shall mean the Ordinance entitled "Ordinance authorizing the issuance of Chicago-O'Hare International Airport Revenue Bonds Series of 1959 for the purpose of improving and extending said Airport and providing for payment of principal of and interest on said bonds", adopted the 29th day of December, 1958.

SECTION 15.02. *Approved Revenue Bonds.* "Approved Revenue Bonds" shall mean (a) the principal amount of Bonds to be issued pursuant to the provisions of Section 2.02 of the Revenue Bond Ordinance, (b) any additional Bonds which may be issued pursuant to the provisions of Section 2.15 of the Revenue Bond Ordinance to pay the cost of completing improvements as referred to therein, and (c) any additional Bonds which may be issued pursuant to the provisions of Section 2.16 of the Revenue Bond Ordinance for the purpose of constructing additional improvements and extensions referred to therein, if and only if the terms and provisions of such additional Bonds issued under said Section 2.16 and of the Supplemental Ordinance or Ordinances of City authorizing their issue shall have been approved by the Airlines Representative.

SECTION 15.03. *Airport Consultant.* "Airport Consultant" shall mean the Airport Consultant acting as such under the Revenue Bond Ordinance.

SECTION 15.04. *Consulting Engineer.* "Consulting Engineer" shall mean the Consulting Engineer acting as such under the Revenue Bond Ordinance.

SECTION 15.05. *Fiscal Year.* "Fiscal year" means the fiscal year of City commencing January 1 and ending December 31.

SECTION 15.06. *Approved maximum landing weight.* The "approved maximum landing weight" of any aircraft shall mean the maximum landing weight approved by the Civil Aeronautics Administration for landing such aircraft at the Airport.

SECTION 15.07. *Definitions of Airport Expense and Flight Fee Revenue Requirements applicable when any Approved Revenue Bonds are outstanding.*

(1) *Airport Expense.* The "Airport Expense" for any fiscal year during which any Approved Revenue Bonds are outstanding shall mean the following expenses (without duplication of items) properly allocable to such fiscal year in connection with the Airport, and only the Airport, all as determined in accordance with generally accepted sound accounting practices and principles, subject to the specific requirements hereinafter set forth:

(a) Operation and Maintenance Expenses for such fiscal year as defined in the Revenue Bond Ordinance;

(b) depreciation on depreciable assets, and amortization in respect of engineering costs deferred, now or hereafter acquired with funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds or amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance) to the extent of the City's investment therein; such depreciation shall be taken on a straight line basis, at a rate designed to amortize the City investment in such depreciable assets over their estimated useful life;

(c) interest on funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds, or amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance) now or hereafter invested in whole or in part in capital expenditures, including engineering fees, acquisition of land and costs of removal of railroads, relocation of highways, land clearance and construction work, which interest shall be computed as follows:

(i) interest allocable to any fiscal year on such funds invested in non-depreciable assets shall be computed on the City's average investment in such assets;

(f) premiums paid on July 1 of such fiscal year and January 1 of the succeeding fiscal year on the redemption of Approved Revenue Bonds and premiums paid on such Bonds purchased during such fiscal year in the open market or by tender.

(2) *Flight Fee Revenue Requirements.* The "Flight Fee Revenue Requirements" for any fiscal year during which any Approved Revenue Bonds are outstanding shall mean the excess of Airport Expense for such year over the Revenues (exclusive of all Flight Fees payable for such fiscal year by Airline Parties by reason of fee landings or by application of rentals for passenger ramp areas leased to any Airline Parties as payment on account thereof) for such year under the Revenue Bond Ordinance. Such Revenues shall include, without limitation, any amount of deferred income allocable to such year by reason of the provisions of Section 5.03(2) Sixth of the Revenue Bond Ordinance.

SECTION 15.08. *Definitions of Airport Expense, Net Airport Expense and Adjusted Net Airport Expense when no Approved Revenue Bonds are outstanding.*

(1) *Airport Expense.* The "Airport Expense" for any fiscal year during which no Approved Revenue Bonds are outstanding shall mean all expenses incurred by City in the operation and maintenance of the Airport, and only the Airport, which are properly allocable to such year, all as determined in accordance with generally accepted sound accounting practices and principles, subject to the specific requirements hereinafter set forth. Such expenses include, without limitation, expenses incurred by City for the following items (without duplication of items) in connection with the Airport and properly allocable as aforesaid:

(a) direct labor and salaries, including fringe benefits such as provisions for holiday and vacation pay, workmen's compensation, pension benefits, hospital insurance and such other benefits as are or may be included therein from time to time;

(b) services by contract;

(c) services by independent accountants, auditors, consultants and engineers;

(j) depreciation on depreciable assets, and amortization in respect of engineering costs deferred, now or hereafter acquired with funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds, or amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance, and funds from the Improvement Account referred to in Section 16.04 hereof or the Deferred Maintenance Account referred to in Section 16.05 hereof) to the extent of the City's investment therein; such depreciation shall be computed as follows:

(i) depreciation shall be taken on a straight line basis, at a rate designed to amortize the City investment in such depreciable assets over their estimated useful life; and

(ii) expenditures for periodic maintenance having a useful life of more than one year shall be considered to be capital expenditures for depreciable assets, unless such expenditures are relatively minor in amount; and

(k) interest on funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds, amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance and funds from the Improvement Account referred to in Section 16.04 hereof or the Deferred Maintenance Account referred to in Section 16.05 hereof) now or hereafter invested in whole or in part in capital expenditures, including engineering fees, acquisition of land and costs of removal of railroads, relocation of highways, land clearance and construction work, which interest shall be computed as follows:

(i) interest allocable to any fiscal year on such funds invested in non-depreciable assets shall be computed on the City's average investment in such assets;

(ii) interest allocable to any fiscal year on such funds invested in depreciable assets shall be computed on the depreciated City investment in such assets at the beginning of such fiscal year;

(iii) interest on such funds actually borrowed by City for airport purposes shall be computed at the effective rate payable under such borrowing to the extent such borrowing remains outstanding; and

(iv) interest on other funds of City shall be computed at the weighted average effective rate payable by City on its general obligation bonds outstanding on January 2nd of such fiscal year; and

(l) The sum to be deposited in such fiscal year in the Deferred Maintenance Account referred to in Section 16.05 hereof which shall be the lesser of (1) Six Hundred Thousand Dollars ($600,000), or (2) the sum which will cause the accumulated balance to the credit of such Account at the end of such fiscal year to equal Two Million Five Hundred Thousand Dollars ($2,500,000); provided, however, no amount shall be included pursuant to the provisions of this subparagraph (l) in Airport Expense for the fiscal year commencing January 1, 1998.

"Airport Expense" shall not include in any such year any expense or expenditure (or any related interest or depreciation) which is of a nature or amount which would not have been incurred by a reasonably prudent operator of an airport. City investment in respect of any assets shall not be increased by reason of the receipt or use by City of any proceeds of insurance on account of damage to or destruction of any property.

(2) *Net Airport Expense.* The "Net Airport Expense" for any fiscal year during which no Approved Revenue Bonds are outstanding shall mean the Airport Expense for such year, minus the aggregate of all revenues of City (other than Flight Fees payable for such year by Airline Parties) and other credits properly allocable to such year and to the Airport, all as determined in accordance with generally accepted sound accounting practices and principles, subject to the specific requirements hereinafter set forth. Such revenues and credits allocable to any year include, without limitation, the following (without duplication of items):

(a) fees in connection with each fee landing at the Airport during such year, computed at the Flight Fee rate then currently in effect under this Agreement, of aircraft other than aircraft operated by any Airline Party, except that in the event a lesser rate shall have been established by City in accordance with Section 17.01 hereof for non-commercial private aircraft, such fees shall be computed at such lesser rate as to such aircraft;

(b) fees, in such amount as is determined by City, payable to City in connection with each landing at the Airport during such year of helicopter aircraft operated in local service between the Airport and any point within a radius of fifty (50) miles from the Airport;

(c) lease rentals and payments for utilities for all areas included in the Airport;

(d) all revenues from fixed base operators at the Airport;

(e) all revenues from all other concessionaires of every character and description whatsoever, including, without limitation, automobile parking, ground transportation, insurance, restaurant, food, beverage, newsstand and merchandise concessionaires; and

(f) all other revenues (other than Flight Fees payable for such year by Airline Parties) from the Airport.

(3) *Adjusted Net Airport Expense.* The "Adjusted Net Airport Expense" for any fiscal year during which no Approved Revenue Bonds are outstanding shall mean the Net Airport Expense for such year,

(a) plus any excess of (i) the aggregate of Net Airport Expense for such fiscal year and for all prior fiscal years after the date of this Agreement in which no Approved Revenue Bonds were outstanding (and in case of the retirement of all Approved Revenue Bonds on January 1 of any year, then also including the next preceding fiscal year) plus any sums deposited for such fiscal years in the Improvement Account pursuant to the provisions of Section 16.04 hereof over (ii) the aggregate Flight Fees payable in connection with all fee landings at the Airport during such years of all aircraft operated by all Airline Parties at the time involved, or

(b) minus any excess of (i) the aggregate Flight Fees payable in connection with all such fee landings at the Airport during such year and all prior fiscal years after the date of this Agreement during which no Approved Revenue Bonds were outstanding (and in case of the retirement of all Approved Revenue Bonds on January 1 of any year, then also including the next preceding fiscal year) over (ii) the aggregate of Net Airport Expense for such years plus any sums deposited for such fiscal years in the Improvement Account pursuant to the provisions of Section 16.04 hereof.

Anything herein to the contrary notwithstanding, in the event that the Flight Fee hereunder for any twelve-month period (or for any portion of a twelve-month period) commencing July 1 during which no Approved Revenue Bonds are outstanding is based upon the Adjusted Net Airport Expense for a preceding fiscal year during which Approved Revenue Bonds were outstanding, the Airport Expense, Net Airport Expense and Adjusted Net Airport Expense for such preceding fiscal year shall be computed in the manner herein provided for a fiscal year during which no Approved Revenue Bonds are outstanding with, however, appropriate adjustments, in accordance with generally accepted sound accounting practices and principles, to Net Airport Expense and Adjusted Net Airport Expense to reflect any changes in revenues which will occur by reason of retirement of all Approved Revenue Bonds and to Adjusted Net Airport Expense to reflect any surplus or deficiency resulting from the operations of the Airport and not applied to the retirement of Approved Revenue Bonds.

SECTION 15.09. *Government Grants in Aid.* "Government Grants in Aid" shall mean funds obtained by City, otherwise than by borrowing, and property acquired by City, otherwise than by purchase, from the United States Government or any department or agency thereof, or from the State of Illinois or any department, agency or subdivision thereof other than City.

SECTION 15.10. *Airline Parties.* "Airline Parties" shall mean at any time those air carriers who then have agreements with City, substantially the same as this Agreement, except as to any difference in the length of term thereof, under which they agree to pay to City, in connection with each fee landing at the Airport of aircraft operated by them, Flight Fees on the basis and in the manner provided in this Agreement and who are either

(a) scheduled air carriers holding certificates of public convenience and necessity issued by the Civil Aeronautics Board,

(b) foreign air carriers holding foreign air carrier permits issued by the Civil Aeronautics Board, or

(c) air carriers holding certificates of convenience and necessity issued by the Illinois Commerce Commission (or any successor thereto).

SECTION 15.11. *Majority in Interest of Airline Parties.* The "Majority in Interest of Airline Parties" shall mean at any time the then Airline Parties who (a) constitute at least one-half of all then Airline Parties and (b) operated aircraft landed in fee landings at the Airport during the next preceding fiscal year having an aggregate approved maximum landing weight representing over fifty per cent (50%) of the aggregate approved maximum landing weight of all aircraft, landed in fee landings at the Airport during such year, operated by all Airline Parties at the time of determination.

SECTION 15.12. *Airlines Representative.* The "Airlines Representative" at any time shall mean such person (and such alternates, in such order) then designated by a Majority in Interest of Airline Parties by notice to the Commissioner of Aviation. Any such designation of such Representative shall remain in full force and effect until revoked or modified by a Majority in Interest of Airline Parties by notice to the Commissioner of Aviation.

SECTION 15.13. *Commissioner of Public Works.* The "Commissioner of Public Works" shall be concerned with construction at the Airport and shall mean for the purpose of this Agreement the Commissioner of Public Works of City (or any successor thereto in whole or in part as to his duties hereunder) and his duly authorized assistants.

SECTION 15.14. *Civil Aeronautics Administration, Civil Aeronautics Board.* The "Civil Aeronautics Administration" and the "Civil Aeronautics Board" shall each include any successor thereto.

SECTION 15.15. *Commissioner of Aviation.* The "Commissioner of Aviation" shall be concerned with the operation and maintenance of the Airport and shall mean for the purpose of this Agreement the Commissioner of Aviation of City (or any successor thereto in whole or in part as to his duties hereunder) and his duly authorized assistants.

ARTICLE XVI

SPECIAL PROVISIONS

SECTION 16.01. *Emergency Reserve Account.* All moneys remaining in the Emergency Reserve Account created by the Revenue Bond Ordinance after the payment of all Bonds issued under the Revenue Bond Ordinance shall be paid to City to be deposited in its corporate fund.

SECTION 16.02. *Cancellation of prior Airport Use Agreement.* The existing Airport Use Agreement, dated the 28th day of October, 1955, is hereby cancelled and terminated, without, however, affecting any accrued rights or obligations thereunder.

SECTION 16.03. *Effective date of Agreement.* An executed copy of this Agreement will be deposited in escrow with The First National Bank of Chicago, as Escrowee, pursuant to an Escrow Agreement between, among others, City, Airline and such Escrowee. This Agreement shall become effective only when and if delivered uncancelled to City pursuant to the provisions of such Escrow Agreement.

SECTION 16.04. *Improvement Account.* If at any time during any fiscal year when a minimum Flight Fee is in effect in connection with fee landings at the Airport of aircraft operated by Airline Parties at the time involved, no Bonds issued under the Revenue Bond Ordinance or any ordinance supplemental thereto shall be outstanding, then City shall set aside in a special account referred to as the "Improvement Account" any excess of the aggregate of such minimum Flight Fees over the aggregate amount of Flight Fees which would have been payable by Airline Parties if no minimum Flight Fee were in effect.

Moneys set aside in the Improvement Account during the term of this Agreement shall be deposited by City in trust with a Depositary to be used, not only during the term of this Agreement but also thereafter, solely for the purpose of making capital expenditures at the Airport approved, as evidenced by his certificate, by an engineer, selected by City, having the qualifications provided in the Revenue Bond Ordinance for the Consulting Engineer thereunder. All moneys paid into the Improvement Account shall be disbursed by warrants on the City Treasurer signed by the Mayor and countersigned by the City Comptroller and accompanied by a statement of the Commissioner of Public Works, and also of such engineer, that each item covered thereby is a proper charge in a reasonable amount against the Improvement Account. The Depositary shall be a banking association or trust company, having a combined capital and surplus of not less than Ten Million Dollars ($10,000,000), selected by City.

SECTION 16.05. *Deferred Maintenance Account.* Funds shall be transferred to City, upon retirement of all Bonds issued under the Revenue Bond Ordinance or any ordinance supplemental thereto, from the Reserve Maintenance Account provided for by Section 5.03 (2) Fourth of the Revenue Bond Ordinance to a special account herein referred to as the "Deferred Maintenance Account." Any amount included for any fiscal year during which no Approved Revenue Bonds are outstanding in Airport Expense, pursuant to paragraph (l) of Section 15.08(1) hereof, shall be set aside by City in the Deferred Maintenance Account.

Money set aside in the Deferred Maintenance Account during the term of this Agreement shall be deposited by City in trust with a Depositary (a) to be used, during the period ending thirty-nine (39) years from the date set forth on the first line of this Agreement, for the purpose of making repairs, renewals, replacements of the terminal buildings, landing areas, aprons and related facilities, equipment or otherwise at the Airport approved, as evidenced by his certificate, by an engineer selected by City, having the qualifications provided in the Revenue Bond Ordinance for the Consulting Engineer thereunder and (b) to the extent any moneys remaining on deposit in such Account at the end of such thirty-nine (39) year period, to be returned to City free of any trust. The Depositary shall be a banking association or trust company having a combined capital and surplus of not less than Ten Million Dollars ($10,000,000), selected by City. All moneys paid into the Deferred Maintenance Account and disbursed during such thirty-nine (39) year period shall be disbursed by warrants on the City Treasurer, signed by the Mayor and countersigned by the City Comptroller and accompanied by a statement from the Commissioner of Public Works, and also of such engineer, that each item covered thereby is a proper charge in a reasonable amount against the Deferred Maintenance Account.

Notwithstanding any provision to the contrary contained in any lease between City and Airline, each Airline Party which at the end of such thirty-nine (39) year period is a lessee of any space or premises at the Airport under any lease from City then in effect, shall be entitled to apply against any rental, payable by such Airline Party to City under such lease during the next following twelve (12) month period, its proportionate share of any amount to be returned to City from the Deferred Maintenance Account as above provided. Such proportionate share of any such Airline Party shall be that portion of the aggregate amount to be returned to City as aforesaid which bears the same ratio to such aggregate amount as the total rentals payable by such Airline Party during such twelve (12) month period under such leases between it and City bear to the aggregate rentals payable by all such Airline Parties during such twelve (12) month period under such leases between them and City.

ARTICLE XVII

MISCELLANEOUS

SECTION 17.01. *Treatment of others.* City shall on and after January 1, 1959 charge the Flight Fee rate then currently in effect under this Agreement for each fee landing at the Airport of aircraft, no matter by whom operated, except that in the case of non-commercial private aircraft, City may establish and charge any other rate for all such aircraft, provided that said rate shall not be less than 30¢ (thirty cents) for each 1000 (one thousand) pounds of approved maximum landing weight of such aircraft. Subject to the foregoing, the areas and facilities described in Article I hereof shall be available, up to the capacity thereof, to any person, firm or corporation, without unjust or unreasonable discrimination, for landing and taking off by any aircraft.

City shall not hereafter grant to any air transportation company in competition with Airline any rights or privileges at the Airport of a character or on a basis more favorable to such company than those granted or available to Airline, and the effect of which is to place Airline at a competitive disadvantage.

SECTION 17.02. *Consents and approvals.* Consents and approvals by the Commissioner of Public Works, or the Commissioner of Aviation, as the case may be, shall be in writing and shall not be unreasonably withheld and shall be deemed to have been given unless within thirty (30) days after receipt of written request from Airline for such consent or approval, the Commissioner of Public Works, or the Commissioner of Aviation, as the case may be, shall have given Airline a written reply refusing or withholding action on such consent or approval and stating his reasons for such refusal or such withholding of action.

SECTION 17.05. *Assignment.* Airline shall not assign this Agreement and its rights hereunder, in whole, except with the prior consent of City, or in part, except with the prior consent of the Commissioner of Aviation; provided, however, the foregoing shall not prevent the assignment of this Agreement and of Airline's rights hereunder to any corporation into or with which Airline may merge or consolidate, or which may succeed to the business and assets of Airline.

SECTION 17.06. *Remedies cumulative.* The rights and remedies hereunder are cumulative and the use of one remedy shall not be taken to exclude or waive the right to the use of another.

SECTION 17.07. *Headings.* The Article and Section headings contained herein are for convenience of reference only and are not intended to define, limit or describe the scope or intent of any provision of this Agreement.

SECTION 17.08. *Successors and assigns.* All of the covenants, stipulations and agreements herein contained shall, subject to the provisions of Section 17.05 hereof, inure to the benefit of and be binding upon the successors and assigns of the parties hereto.

The contract price shall be similarly decreased if the Contractor, through his fault or negligence or his failure to follow instructions of the Contracting Officer, is required to pay or bear the burden of, or does not obtain a refund or drawback of, any such Federal excise tax or duty.

In connection with any appeal proceeding under this clause, the Contractor shall be afforded an opportunity to be heard and to offer evidence in support of its appeal. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

If any such change causes an increase or decrease in the cost of, or the time required for the performance of any part of the work under this contract, whether changed or not changed by any such order, an equitable adjustment shall be made in the contract price or delivery schedule, or both, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change, provided, however, that the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim assorted at any time prior to final payment under this contract. Where the cost of property made obsolete or excess as result of a change is included in the Contractor's claim for adjustment, the Contracting Officer shall have the right to prescribe the manner of disposition of such property. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes. However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed. (DOC MAR 72)

(b) Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the provisions of paragraph (a), the Contractor and any subcontractor responsible therefor shall be liable to any affected employee for his unpaid wages. In addition, such Contractor and subcontractor shall be liable to the United States for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer, mechanic, apprentice, trainee, watchman, or guard employed in violation of the provisions of paragraph (a) in the sum of $10 for each calendar day on which such employee was required or permitted to be employed on such work in excess of 8 hours or in excess of his standard workweek of 40 hours without payment of the overtime wages required by paragraph (a).

(c) Withholding for unpaid wages and liquidated damages. The Contracting Officer may withhold from the Government Prime Contractor, from any moneys payable on account of work performed by the Contractor or subcontractor, such sums as may administratively be determined to be necessary to satisfy any liabilities of such Contractor or subcontractor for unpaid wages and liquidated damages as provided in the provisions of paragraph (b).

(d) Subcontracts. The Contractor shall insert paragraphs (a) through (d) of this clause in all subcontracts, and shall require their inclusion in all subcontracts of any tier.

When costs are a factor in any determination of a contract price adjustment pursuant to the "Changes" clause or any other provision of this contract, such costs shall be in accordance with the contract cost principles and procedures in Part 1-15 of the Federal Procurement Regulations (41 CFR 1-15) in effect on the date of this contract.
(FPR 1-7.101-37)

5. TERMINATION FOR CONVENIENCE OF THE GOVERNMENT

(a). The performance of work under this contract may be terminated by the Government in accordance with this clause in whole, or from time to time in part, whenever the Contracting Officer shall determine that such termination is in the best interest of the Government. Any such termination shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance of work under the contract is terminated, and the date upon which such termination becomes effective.

(b) After receipt of a Notice of Termination, and except as otherwise directed by the Contracting Officer, the Contractor shall:

(1) Stop work under the contract on the date and to the extent specified in the Notice of Termination;.

(2) Place no further orders or subcontracts for materials, services, or facilities, except as may be necessary for completion of such portion of the work under the contract as is not terminated;

(3) Terminate all orders and subcontracts to the extent that they relate to the performance of work terminated by the Notice of Termination;

(4) Assign to the Government, in the manner, at the times, and to the extent directed by the Contracting Officer, all of the right, title, and interest of the Contractor under the orders and subcontracts so terminated, in which case the Government shall have the right, in its discretion, to settle or pay any or all claims arising out of the termination of such orders and subcontracts;

(5) Settle all outstanding liabilities and all claims arising out of such termination of orders and subcontracts, with the approval or ratification of the Contracting Officer, to the extent he may require, which approval or ratification shall be final for all the purposes of this clause;

(7) Complete performance of such part of the work as shall not have been terminated by the Notice of Termination.

(c) After receipt of a Notice of Termination, the Contractor shall submit to the Contracting Officer his termination claim, in the form and with certification prescribed by the Contracting Officer Such claim shall be submitted promptly, but in no event later than one year from the effective date of termination, unless one or more extensions in writing are granted by the Contracting Officer upon request of the Contractor made in writing within such one-year period or authorized extension thereof. However, if the Contracting Officer determines that the facts justify such action, he may receive and act upon any such termination claim at any time after such one-year period or any extension thereof. Upon failure of the Contractor to submit his termination claim within the time allowed, the Contracting Officer may, subject to any review required by the contracting agency's procedures in effect as of the date of execution of this contract, determine, on the basis of information available to him, the amount, if any, due to the Contractor by reason of the termination and shall thereupon pay to the Contractor the amount so determined.

(d) Subject to the provisions of paragraph (c), and subject to any review required by the contracting agency's procedures in effect as of the date of execution of this contract, the Contractor and the Contracting Officer may agree upon the whole or any part of the amount or amounts to be paid to the Contractor by reason of the total or partial termination of work pursuant to this clause, which amount or amounts may include a reasonable allowance for profit or adjustment for loss, on work done: Provided, That such agreed amount or amounts, exclusive of settlement costs, shall not exceed the total contract price as reduced by the amount of payments otherwise made and as further reduced by the contract price of work not terminated. The contract shall be amended accordingly, and the Contractor shall be paid the agreed amount. Nothing in paragraph (e) of this clause, prescribing the amount to be paid to the Contractor in the event of failure of the Contractor and the Contracting Officer to agree upon the whole amount to be paid to the Contractor by reason of the termination of work pursuant to this clause, shall be deemed to limit, restrict, or otherwise determine or affect the amount or amounts which may be agreed upon to be paid to the Contractor pursuant to this paragraph (d).

(e) In the event of the failure of the Contractor and the Contracting Officer to agree as provided in paragraph (d) upon the whole amount to be paid to the Contractor by reason of the termination of work pursuant to this clause, the Contracting Officer shall determine, on the basis of information available to him, the amount, if any, due to the Contractor by reason of the termination and shall pay to the Contractor the amounts determined as follows:

(1) The total of --

(i) The costs incurred in the performance of the work terminated, including initial costs and preparatory expense allocable thereto;

(ii) The cost of settling and paying claims arising out of the termination of work under subcontracts or orders, as provided in paragraph (b)(5) above, which are properly chargeable to the terminated portion of the contract (exclusive of amounts paid or payable on account of supplies or materials delivered or services furnished by subcontractors or vendors prior to the effective date of the Notice of Termination, which amounts shall be included in the costs payable under (i) above; and

(iii) A sum, as profit on (i) above, determined by the Contracting Officer pursuant to Subpart 1-8.303 of the Federal Procurement Regulations (41 CFR 1-8.303), in effect as of the date of execution of this contract, to be fair and reasonable: Provided, however, That if it appears that the Contractor would have sustained a loss on the entire contract had it been completed, no profit shall be included or allowed under this subdivision (iii) and an appropriate adjustment shall be made reducing the amount of the settlement to reflect the indicated rate of loss determined by the Contracting Officer pursuant to Subpart 1-8.303 of the Federal Procurement Regulations (41 CFR 1-8.303), in effect as of the date of execution of this contract; and

(2) The reasonable costs of settlement, including accounting, legal, clerical, and other expenses reasonably necessary for the preparation of settlement claims and supporting data with respect to the terminated portion of the contract and for the termination and settlement of subcontracts thereunder, together with reasonable storage, transportation, and other costs incurred in connection with the protection or disposition of property allocable to this contract.

The total sum to be paid to the Contractor under (1) of this paragraph (e) shall not exceed the total contract price as reduced by the amount of payments otherwise made and as further reduced by the contract price of work not terminated.

(f) Any determination of costs under paragraph (c) or (e) hereof shall be governed by the principles for consideration of costs set forth in Subpart 1-15.2 of the Federal Procurement Regulations (41 CFR 1-15.2) as in effect on the date of this contract.

(g) The Contractor shall have the right to appeal, under the clause of this contract entitled "Disputes," from any determination made by the Contracting Officer under paragraph (c) or (e) above, except that, if the Contractor has failed to submit his claim within the time provided in paragraph (c) above and has failed to request extension of such time, he shall have no such right of appeal. In any case where the Contracting Officer has made a determination of the amount due under paragraph (c) or (e) above, the Government shall pay to the Contractor the following: (1) if there is no right of appeal hereunder or if no timely appeal has been taken, the amount so determined by the Contracting Officer; or (2) if any appeal has been taken, the amount finally determined on such appeal.

(h) In arriving at the amount due the Contractor under this clause, there shall be deducted (1) all unliquidated advance or other payments on account theretofore made to the Contractor, applicable to the terminated portion of this contract; (2) any claim which the Government may have against the Contractor in connection with this contract; and (3) the agreed price for, or the proceeds of sale of, any materials, supplies, or other acquired by the Contractor or sold, pursuant to the provisions of this clause, and not otherwise recovered by or credited to the Government.

(i) If the termination hereunder be partial, prior to the settlement of the terminated portion of this contract, the Contractor may file with the Contracting Officer a request in writing for an equitable adjustment of the price or prices specified in the contract relating to the continued portion of the contract (the portion not terminated by the Notice of Termination), and such equitable adjustment as may be agreed upon shall be made in such price or prices.

(j) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments and payments on accounts against costs incurred by the Contractor in connection with the terminated portion of this contract whenever, in the opinion of the Contracting Officer, the aggregate of such payments shall be within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand, together with interest computed at the rate of 6% per annum for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Government: Provided, however, that no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of termination inventory until 10 days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

(k) Unless otherwise provided for in this contract, or by applicable statute, the Contractor, from the effective date of termination and for a period of three years after final settlement under this contract, shall preserve and make available to the Government at all reasonable times at the office of the Contractor, but without direct charge to the Government, all his books, records, documents, and other evidence bearing on the costs and expenses of the Contractor under this contract and relating to the work terminated hereunder, or, to the extent approved by the Contracting Officer, photographs, microphotographs, or other authentic reproduction thereof. (DOC MAR 72)

6. DEFAULT

(a) The Government may, subject to the provisions of paragraph (c) below, by written notice of default to the Contractor, terminate the whole or any part of this contract in any one of the following circumstances:

(1) If the Contractor fails to perform the services within the time specified herein or any extension thereof; or

(2) If the Contractor fails to perform any of the other provisions of this contract, or so fails to make progress as to endanger performance of this contract in accordance with its terms, and in either of these two circumstances does not cure such failure within a period of 10 days (or such longer period as the Contracting Officer may authorize in writing) after receipt of notice from the Contracting Officer specifying such failure.

(b) In the event the Government terminates this contract in whole or in part as provided in paragraph (a) of this clause, the Government may procure, upon such terms and in such manner as the Contracting Officer may deem appropriate, services similar to those so terminated, and the Contractor shall be liable to the Government for any excess costs for such similar services: Provided, That the Contractor shall continue the performance of this contract to the extent not terminated under the provisions of this clause.

(c) Except with respect to defaults of subcontractors, the Contractor shall not be liable for any excess costs if the failure to perform the contract arises out of causes beyond the control and without the fault or negligence of the Contractor. Such causes may include, but are not restricted to, acts of God or of the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather; but in every case the failure to perform must be beyond the control and without the fault or negligence of the Contractor. If the failure to perform is caused by the default of a subcontractor, and if such default arises out of causes beyond the control of both the Contractor and subcontractor, and without the fault or negligence of either of them, the Contractor shall not be liable for any excess costs for failure to perform, unless the services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery schedule or other performance requirements.

(d) If this contract is terminated as provided in paragraph (a) of this clause, the Government, in addition to any other rights provided in this clause, may require the Contractor to deliver to the Government, in the manner and to the extent directed by the Contracting Officer, any of the completed or partially completed "Subject Data" as defined in the Rights in Data clause. The Government shall pay the Contractor the contract price, if separately stated, for completed services accepted by the Government and the amount agreed upon by the Contractor and the Contracting Officer for (1) completed services for which no separate price is stated; (2) partially completed work; and (3) Subject Data described above which is accepted by the Government. Failure to agree to such amount shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes."

(e) If, after notice of termination of this contract under the provisions of this clause, it is determined for any reason that the Contractor was not in default under the provisions of this clause, or that the default was excusable under the provisions of this clause, the rights and obligations of the parties shall, if the contract contains a clause providing for termination for convenience of the Government, be the same as if the notice of termination had been issued pursuant to such clause. If, after notice of termination of this contract under the provisions of this clause, it is determined for any reason that the Contractor was not in default under the provisions of this clause, and if this contract does not contain a clause providing for termination for convenience of the Government, the contract shall be equitably adjusted to compensate for such termination and the contract modified accordingly; failure to agree to any such adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes..

(f) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

(g) As used in paragraph (c) of this clause, the terms "Subcontractor" and "Subcontractors" mean subcontractor(s) at any tier. (DOC MAR 72)

7. RENEGOTIATION

(a) To the extent required by law, this contract is subject to the Renegotiation Act of 1951 (50 USC App. 1211, et seq.) as amended, and to any subsequent act of Congress providing for the renegotiation of contracts. Nothing contained in this clause shall impose any renegotiation obligation with respect to this contract or any subcontract hereunder which is not imposed by an act of Congress heretofore or hereafter enacted. Subject to the foregoing this contract shall be deemed to contain all the provisions required by Section 104 of the Renegotiation Act of 1951, and by any such other act, without subsequent contract amendment specifically incorporating such provisions.

(b) The Contractor agrees to insert the provisions of this clause, including this paragraph (b) in all subcontracts, as that term is defined in Section 103 of the Renegotiation Act of 1951, as amended. (DOC MAR 72)

8. KEY PERSONNEL

(a) It has been determined that the individual(s) named in the schedule of this contract are necessary for the successful performance of this contract. No diversion or replacement of these individual(s) shall be made by the Contractor without the written consent of the Contracting Officer: Provided, that the Contracting Officer may ratify in writing such diversion or replacement and such ratification shall constitute the consent of the Contracting Officer required by this clause.

(b) The Contractor agrees that whenever for any reason, one or more of these individual(s) are unavailable for performance under this contract, the Contractor agrees to replace such individual(s) with an individual(s) of substantially equal abilities and qualifications. In this connection, the Contractor shall submit to the COTR, in duplicate, a resume giving the full name, title, date and place of birth, qualifications, experience, and salary history, for all successor or new personnel prior to assignment of such personnel to perform work under the contract, so that the Contracting Officer may, on the advice of the COTR, decide whether or not such successor meets the qualifications of the personnel to be diverted or replaced, or in the case of new personnel, whether or not they are qualified to perform work assigned, and advise the Contractor accordingly. (DOC MAR 72)

9. ACCESS TO RECORDS AND RIGHT TO AUDIT

The Contractor agrees that the Secretary of Commerce or his duly authorized representative shall, until the expiration of three years after final payment under this contract, or the time periods for the particular records specified in 41 CFR Part 1-20, whichever expires earlier, have access to and the right to examine any books, documents, papers, and records of the Contractor involving transactions related to this contract. The Contractor further agrees to require all subcontractors, if any, under this contract, to agree to the "Access to Records and Rights to Audit" clause as provided herein for subcontracts in excess of $2,500. (DOC MAR 72)

10. SAFETY AND ACCIDENT PREVENTION

When the contract involves the performance of any work on premises which are under the direct control of the Government, the Contractor shall (i) conform to all local safety rules and requirements as are in effect on the date of this contract, and (ii) take such additional precautions as the Contracting Officer may reasonably require for safety and accident prevention purposes. The Contractor agrees to take all reasonable steps and precautions to prevent and preserve the lives and health of Contractor and Government personnel performing or in any way coming in contact with the performance of this contract on such premises. Any violation of such rules and requirements, unless promptly corrected, shall be grounds for termination of the contract. (DOC MAR 72)

ADDENDUM TO GENERAL PROVISIONS

The following clauses are added to the General and Additional General Provisions of this contract and appear in this addendum in lieu of the location indicated on the provisions content page.

A. GENERAL PROVISIONS:

PAYMENT OF INTEREST ON CONTRACTORS' CLAIMS

(a) If an appeal is filed by the contractor from a final decision of the contracting officer under the disputes clause of this contract, denying a claim arising under the contract, simple interest on the amount of the claim finally determined owed by the Government shall be payable to the contractor. Such interest shall be at the rate determined by the Secretary of the Treasury pursuant to Public Law 92-41, 85 Stat. 97, from the date the contractor furnishes to the contracting officer his written appeal to the date of (1) a final judgment by a court of competent jurisdiction, or (2) mailing to the contractor of a supplemental agreement for execution either confirming completed negotiations between the parties or carrying out a decision of a board of contract appeals.

(b) Notwithstanding (a), above, (1) interest shall be applied only from the date payment was due, if such date is later than the filing of appeal, and (2) interest shall not be paid for any period of time that the contracting officer determines the contractor has unduly delayed in pursuing his remedies before a board of contract appeals or a court of competent jurisdiction. (FPR 1-1.322(b))

B. ADDITIONAL GENERAL PROVISIONS:

COST ACCOUNTING STANDARDS

(a) Unless the Cost Accounting Standards Board has prescribed rules or regulations exempting the Contractor or this contract from standards, (P.L.91-379, August 15, 1970), the Contractor, in connection with this contract shall:

(1) By submission of a Disclosure Statement, disclose in writing his cost accounting practices as required by regulations of the Cost Accounting Standards Board. The required disclosures must be made prior to contract award unless the Contracting Officer provides a written notice to the Contractor authorizing postaward submission in accordance with regulations of the Cost Accounting Standards Board. The practices disclosed for this contract shall be the same as the practices currently disclosed and applied on all other contracts and subcontracts being performed by the Contractor and which contain this Cost Accounting Standards clause. If the Contractor has marked the Disclosure Statement to indicate that it contains trade secrets and commercial or financial information which is privileged and confidential, the Disclosure Statement will be protected and will not be released outside of the Government.

(2) Follow consistently the cost accounting practices disclosed pursuant to (1), above, in accumulating and reporting contract performance cost data concerning this contract. If any change in disclosure practices is made for the purposes of any contract or subcontract subject to Cost Accounting Standards Board requirements, the change must be applied prospectively to this contract, and the Disclosure Statement must be amended accordingly. If the contract price or cost allowance of this contract is affected by such changes, adjustment shall be made in accordance with subparagraph (a)(4) or (a)(5), below, as appropriate.

(3) Comply with all Cost Accounting Standards in effect on the date of award of this contract or if the Contractor has submitted cost or pricing data, on the date of final agreement on price as shown on the Contractor's signed certificate of current cost or pricing data. The Contractor shall also comply with any Cost Accounting Standard which hereafter becomes applicable to a contract or subcontract of the Contractor. Such compliance shall be required prospectively from the date of applicability to such contract or subcontract.

(4) (A) Agree to an equitable adjustment as provided in the Changes clause of this contract if the contract cost is affected by a Disclosure Statement change which the Contractor is required to make pursuant to (3), above. If the Contractor has not been required to file a Disclosure Statement but is required pursuant to (a)(3), above, to change an established practice, then an equitable adjustment shall similarly be agreed to.

(B) Negotiate with the Contracting Officer to determine the terms and conditions under which any Disclosure Statement change other than changes under (4)(A), above, may be made. A change to a Disclosure Statement may be proposed by either the Government or the Contractor, provided, however, that no agreement may be made under this provision that will increase costs paid by the United States under this contract.

(5) Agree to an adjustment of the contract price or cost allowance, as appropriate, if he or a subcontractor fails to comply with an applicable Cost Accounting Standard or to follow any practice disclosed pursuant to subparagraphs (a)(2), above, and such failure results in any increased costs paid by the United States. Such adjustment shall provide for recovery of the increased costs to the United States together with interest thereon computed at the rate determined by the Secretary of the Treasury pursuant to P.L. 92-41, 85 Stat. 97, or 7 percent per annum, whichever is less, from the time the payment by the United States was made to the time the adjustment is effected.

(b) If the parties fail to agree whether the Contractor or subcontractor has complied with an applicable Cost Accounting Standard, rule, or regulation of the Cost Accounting Standards Board and as to any cost adjustment demanded by the United States, such failure to agree shall be a dispute concerning a question of fact within the meaning of the Disputes clause of this contract.

(c) The Contractor shall permit any authorized representatives of the head of the agency, the Cost Accounting Standards Board, or the Comptroller General of the United States to examine and make copies of any documents, papers, or records relating to compliance with the requirements of this clause.

(d) The Contractor shall include in all negotiated subcontracts which he enters into the substance of this clause except paragraph (b), and shall require such inclusion in all other subcontracts of any tier, except that this requirement shall apply only to negotiated subcontracts in excess of $100,000 where the price negotiated is not based on:

(i) Established catalog or market prices of commercial items sold in substantial quantities to the general public; or

(ii) Prices set by law or regulation.

NOTE:

1. Subcontractors shall be required to submit their Disclosure Statements to the Contractor. However, if a subcontractor has previously submitted his Disclosure Statement to a Government Contracting Officer he may satisfy that requirement by certifying to the Contractor the date of such Statement and the address of the Contracting Officer.

2. In any case where a subcontractor determines that the Disclosure Statement information is privileged and confidential and declines to provide it to his Contractor or higher tier subcontractor, the Contractor may authorize direct submission of that subcontractor's Disclosure Statement to the same Government offices to which the Contractor was required to make submission of his Disclosure Statement. Such authorization shall in no way relieve the Contractor of liability as provided in paragraph (a)(5) of this clause. In view of the foregoing and since the contract may be subject to adjustment under this clause by reason of any failure to comply with rules, regulations, and Standards of the Cost Accounting Standards Board in connection with covered subcontracts, it is expected that the Contractor may wish to include a clause in each such subcontract requiring the subcontractor to appropriately indemnify the Contractors. However, the inclusion of such a clause and the terms thereof are matters for negotiation and agreement between the Contractor and the subcontractor, provided that they do not conflict with the duties of the Contractor under its contract with the Government. It is also expected that any subcontractor subject to such indemnification will generally require substantially similar indemnification to be submitted by his subcontractors.

(e) The terms defined in Sec. 331.2 of Part 331 of Title 4, Code of Federal Regulations (4 CFR-331.2) shall have the same meanings herein. As there defined, "negotiated subcontract" means "any subcontract except a firm fixed-price subcontract made by a Contractor or subcontractor after receiving offers from at least two firms not associated with each other or such Contractor or subcontractor, providing (1) the solicitation to all competing firms is identical, (2), price is the only consideration in selecting the subcontractor from among the competing firms solicited, and (3) the lowest offer received in compliance with the solicitation from among those solicited is accepted." (FPR 1-3.1204)

The clause entitled "Listing of Employment Openings" contained in the General Provisions of this contract is hereby deleted and the clause given below substituted therefor. If the contract incorporates PG-GP-8-1, the clause given below is added thereto.

LISTING OF EMPLOYMENT OPENINGS

(This clause is applicable pursuant to 41 CFR 50-250 if this contract is for $2,500 or more.)

(a) The contractor agrees, in order to provide special emphasis to the employment of qualified disabled veterans and veterans of the Vietnam era, that all suitable employment openings of the contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occuring at an establishment other than the one wherein the contract is being performed but excluding those of independently operated corporate affiliates, shall be offered for listing at an appropriate local office of the State employment service system wherein the opening occurs and to provide such reports to such local office regarding employment openings and hires as may be required: Provided, That if this contract is for less than $10,000 or if it is with a State or local government the reports set forth in paragraphs (c) and (d) are not required.

(b) Listing of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruitment service or effort and shall involve the normal obligations which attach to the placing of a bona fide job order, including the acceptance of referrals of veterans and nonveterans. This listing of employment openings does not require the hiring of any particular job applicant or from any particular group of job applicants, and nothing herein is intended to relieve the contractor from any requirements in any statutes, Executive orders, or regulations regarding nondiscrimination in employment.

(c) The reports required by paragraph (a) of this clause shall include, but not be limited to, periodic reports which shall be filed at least quarterly with the appropriate local office or, where the contractor has more than one establishment in a State, with the central office of the State employment service. Such reports shall indicate for each establishment (i) the number of individuals who were hired during the reporting period, (ii) the number of those hired who were disabled veterans, and (iii) the number of those hired who were nondisabled veterans of the Vietnam era. The contractor shall submit a report within 30 days after the end of each reporting period wherein any performance is made under this contract. The contractor shall maintain copies of the reports submitted until the expiration of one year after final payment under the contract, during which time they shall be made available, upon request, for examination by any authorized representatives of the contracting officer or of the Secretary of Labor.

(d) Whenever the contractor becomes contractually bound by the listing provisions of this clause, he shall advise the employment service system in each State wherein he has establishments of the name and location of each such establishment in the State. As long as the contractor is contractually bound to these provisions and has so advised the State employment system, there is no need to advise the State system of subsequent contracts. The contractor may advise the State system when it is no longer bound by this contract clause.

(e) This clause does not apply to the listing of employment openings which occur and are filed outside of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, and the Virgin Islands.

(f) This clause does not apply to openings which the contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once an employer decides to consider applicants outside of his own organization or employer-union arrangement for that opening.

(g) As used in this clause:

(1) "All suitable employment openings" includes, but is not limited to, openings which occur in the following job categories: Production and nonproduction; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative and professional openings which are compensated on a salary basis of less than $18,000 per year. The term includes full-time employment, temporary employment of more than 3 days duration, and part-time employment. It does not include openings which the contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement.

(2) "Appropriate office of the State employment service system" means the local office of the Federal-State national system of public employment offices with assigned responsibility for serving the area of the establishment where the employment opening is to be filled, including the District of Columbia, the Commonwealth of Puerto Rico, Guam, and Virgin Islands.

(3) "Openings which the contractor proposes to fill from within his own organization" means employment openings for which no consideration will be given to persons outside the contractor's own organization (including any affiliates, subsidiaries, and parent companies), and includes any openings which the contractor proposes to fill from regularly established "recall" or "rehire" lists.

(4) "Openings which the contractor proposes * * * to fill pursuant to a customary and traditional employer-union hiring arrangement" means employment openings for which no consideration will be given to persons outside of a special hiring arrangement, including openings which the contractor proposes to fill from union halls, which is part of the customary and traditional hiring relationship which exists between the contractor and representatives of his employees.

(5) "Disabled veteran" means a person entitled to disability compensation under laws administered by the Veterans Administration for disability rated at 30 percentum or more, or a person whose discharge or release from active duty was for a disability incurred or aggravated in line of duty.

SUMMARY OF FEDERAL TRAVEL REGULATIONS

The following provisions concerning travel expense limitations have been abstracted or summarized from the Federal Travel Regulations, contained in Chapter 1 - Travel Allowances - of Subpart 101-7 of the Federal Property Management Regulations (FPMR) and published in Handbook Format as GSA Bulletin FPMR A-40. In addition, information is provided for the guidance of Contractors concerning the authorization for travel and the documentation of travel expenses.

A. Reimbursement for Travel - Reimbursement for travel expenses, including transportation, food and lodging, incurred by personnel in the performance of official duties while away from their regular place of duty, shall be limited as follows:

1. Transportation

a. Public surface transportation (bus, subway, taxi, etc.) shall be used to the fullest extent possible to satisfy local travel requirements. Only when it is clearly evident that the use of public surface transportation would significantly increase travel time over that required by another mode of transportation, e.g., by privately-owned vehicle, should another mode of transportation be used.

b. Reimbursement for use of reasonable and necessary public transportation (surface and air) will be made at the actual cost of the fare, not to exceed the cost of accommodations that are less than first class, unless it can be shown that only first class was available or warranted by the nature of or the circumstances surrounding the trip.

c. Reimbursement for use of privately-owned vehicles, where such use can be shown to be advantageous to the work effort, will be made on an actual mileage basis, not to exceed 8 cents per mile for motorcycles, 12 cents per mile for automobiles and 12 cents per mile for airplanes.

2. Per Diem vs Actual Subsistence Expenses

In lieu of reimbursement for subsistence expenses on an actual basis, travel reimbursement may be made on a per diem basis. Generally, the reimbursement of travel costs on an actual expense basis will be limited to the maximum per diem rates for the locality of travel. Exceptions to this general rule will be made only when it is readily apparent that the maximum per diem rate will be insufficient by a significant amount to reimburse the traveler for reasonably incurred travel costs.

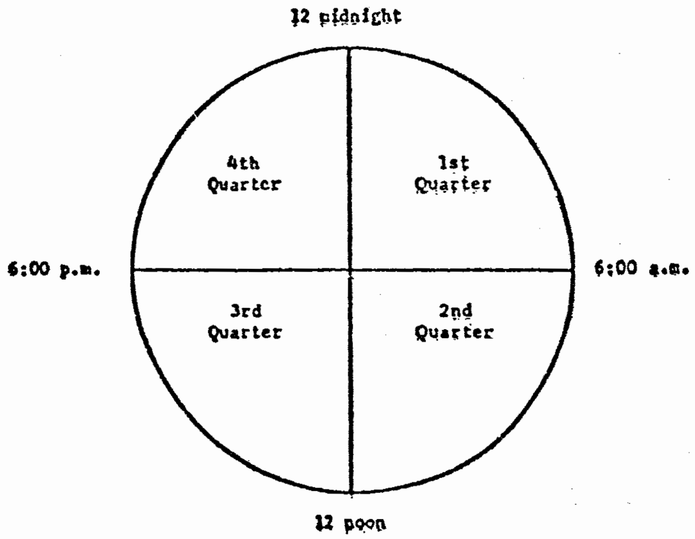
A maximum per diem allowance of $25.00 is authorized for official travel within the continental United States. The determination of the allowable per diem rate for the period covered by the travel voucher is based partly on the average amount which the traveler pays for lodging and partly on an allowance for meals and miscellaneous expenses.

In computing the average costs for lodging, only actual lodging costs may be considered. No minimum lodging allowance will be authorized to cover a night on which no lodging costs were actually incurred. Also, lodging costs do not include tips, room service, calls for hotel reservations, etc., but are restricted to the actual room cost plus any applicable tax. When lodging costs are shared by others, only a pro rata share of the costs will be used to determine a particular traveler's average lodging costs. The only exception to this pro rata share rule is when the lodging is shared by members of the traveler's family. In that instance, the single occupancy rate will be used in computing the traveler's average lodging costs.

A suitable allowance for meals and miscellaneous expenses will be added to the average lodging costs incurred to determine a reimbursable per diem rate for the period covered by the travel voucher. For contracts, this allowance for meals and miscellaneous expenses has been established at $10.00 per day. The sum (rounded to the next whole dollar) of the average lodging costs incurred for the period covered by the travel voucher plus $10.00 per day for meals and miscellaneous expenses will constitute the allowable per diem rate. However, the allowable per diem rate is limited to $25.00. In computing allowable per diem rates, employees are required to state on their travel vouchers that the rate claimed is based on the average cost paid for lodging during the period covered by the travel voucher.

3. Travel Time Guidelines for Determining Allowable Per Diem Costs

a. Travel of more than 24 hours. In computing allowable per diem costs for continuous travel of more than 24 hours, the calendar day (midnight to midnight) will be the unit, and for fractional parts of a day at the commencement or ending of such continuous travel constituting a travel period, one-fourth of the rate for a calendar day will be allowed for each period of six (6) hours or fraction thereof. An illustration of the proper fractional parts (quarters) of a calendar day follows:



The beginning and end of per diem entitlement will be determined by the quarter of the calendar day in which the traveler leaves and returns to his home, office, or other point of departure.

When departure is within 30 minutes before the beginning of a quarter day, or arrival within 30 minutes after the beginning of a quarter day, no per diem will be allowed for either of such quarter day unless a statement is given on the travel voucher which explains the official necessity for the time of such departure or return.

b. Travel of less than 24 hours. When travel of less than 24 hours duration is performed and a night's lodging is not required, reimbursement on a per diem allowance basis for meals and miscellaneous expenses (allowed at the rate of $10.00 per 24 hour day), shall be based on each six (6) hour portion of elapsed travel time, or fraction thereof. For example, if the elapsed travel time enters a second (over 6 hours), third (over 12 hours) or fourth (over 18 hours) six hour portion of elapsed time, reimbursement will be made as if the elapsed travel time spanned the entire six (6) hour portion into which it entered. Thus a 13 hour trip will be compensated for the same as an 18 hour trip, and the allowable per diem allowance for meals and miscellaneous expenses will be computed at 3/4 day or $7.50. Nevertheless, per diem will be allowed for a trip of 10 hours or less during the same calendar day only when the trip is six (6) hours or more, and begins before 6:00 A. M. or terminates after 8:00 P. M.

When travel is less than 24 hours and a night's lodging is required, the allowable per diem rate shall be determined by adding (and rounding to the next whole dollar) the cost of lodging to the meals and miscellaneous expense allowance computed in accordance with the preceding paragraph.

The above procedure for computing a per diem allowance for meals and miscellaneous expenses for travel of less than 24 hours differs from the procedure used for travel in excess of 24 hours in that different computations of travel periods are involved. For travel in excess of 24 hours, per diem computations are based upon determination of the calendar day quarters (refer to the illustration on page 2) of the travel period. For travel of less than 24 hours, per diem costs are based upon six hour periods of elapsed time comprising the travel period. For example, a trip starting at 5:00 A. M. and ending at 7:00 P. M. on the same day would enter into four (4) calendar day quarters, but only three (3) six hour periods of elapsed travel time.

B. Travel Authorizations and Advances. Written procedures which prescribe the processing of travel authorizations and employees' travel advances are desirable for management control of official travel and to assure that travel expenses are charged to the appropriate funds source or cost objective. To assist Contractors in the establishment of such written procedures, furnished below is a list of elements that should be included:

1. All official travel expected to exceed 10 hours in duration should have prior authorization of Contractor management.

2. Prior to travel, the traveler should submit to the designated authorizing official a completed Travel Authorization Form which should include, as a minimum, the following information:

a. Name of Traveler

b. Period of Travel

c. Itinerary (point of origin and places to be visited)

d. Purpose of Travel (this should support clearly the necessity for travel)

e. Total Estimated Cost

f. Amount of Travel Advance (less outstanding advance funds due the Contractor/Grantee)

g. Accounting Code to be Charged (Contract No., Indirect Expense Category, etc.)

h. Mode of Transportation (common carrier, privately-owned vehicle, rental vehicle, etc.)

i. Special Expenses Authorized

j. Signature lines for traveler and authorizing official

A sample Travel Authorization Form is furnished as Attachment 1.

C. Documentation of Travel Expenses - Subject to the limitations of the contract provisions, Contractors will be reimbursed for the claimed expense of official travel, when such claims are completely and accurately supported by appropriate documentation. To assure the appropriate documentation of official expenses, Contractors are encouraged to adopt the following documentation standards:

1. General. All claims for reimbursement of travel expenses must be supported by a completed Travel Expense Report which is signed by the traveler and the official authorizing payment. A separate expense report must be submitted for each trip longer than 10 hours in duration. Claims for local travel (e.g., daily use of public transportation or of a privately-owned vehicle for business reasons) can be submitted at periodic intervals. Sample Travel Expense Reports for out-of-town and local travel are furnished as Attachments 2 and 3, respectively.

2. Travel Expense Report. Any format is acceptable as long as it provides the following information:

a. Name of Traveler

b. Period of Travel

(continued from page 568)

This agreement shall consist of three parts:

Part I General Conditions

Part II Special Conditions numbered 1 to 8

Part III Exhibits and Attachments A

all constituting the entire agreement between the parties and no warranties, inducements, considerations, promises or other inferences, shall be implied or impressed upon such agreement that are not set forth herein at length.

The following is said ordinance as passed:

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. That the Mayor be and he is hereby authorized to execute, the City Clerk to attest, the Acting Commissioner of Streets and Sanitation and the City Comptroller to approve, upon approval of the Corporation Counsel as to form and legality, an Agreement with the Commonwealth Edison Company wherein the City of Chicago will supply to Commonwealth Edison Company supplementary fuel processed from daily residential refuse collections for use in the production of electric power, said agreement being attached hereto.

This Agreement, made and entered into as of the .... day of ...., 1975, by and between the City of Chicago, a Municipal corporation of the State of Illinois (hereinafter referred to as the "Seller") and Commonwealth Edison Company, an Illinois corporation (hereinafter referred to as the "Buyer"):

WITNESSETH, that:

In consideration of the mutual warranties, representations, covenants and agreements hereinafter contained, the parties hereto agree as follows:

Section 1—Basic Agreement. Seller will process, sell and deliver supplementary fuel to Buyer, and Buyer will purchase supplementary fuel from Seller as provided herein.

Section 2—Source of Supplementary Fuel. The source of the supplementary fuel shall be the daily residential refuse collections of the Seller. The refuse so collected shall be processed by Seller at a processing plant to be constructed adjacent to Buyer's Crawford Generating Station located at No. 3501 S. Pulaski Road, Chicago, Illinois (hereinafter called "Crawford Station").

Section 3—Quantity and Deliveries.

(a) Subject to the provisions of Section 16 the amount of supplementary fuel to be sold and purchased hereunder is 182,000 tons (2,000 pounds each ton) in the 12-month period commencing with the date of the first delivery hereunder, after the certification of effective operation in accordance with Section 10 hereafter, scheduled to take place on or about November 1, 1976, and 182,000 tons in each of the nine (9) succeeding 12-month periods at the end of which this Agreement shall terminate. If annual consumption of supplementary fuel exceeds the contracted quantity in any 12-month period, such supplementary fuel will be paid for at the same price and under the same terms and conditions as then in effect under this Agreement, but Buyer shall have no obligation to accept an excess quantity.

(b) Supplementary fuel delivered hereunder will be consumed when Crawford Station Units 7 and/or 8 are being operated at a loading of not less than 50% of their capability.

(c) Supplementary fuel purchased hereunder shall be shipped as ordered and directed orally or in writing from time to time by Buyer and shall be delivered via an enclosed pipe-type air transport system by Seller to Buyer f.o.b. Crawford Station directly into Buyer's surge bins.

(d) Seller recognizes that Buyer must perform preventive maintenance from time to time on its Crawford Station Units 7 & 8. When such maintenance is being performed, Buyer will not be able or obligated to accept deliveries of supplementary fuel from Seller. Buyer recognizes that Seller has peak refuse collection periods during the warm weather months and therefore Buyer will make every effort to perform its scheduled maintenance during the period beginning October 1 and ending April 30.

(e) Seller's supplementary fuel processing station may be used for other projects as solely determined by Seller provided, however, that these other projects do not interfere with the delivery of supplementary fuel to Buyer at the times and in the quantities such supplementary fuel is required to be delivered under this Agreement.

Section 4—Supplementary Fuel. The supplementary fuel furnished hereunder will be processed to a maximum size of 1½ inch with 85% less than 1 inch and will have at least 95% by weight of the inert material removed. Such fuel will have a typical heat content of about 6,000 Btu per pound as received at the sampling point. Such Supplementary fuel shall have characteristics that will enable Buyer to utilize it and meet all state and federal environmental standards in effect at the time of utilization without alteration or addition to Buyer's Crawford Station and without modification or blending with other fuels for the purpose of meeting such standards. If, when sampled and analyzed in accordance with Section 6, the supplementary fuel supplied hereunder is found to contain greater than five (5) percent inert material by weight, for a period of five (5) consecutive samples, Buyer shall have the right to refuse further delivery until Seller can satisfactorily demonstrate to Buyer that such inert material will not exceed five (5) percent of the supplementary fuel.

Section 5—Weighing. Supplementary fuel delivered hereunder shall be weighed by Buyer at the outlets of the surge bins at Crawford Station each day during which supplementary fuel is burned in the boilers at the Crawford Station, by such weighing equipment or systems as approved by Seller's engineers. Seller shall have the right to witness such weighing. Weights so determined, and Btu content as determined under Section 6 below, shall be the basis for billing hereunder. Whenever the above mentioned weighing equipment is inoperative, the weight of the supplementary fuel delivered to Buyer during such time shall be determined as follows: (i) calculate the net weight of material delivered to the processing plant by subtracting the actual weight of the refuse collection vehicles after unloading from the actual weight of such vehicles prior to unloading, and (ii) subtracting the weight of all materials, not to be delivered to Buyer, separated during processing using a scale specifically installed for such purpose. When supplementary fuel delivered hereunder is being weighed by Seller, Buyer shall have the right to have a representative present to observe such determination.

Section 6—Sampling and Analysis. In order to determine the Btu and inert material content of the supplementary fuel, a representative sample shall be taken at the outlets of the surge bins at Crawford Station by Buyer each day, or such other regular time interval as may be agreed upon, during which supplementary fuel is burned in the boilers at Crawford Station. The Seller shall have the right to witness all sampling. All samples shall be divided into three (3) parts and put in suitable air tight containers. One part shall be retained by Buyer and such part shall be analyzed by Buyer and the results reported to the Seller for use in billing; one part shall be forwarded to Seller, for its own analysis as a check on Buyer's analysis; and the third part shall be retained by Buyer in one of the aforesaid containers, properly sealed and labeled, to be analyzed later if a dispute arises due to a difference between Buyer's and Seller's analysis. Analysis shall be performed pursuant to the American Society for Testing Materials designation D-2015-66 (Reapproved 1972), "Standard Method of Test for Gross Calorific Value of Solid Fuel by the Adiabatic Bomb Calorimeter". Each party hereto assumes the cost of analysis of its part of the sample.

Should analysis of the third part of any sample be found necessary, such analysis shall consist of four separate analyses made by an independent commercial testing laboratory, mutually chosen, and the average of the results of such analyses shall be controlling. The results of the analyses shall be supplied to both parties. The cost of the analyses made by such commercial laboratory shall be shared equally by the parties hereto.

If Buyer is for any reason unable to sample any shipment of supplementary fuel delivered hereunder, a sample taken by Seller at the processing plant shall be used. Buyer shall have the right to witness such sampling. If no sample is taken, an average analysis of the last three daily samples taken prior to the delivery day in question will be used.

Section 7—Price. Buyer shall pay Seller for supplementary fuel delivered hereunder thirty cents ($0.30) for each million British thermal unit of heat content in the supplementary fuel delivered hereunder, f.o.b. the outlet of the surge bins at Crawford Station (the "Base Supplementary Fuel Price").

Payments to be made by Buyer shall be computed by Seller by multiplying total tons delivered each day at the outlet of the surge bins times the Btu per pound content of samples analyzed by the Buyer for that day, times 2,000 pounds, times the Base Supplementary Fuel Price divided by one million Btu's. This computation for each day is described in the following formula:

Daily Btu Costs = Tons Delivered × 2,000
× (Btu's/lb.) × Base Supplementary Fuel
Price ÷ 1 Million Btu's

Section 8—Price Adjustment—Changes in Certain Cost Factors. The Base Supplementary Fuel Price of supplementary fuel delivered hereunder from Seller's processing plant shall be fixed for a period of 5 years after the first delivery of supplementary fuel hereunder. Four years and six months after the first delivery of supplementary fuel, Seller will supply Buyer with the price, to be effective six months later, of supplementary fuel for the next five years. Price adjustments shall only be made to reflect changes in costs, necessary to operate the Sellers refuse processing plant and as approved in the Seller's Annual Appropriation Ordinance. Such adjustments shall be limited to changes in labor costs, both direct and supervisory, materials and supplies and power costs. Seller shall supply Buyer with the basis and calculation of such adjustments.

Section 9—Arbitration. In the event that the parties are unable to mutually agree on price adjustment the matter shall be resolved by arbitration. Arbitration may be requested by either giving notice to the other party. Within 15 days after receipt of such notice, each party shall designate a person to act as arbitrator, with the two persons selected designating a third party to act as the third arbitrator, said third selection to be made within 15 days after the appointment of the first two arbitrators. In the event the first two arbitrators are unable to agree upon the third abritrator, then the arbitrators shall apply to the American Arbitration Association to designate and appoint the third arbitrator. In the event the party upon whom the original arbitration request was served, shall fail to designate its arbitrator within the 15-day period, then the arbitrator designated by the party requesting arbitration shall act as the sole arbitrator and shall be deemed to be the single, mutually approved arbitrator to resolve the controversy. The decision and award of the majority of the arbitrators or of such sole arbitrator shall be binding upon both Buyer and Seller.

Section 10—Design, Procurement, Installation and Responsibility for Capital Investment. Buyer will be responsible for designing the equipment required for the transportation, storage, weighing, sampling and conveyance, into Crawford Station Units 7 and 8 furnaces, of supplementary fuel hereunder, to be installed on Crawford Station property. Buyer shall also be responsible for the preparation of drawings and specifications for such equipment. Seller shall review and approve such drawings and specifications. When satisfactory to Seller, Buyer will contract for and pay all fees for the services of consulting engineers required to design that portion of the system located on Crawford Station property and to consult with Seller.

Seller shall be responsible for the design and for the preparation of drawings and specfications for that portion of the transportation system which shall be installed on Seller's property. Buyer shall make its consulting engineers available to offer assistance and advice to Seller in the preparation of such drawings and specifications.

Seller shall be responsible for the procurement and installation of all of the aforesaid equipment and, using such approved drawings and specifications prepared by Buyer and Seller, shall seek and obtain proposals and enter into contracts with successful bidders to furnish and to install such equipment. Seller shall be responsible for the costs of such procurement and installation.

Buyer will provide access to Seller's engineers and contractors for installation of the equipment to be installed on Crawford Station property. Seller agrees to keep Buyer informed at all times of the schedule of work to be performed on Crawford station property, and to give Buyer reasonable advance notice of the presence and activities of its personnel, engineers and contractors on Crawford Station property. Seller agrees to bind such persons to abide strictly by Buyer's rules, regulations and precautionary requirements when on Buyer's property to prevent damage, loss, injury or danger to persons and property.

Buyer will have a field engineer from its Station Construction department on the Crawford Station property at all times when Seller's engineers and contractors are present and working. The field engineer's duty shall be to consult with Seller's engineers and contractors and to schedule outages of station facilities when required for installation purposes and to consult with Seller's engineers and contractors regarding scheduling of their work in order to minimize interference with the operation of Crawford Station generating units, and Seller will cooperate in such scheduling. Such field engineer will also inspect the work performed to determine that it has been performed and accomplished in accordance with Buyer's approved drawings and specifications and that the equipment installed can be accepted by Buyer and used for the transportation, receipt, storage, weighing, sampling and conveyance of supplementary fuel.

Upon completion of the installation of the equipment and demonstration that the system will perform as specified, Buyer's field engineer will certify that there has been full compliance with Buyer's drawings and specifications.

Section 11—Ownership and Maintenance. Upon certification by Buyer's field engineer that Buyer's drawings and specifications have been fully compiled with, Seller will convey to Buyer title to that portion of the equipment installed on Crawford Station property, and Buyer will retain ownership thereof until the termination of this Agreement.

Upon completion of the installation of the system for transportation, storage and burning of the supplementary fuel and transfer to Buyer of title to that portion of the system located on Crawford Station property, Buyer will operate and maintain that portion of the system at its own cost and expense, and Seller will operate and maintain the balance of the system at its cost and expense.

Upon the termination of this Agreement, Seller will have the right to take title to the equipment installed, by giving Buyer notice within 90 days after the termination of this Agreement of Seller's desire to acquire ownership. Upon receipt of such notice, Buyer shall convey title to the equipment to Seller.

Upon acquiring ownership of the equipment or upon Buyer's request at the termination of this Agreement, Seller shall promptly remove such equipment from Crawford Station property. Disconnection of any equipment from Buyer's facilities shall be performed by Buyer or by Seller under supervision of Buyer. Upon failure of Seller to so remove such equipment after 30 days written notice to Seller requesting such removal, Buyer may remove such equipment and deliver the same to Seller, at Seller's cost.

It is understood and agreed that no work done, nor materials purchased, nor installation made shall at any time give Seller, its engineers, its contractors or its materialmen any rights or interest in Crawford Station property or Buyer's facilities therein, including rights of lien available under any statute or otherwise. Seller covenants that no such party shall file a lien, commonly called a mechanics' lien, for materials used and for work done hereunder, and the right to have such lien is hereby expressly waived. Seller agrees to give its contractors notice of this provision, and in its contracts for purchase and installation of the equipment, it will include a provision stating that such contractors have notice of this provision, that such contractors will give such notice to their subcontractors and materialmen and will cause such provision to be inserted in each subcontract for labor, services and materials.

Section 12—Testing and Inspection.

(a) Buyer will arrange for appropriate observations and tests to be made at each of the units modified to accept supplementary fuel to determine whether adverse effects to the boiler and/or its auxiliary equipment result from the use of the supplementary fuel.

(b) Buyer will conduct tests of not less than 300 hours duration in total at each of the modified power generating units to enable comparisons in boiler efficiency to be made between periods in which supplementary fuel is used, and periods in which supplementary fuel is not used.

(c) Seller shall be given advance notice by Buyer when any observations and or tests provided for hereinabove will be done and shall have the right to have a representative present at such times to witness such tests and observations. In addition, Buyer shall provide to Seller, within a reasonable time thereafter, copies of all tests, observations, comparisons, reports, etc. having to do with, or because of, the burning of supplementary fuel.

Section 13—Hold Harmless. Seller agrees to hold Buyer harmless and indemnify Buyer and all persons interested in Crawford Station and surrounding property against all loss, liability, damage and expense, including attorneys' fees, incurred by any of them on account of any injury to or death of any of Seller's employees, agents or other personnel, and on account of damage to property, caused by or resulting from Seller's activities relating to its performance under the terms of this

Agreement. If requested by Buyer, Seller shall, at its own cost, expense and risk, defend all suits or other legal proceedings that may be brought or instituted against Buyer or such other persons on such claim or demand and pay and satisfy any judgment that may be rendered in such suit or legal proceedings or the amount of any compromise or settlement that may result therefrom.

Section 14—Insurance. Seller shall cause to be inserted in its contracts, advertised for bid, or rebid, on or after April 15, 1975, with all contractors and other persons not in the employment of Seller engaged to furnish labor, materials and services, in connection with the performance of Seller's obligations under this Agreement, on Crawford Station property, requirements that such contracting parties provide and maintain, during any period in which any such party is or is required to be on Crawford Station property in connection with such performance obligation, Owners' and Contractors' Protective Liability Insurance in Buyer's name with personal injury limits of $1 million for each incident and $3 million for each occurrence and with property damage limits of $1 million, and that such policy or certificate of insurance evidencing such protection will be furnished to Buyer at Buyer's request; for contracts advertised for bid prior to April 15, 1975, Seller shall require a mimimum insurance coverage as described above with personal injury limits of $500,000 for each incident and $1 million for each occurrence, shall require that Buyer be added as additional named insured in such policy of insurance, if not already named as insured, and at Buyer's request, furnish to Buyer such policy or a certificate of insurance evidencing compliance with such requirements.

Section 15—Invoices and Payments. Once each month, Seller shall render to Buyer an invoice, covering deliveries made during the preceding month. Within 20 days after receipt of each such invoice, Buyer shall pay Seller the net amount of such invoice, and including any applicable sales or use taxes.

Section 16—Force Majeure. If, because of force majeure, either Seller or Buyer is reasonably prevented from performing any of its obligations under this Agreement, or Buyer is reasonably prevented from receiving and consuming supplementary fuel to be supplied hereunder, or utilizing such supplementary fuel at its Crawford Station Units 7 and 8, and if the party experiencing such force majeure gives the other party written notice of such force majeure, then the obligations of the parties shall be reduced to the extent the party experiencing the force majeure is so prevented. The notifying party shall, subject to the limitations set forth in this Section 16, make all reasonable efforts to remove the force majeure and resume its performance hereunder with all reasonable dispatch. Buyer shall not be required to treat or alter the characteristics of the supplementary fuel, or substantially modify or revise the equipment in the Crawford Station in order to consume the supplementary fuel and eliminate the "force majeure". As used herein, "force majeure" means any act or occurrence reasonably preventing the performance of obligations created by this Agreement or reasonably preventing or limiting the receiving and consuming of any supplementary fuel to be supplied hereunder to Crawford Station or the burning of the supplementary fuel thereat. Force majeure shall include but not be limited to, acts of God, fire, flood, explosion, strikes, labor disputes, sabotage, riots, civil comotion, acts of any civil or military authority, wars, equipment failures, including such failures caused by negligence of employees, breakdown of transportation facilities and acts of the other party. Reduction in electrical loads below Buyer's estimates shall be deemed an event of force majeure if, as a result, acceptance of supplementary fuel would compel Buyer to load Crawford Station out of its economic loading order. Failure by the Seller to supply a supplementary fuel which meets any then applicable environmental standards shall be deemed to be an event of force majeure.

Section 17—Captions. The captions of Sections in this Agreement are of convenience for reference only and shall not be taken or construed to define or limit any of the terms or provisions of this Agreement.

Section 18—Notices. Unless otherwise expressly provided herein, any notices required to be given to Seller shall be given by mailing the required notice, first-class mail, postage prepaid, to Commissioner of Streets and Sanitation, City of Chicago, Room 700, City Hall, 121 North LaSalle Street, Chicago, Illinois 60602, or such other addresses as Seller may hereafter provide Buyer for such purpose. Box 767, Chicago, Illinois 60690, or to such other address as Buyer may hereafter provide Seller for such purpose.

Section 19—Execution of Agreement. Seller and Buyer and the individuals signing this Agreement on behalf of each of them, warrant and represent that the execution and delivery of this Agreement has been duly authorized, and that all corporate actions and all other steps necessary to be taken to make this Agreement and all terms hereof valid and binding obligation of Seller and Buyer have been duly taken.

Section 20—Assignment. Buyer or Seller may not assign this Agreement to any other party or corporation without concurrence of both Buyer and Seller.

Section 21—Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be an original, but such counterparts shall together constitute but one and the same instrument.

Section 22—Nondiscrimination in Employment. Section 23—Covenant Against Brokerage. Seller warrants that, except as expresely stated to Buyer in writing attached hereto, no person or commercial agency has been engaged to solicit or secure this Agreement, and agrees that Seller shall pay no compensation to any person or commercial agency for soliciting or securing this Agreement, except in the case of bona fide employees or bona fide established commercial agencies maintained or utilized on a continuous basis by Seller for a purpose of securing business generally. For breach or violation of this warranty, Buyer shall have the right to annul this Agreement without liability or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of any such compensation paid.

COMMITTEE ON CULTURAL AND ECONOMIC DEVELOPMENT.

Marquette Building Designated as Chicago Landmark.

The Committee on Cultural and Economic Development submitted the following report:

CHICAGO, June 5, 1975.

To the President and Members of the City Council:

Your Committee on Cultural and Economic Development, having had under consideration a communication signed by Mr. Samuel A. Lichtmann, Chairman of the Chicago Commission on Historical and Architectural Landmarks (referred on September 11, 1973, page 6069) to designate the Marquette Building as a Chicago Landmark, begs leave to recommend that Your Honorable Body *Pass* the proposed ordinance, which is transmitted herewith.

This recommendation was concurred in by all members of the committee, with no dissenting vote.

Respectfully submitted,
(Signed) EDWIN P. FIFIELSKI,
Chairman.

On motion of Alderman Fifielski the proposed ordinance transmitted with the foregoing committee report was *Passed*, by yeas and nays as follows:

Yeas—Aldermen Roti, Barnett, Kenner, Evans, Lathrop, Sawyer, Wilinski, Cousins, Adduci, Vrdolyak, Bilandic, Madrzyk, Burke, Jaksy, Barden, Shannon, Hines, Joyce, Stewart, Stemberk, Lipinski, Rhodes, Marzullo, Zydlo, Ray, Washington, Cross, Hagopian, Keane, Gabinski, Mell, Frost, Laskowski, Aiello, Casey, Cullerton, Laurino, Gutstein, Pucinski, Natarus, Oberman, Simpson, Fifielski, Cohen, Schulter, Block, Saperstein, Stone—48.

Nays—None.

The following is said ordinance as passed:

WHEREAS, The Commission on Chicago Historical and Architectural Landmarks has determined that the structure known as the Marquette Building, located at No. 140 S. Dearborn Street, Chicago, Illinois, designed by Holabird and Roche in 1895, is worthy of designation as a "Chicago Landmark," and accordingly has recommended such designation; and

WHEREAS, The Commission has found that the Marquette Building meets the criteria for designation as set forth in Chapter 21, Section 21-64(b) of the Municipal Code of Chicago, namely:

Its character, interest or value as part of the development, heritage or cultural characteristics of the City of Chicago, State of Illinois, or the United States.

Its identification with a person or persons who significantly contributed to the culture and development of the City of Chicago.

Its exemplification of the cultural, economic, social or historic heritage of the City of Chicago. Its portrayal of the environment of a group of people in an era of history characterized by a distinctive architectural style.

Its embodiment of distinguishing characteristics of an architectural type of specimen.

Its identification as the work of an architect or master builder whose individual work has influenced the development of the City of Chicago.

Its relationship to other distinctive areas which are eligible for preservation according to a plan based on an historic, cultural or architectural motif.

Its unique location or singular physical characteristic representing an established and familiar visual feature of a neighborhood, community or the City of Chicago; and

WHEREAS, The building is named after the great French missionary and explorer, Pere Jacques Marquette, who explored and plotted land in New France, known later as the Northwest Territory. The mosaic frieze in the lobby depicts the departure of Marquette and Joliet, their joining in 1673, their meeting with the Illinois Indian and the death of Marquette on the eastern shore of Lake Michigan in 1675. Father Marquette may be seen to represent the spiritual aspirations of man, and Joliet, who was a fur trader, may be seen to represent man's material ambitions. The Marquette Building represents both, the material ambitions and the spiritual aspirations; and

WHEREAS, The bronze relief, the sculptures, and the brillant mosaics of the building, well-known in the artistic world, are the creation of three respected craftsmen: Herman MacNeil, Edward Kemeys and Louis Comfort Tiffany; and

WHEREAS, The building, named for Pere Marquette, does justice to the name of a great explorer who first brought new thoughts and ideas to the Indians living in the Chicago region, as the building itself represents a high point in the new thoughts and ideas about American architecture developed in the late 19th Century. The bronze and mosaic decoration to be seen in the lobby depicts the events of the discovery and exploration of the great Northwest, so the plan and facade of the building itself are living record of an architectural concept truly derived from the use of steel framing and the pragmatic demands of the entrepreneur. As the prevailing characteristics of all civilizations can be understood through their architecture, so America and especially Chicago represents those traits which are unique to us: business, speculative development and a technological innovation. The Marquette Building is unique in that these forces seem to have come together for the first, clear-cut time in the design and construction of this building, thereby setting precedence for much of the physical aspect of present day Chicago; and

WHEREAS, The Marquette Building falls distinctly into the style of the Chicago School of Architecture. Characteristics of this style include a rather direct expression of the interior structural frame, large expanse of glass areas often translated into Chicago windows, unique architectural ornament enhancing the highrise character of a tall building, and often interior ornament included to dignify a strictly commercial structure. The Marquette's exterior is a classic of the Chicago School, providing a starting point for the Chicago window, and a turning point for the later designs of its architects, Holabird & Roche. The simplicity of its exterior design provides a clear expression of its steel frame and the concept for which Chicago is famous in many areas, that form should follow function; and

WHEREAS, The Commission has concluded that the Marquette Building is truly important to Chicago, and deserves to be preserved, protected, enhanced and perpetuated, and the Commissioner of Development and Planning of the City of Chicago and the City Council Committee on Cultural and Economic Development have concurred in the Commission's recommendation that the Marquette Building be designated as a Chicago Landmark; now, therefore,

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. The structure known as the Marquette Building located on property legally described as:

> "Lots 19 and 20 in County Clerk's Division of Block 120 in School Section Addition to Chicago in Section 16, Township 39 North, Range 14 East of the Third Principal Meridian,"

and commonly known as No. 140 S. Dearborn Street, Chicago, Illinois, is hereby designated as a "Chicago Landmark" in accordance with the provisions of Chapter 21, Section 21-64(f) of the Municipal Code of Chicago.

SECTION 2. The Commission on Chicago Historical and Architectural Landmarks is hereby directed to create a suitable plaque appropriately identifying said landmark and to affix said plaque to the property designated as a Chicago Landmark in accordance with the provisions of Chapter 21, Section 21-64(f) of the Municipal Code of Chicago.

SECTION 3. The Commission on Chicago Historical and Architectural Landmarks is directed to comply with the provisions of Chapter 21, Section 21-64(g) of the Municipal Code of Chicago.

SECTION 4. This ordinance shall take effect on and after its due passage and publication.

SECTION 1. The Municipal Code of Chicago is amended in Chapter 7 thereof by adding the following new Sections, 7-67 through and including 7-74.

7-67. The City of Chicago, acting by its City Council, may from time to time, borrow money for the purpose of paying the cost of constructing extensions, improvements, or both, to the existing Chicago Water System and in evidence of such borrowing, issue its Water Revenue Bonds, which shall be payable, both as to principal and interest, solely and only from the revenues to be derived from the operation of the Water System of said City, which Water Revenue Bonds shall become due within 40 years of their date and shall not in any event constitute an indebtedness of said City within the meaning of any constitutional or statutory provision or limitation on indebtedness which may be incurred and the Water Revenue Bonds shall not be payable from ad valorem taxes to be levied and extended against taxable property situated within the City. The procedures for the issuance of Water Revenue Bonds shall be as substantially herein provided in Sections 68 through 74 of this chapter.

7-68. The City Council shall adopt an ordinance (hereinafter designated the "Water Revenue Bond Ordinance"), which shall set forth the amount of money necessary to be borrowed and the amount of the Water Revenue Bonds to be issued in evidence of such borrowing, shall describe in a general way the improvements, extensions, or both, necessary to be made and the estimated cost thereof. It shall not be necessary that such Water Revenue Bond Ordinance refer to or incorporate therein by reference detailed plans and specifications of such improvements, extensions, or both.

Prior to the adoption of any such Water Revenue Bond Ordinance, a public hearing shall be held thereon by the Finance Committee of the City Council, pursuant to a notice given of such public hearing, such notice to refer generally to the subject matter of the Water Revenue Bond Ordinance and to be published at least once in a newspaper published in and having a general circulation within the City of Chicago, the date of such publication to be not less than 10 days prior to the date of the public hearing.

7-69. The Water Revenue Bond Ordinance shall fix the details of the Bonds to be issued, including their date, number, denomination and maturity, which cannot exceed 40 years from their date and their maximum rate of interest which shall not exceed 8% per annum. The Bonds shall be sold in such manner as may be determined in the Water Revenue Bond Ordinance and they shall be sold at a price of not less than par. The Water Revenue Bond Ordinance shall further provide that it will be plainly stated on the face of each Water Revenue Bond that the same has been issued under and pursuant to the provisions of this Ordinance and that such Water Revenue Bond does not constitute an indebtedness of the City of Chicago within any constitutional or statutory provision or limitation as to debt. The Water Revenue Bond Ordinance shall further set forth and contain such provisions and covenants as may be deemed necessary or advisable for the assurance of the prompt payment of the Water Revenue Bonds thereby authorized and as may be thereafter authorized and including the prompt payment of Water Revenue Bonds or Certificates theretofore issued and which by their terms are payable from the revenues of the Chicago Water System and may be then outstanding.

7-70. Whenever Water Revenue Bonds are issued pursuant to the provisions of this Ordinance, the entire revenue received from the operation of the Chicago Water System shall be deposited in a separate fund designated as the "Water Fund of the Municipality of Chicago". This fund shall be used only in paying (1) the cost of maintenance and operation of the Chicago Water System; (2) obligations of the City of Chicago heretofore issued that are payable by their terms from the revenues of the System, whether such obligations were heretofore issued in the form of certificates, bonds or otherwise; (3) Water Revenue Bonds issued pursuant to the provisions of this code; and (4) establishing and maintaining all reserve funds or accounts as may be covenanted for in the bond ordinances adopted authorizing such Water Revenue Bonds. Provided, however, that any funds available after or not necessary for satisfying the above requirements may be used for any lawful purpose of the Chicago Water System.

Rates charged by the City for water used shall be sufficient to pay the cost of maintenance and operation of the Chicago Water System and to pay promptly when due the principal of and interest upon all the obligations of the City heretofore issued that are payable by their terms only from such revenues of the Water System and the payment of Water Revenue Bonds issued pursuant to the provisions of the Water Revenue Bond Sections of this Chapter, and to establish and maintain all reserve funds or accounts as may be covenanted for in bond ordinances adopted and authorizing the issuance of such Water Revenue Bonds. These rates charged shall not be reduced while any of such certificates or bonds or obligations are unpaid.

7-71. The Water Revenue Bond Ordinance shall authorize execution of the Bonds therein authorized on behalf of the City by being signed by the Mayor and by the City Comptroller and to be attested by the City Clerk, and by the respective proxies of said Mayor and City Comptroller, shall determine whether such Bonds to be issued shall be registered in the name of the owner as to principal only and shall indicate the place or places of payment of the principal and interest maturing on said bonds and shall also set forth the form of Water Revenue Bonds to be issued.

The Mayor and the City Comptroller may each designate another to act as their respective proxies and to affix their respective signatures to any such Water Revenue Bonds, and in such case, each shall send to the City Council written notice of the person so designated by each, such notice stating the name of the person so selected to sign as proxy for the Mayor and the City Comptroller, respectively. A written signature of the Mayor or of the City Comptroller, respectively, executed by the person so designated underneath, shall be attached to each notice. Each notice, with the signature attached, shall be recorded in the Journal of the Proceedings of the City Council and then filed with the City Clerk. When the signature of the Mayor is placed on a Water Revenue Bond at the direction of the Mayor in the specified manner, the bond, in all respects, shall be as binding on the City as if signed by the Mayor in person. When the Comptroller's signature is so affixed to a Water Revenue Bond at the Comptroller's direction, the bond, in all respects, shall be as binding on the City as if signed by the Comptroller in person.

7-72. In case any officer whose signature appears on the specified Bonds or the coupons attached thereto ceases to hold his office before the delivery of the Bonds to the purchaser, his signature nevertheless shall be valid and sufficient for all purposes, to the same effect as if he had remained in office until the delivery of the Bonds.

7-73. The provisions of any Water Revenue Bond Ordinance shall constitute an appropriation of the amounts required as therein referred to and described and upon the delivery of the Bonds therein authorized, the proceeds thereof shall be used solely and only for the purpose or purposes for which the Bonds were authorized. Upon the adoption of any such Bond Ordinance by the City Council and its approval by the Mayor, the same shall be published by the City Clerk in pamphlet form and shall be in full force and effect upon its publication. Such Water Revenue Bond Ordinance shall not be subject to referendum approval by the voters but shall become effective upon its publication as above provided for.

7-74. Pursuant to the authority granted by Section 6 of Article VII of the Constitution of Illinois 1970, the procedures hereby established for the issuance of Water Revenue Bonds payable from the revenues to be derived from the operation of the Chicago Water System as herein provided for shall be controlling and shall be complied with by the City Council in the borrowing of money through the issuance of Water Revenue Bonds payable from revenues to be derived from the Chicago Water System of the City notwithstanding anything to the contrary contained in the provisions of the Illinois Municipal Code of 1961 and all acts amendatory thereof and supplementary thereto and any other laws of the State of Illinois.

SECTION 2. This ordinance shall be in full force and effect immediately upon its passage by the City Council of the City of Chicago and its approval by the Mayor.

Where prohibited. No sprinkler system shall be permitted in any hazardous chemical room or in any hazardous chemical storage building, where the chemical has the ability to react with water to produce substances or violent chemical reactions which increase the hazard. When the presence of water will not add to the hazard, a standard sprinkler system shall be required in such hazardous chemical room or building.

Fume or flammable compressed gas. No sprinkler system shall be required for any fume or flammable compressed gas building of Type IA, IB or IC construction, nor for any room intended for the storage and use of chlorine gas for no purpose other than the operation of a water purification plant or re-

Where nitrocellulose products are stored on shelves, there shall be one sprinkler head directly over the aisle in front of each section of shelving.

3) Receiving, shipping and distributing rooms. Every receiving, shipping or distributing room for nitrocellulose products shall be provided with not less than one automatic sprinkler head for each sixty-four feet of ceiling area, so spaced that the maximum distance between adjacent heads and branch lines shall not exceed eight feet.

b) Stage blocks. In stage blocks, standpipes shall be provided on each side of the stage, on each tier of dressing rooms and within fifty feet of all property rooms, store rooms or work rooms.

c) Storage structures. Standpipes shall not be required in grain elevators or similar storage structures where such standpipes are ineffective owing to the type of structure and inaccessibility of hose connections.

For the purpose of determining standpipe requirements, the height of a building shall be determined in accordance with the provisions of Section 51-1.1. Towers, steeples, tanks and similar structures not intended or used for human occupancy shall not be considered in determining the height.

d) This section shall not apply to a building used as a business unit or storage unit, in existence prior to January 20, 1950, which is equipped throughout with an approved system of automatic sprinklers or is a fire resistive building of Type IA, IB or IC construction, provided that a standpipe system complying with Section 91-100 is also provided in the building.

e) In Exhibition Areas standpipes shall be provided regardless of the height of the building and standpipe locations shall provide complete coverage of the fire area with 100 foot hose lengths and 30 foot hose streams.

64-11. A Class II standard fire alarm system may be installed in lieu of a Class I standard fire alarm system in any building, when in the opinion of the division marshal in charge of the Bureau of Fire Prevention the number of people involved and the physical construction of such building makes a Class II standard fire alarm system acceptable. Class II standard fire alarm system shall comply with the provisions of Chapter 91.

64-12. In every building described in Section 64-10, as requiring a standard fire alarm system, the area of such building shall be the total area of the building and the height shall be the total height of the building including the space used for occupancies other than for institutional, school or hotel occupancies.

64-13. In every fire alarm system required in this code, automatic fire detectors shall be installed as an integral part of a fire alarm system in rooms or portions of the building as follows:

a) In every attic and in all rooms where a flammable compressed gas or flammable liquid as described in Chapters 129 and 129.1 other than fuel oil for heating is stored or used; also in shops and storerooms where combustible material is stored or handled.

b) In every building used in part as an institutional building, school or hotel, an automatic fire detector shall be installed in such portion or portions of the building used for purposes other than institutional, school or hotel purposes, unless such institutional building, school or hotel is separated from all other occupancies by a separation with a fire resistive value as specified in Section 48-12.5. Such automatic fire detectors shall be installed, spaced and located in accordance with the recommendations, based upon actual tests, prescribed by a nationally recognized testing laboratory acceptable to the Fire Prevention Bureau.

c) In every storeroom, maintenance shop, linen room, janitor closet and storage area in an institutional building.

d) In the basement of buildings of Type III or IV construction containing a Type III school on the first floor or basement, the detectors shall be located in all areas of such basement spaces including spaces used by the school except classrooms.

e) In all two story buildings occupied as open plan schools, (a story located below grade level shall be counted, if used for other than building service purposes), approved automatic fire detectors shall be installed throughout the building and be interconnected to the school fire alarm system.

64-14. No automatic fire detector shall be required in any room or portion of a building which is equipped with an approved installation of automatic sprinklers and provided with a water flow alarm which is connected to the fire alarm system.

Fire Extinguishers

64-15. Standard fire extinguishers shall be provided in accordance with the provisions of Sections 91-45 to 91-51 of this code inclusive.

Bureau of Fire Prevention

90-1. This Chapter and Chapters 91, 92, 125, 129, and 129.1 of this code shall be known as the fire regulations of this code.

90-2. For provisions covering the establishment powers, duties and responsibilities of the Bureau of Fire Prevention, see Chapter 12 of this code.

90-3. Where the meaning of any term of expression used in the fire regulations of this code is disputed and is not defined therein, such definitions thereof as appear in the building regulations of this code shall prevail and be conclusive.

90-4. Nothing contained in this Chapter and Chapters 91, 92, 125, 129, and 129.1 shall be construed as applying to the transportation of any article or thing shipped in conformity with regulations prescribed by the Department of Transportation and/or Interstate Commerce Commission, nor as applying to the military or naval forces of the United States.

90-5. All buildings and structures now existing or hereafter erected, altered or enlarged, shall be classified for the purposes of the fire regulations of this code according to occupancy, use and type of construction in accordance with Chapters 48 and 49 of this code.

90-6. It shall be unlawful to continue the use of or occupy any building, structure or place which does not comply with those provisions of this code which are intended to prevent a disastrous fire or loss of life in case of fire, until the changes, alterations, repairs or requirements found necessary to place the building in a safe condition shall have been made.

90-7. Any building, structure, enclosure, place or premises, perilous to life or property by reason of the construction of such building or structure or by reason of the condition or quantity of its contents, or the use of the building or its contents, or the use of the enclosure or the overcrowding at any time of persons therein, or by reason of deficiencies in such fire alarm or fire prevention equipment, as may be required by the fire regulations of this code, or where conditions exist which would hamper or impede the fire department in combating a fire in or on the building, is hereby declared to be a nuisance and the division marshal in charge of the Bureau of Fire Prevention is empowered and directed to cause any such nuisance to be abated.

90-8. (a) Right to demand survey. The owner, lessee or occupant of any building, structure, enclosure, place or premises affected by any order or notice of the Bureau of Fire Prevention, may make written demand upon the division marshal in charge of the Bureau of Fire Prevention, for a survey of such building, structure, enclosure, place or premises, to determine whether or not such order is valid and reasonable, which demand for survey must be served upon the said division marshal by leaving a copy thereof at his office in the city hall, within seven days, Sunday and holidays excepted, after the service of the order or notice referred to in such demand. Said demand for a survey shall contain the name of the person to act as a surveyor on behalf of the one making the demand.

(b) Duty of division marshal. Upon receipt of a demand for survey, the said division marshal shall immediately issue an order for the same, naming therein the person to act as surveyor on behalf of the Bureau of Fire Prevention, who shall be an officer or employee of said bureau and said order shall also name the person theretofore selected by the one making the demand for the survey.

(c) Survey procedure. In the event that the two persons thus named are unable to agree concerning the survey and their report thereon, they shall select a third person to act with them on such survey, and a report signed by any two of the three surveyors thus selected shall be conclusive. In the event that the two surveyors selected as above set forth cannot agree concerning the survey and their report thereon and cannot agree upon the selection of a third person to act with them in connection with such survey, said third person shall be selected and appointed by the chief justice of the circuit court on application made in writing by the afore-

said division marshal, of which application the said fire marshal shall give at least twenty-four hours notice, in writing, to the applicant for such survey, and a report signed by any two of the three surveyors thus selected shall be conclusive. The date and hour when the survey shall be made shall be stated in the order therefor, and no change shall be made in such date and hour, except by written stipulation duly signed by said division marshal and the applicant for such survey. A copy of such order shall be served upon the person demanding the survey by personal delivery to him at least twenty-four hours previous to the hour fixed in the order for the holding of such survey, and he shall have the right to be present and to be heard at such survey in person or by agent or attorney. The surveyors shall meet at the time and place described in the order of their appointment, and shall survey the building, structure, enclosure, place or premises referred to in said order, and to consider the merits of the order of the bureau in respect to which the survey has been demanded.

(d) Report of survey. After such survey and consideration, the surveyors shall prepare and sign a report of their proceedings and determination which shall be filed in the Bureau of Fire Prevention, and a copy thereof shall be given the person demanding such survey upon his application therefor. The determination of the surveyors in any such case shall be final and conclusive.

(e) Surveyor's fees. Each person, other than an officer or employee of the Bureau of Fire Prevention, designated to act as a surveyor, pursuant to the provisions of this section, shall be paid the sum of twenty-five dollars for such survey in which he participates upon the filing of the report thereof in the bureau.

(f) Payment of expenses. As a condition precedent to the ordering of a survey, the person demanding the same shall deposit with the division marshal in charge of the Bureau of Fire Prevention the sum of one hundred dollars to indemnify the city for the expense of the survey, in the event that the surveyors confirm the order of the bureau. Such sum shall be returned to the depositor, in the event that the surveyors shall report such order as invalid or unreasonable. In case the report of the surveyors is to the effect that the order of the division marshal, which was the subject of such survey, was in all respects valid and reasonable, all the expenses of the survey shall be paid out of the fund herein required to be deposited with the division marshal by the person demanding such survey, and the balance remaining, if any, shall be returned to such person.

(g) Closing buildings. If the order or notice subject to survey requires any building or premises to be closed on account of its dangerous condition, such order or notice shall not be stayed pending the determination of the reasonableness and validity thereof.

Licenses

90-9. Every license required to engage in any business, occupy or use any premises, structure or building for any purpose classified as a hazardous use unit in Chapter 60 of this code and every extension or renewal thereof, shall require the approval of the division marshal in charge of the Bureau of Fire Prevention, as a condition precedent to the issuance of every such license and to every extension or renewal thereof. The division marshal in charge of the Bureau of Fire Prevention shall make, or cause to be made, an inspection of every hazardous use unit for which an application for license, or for an extension or renewal thereof, has been made. If such inspection shall prove the entire compliance of such hazardous use unit with the applicable requirements of this code, the division marshal in charge of the Bureau of Fire Prevention shall issue, or cause to be issued, a certificate of compliance and approval. Such certificate shall be subject to revocation for cause, by the division marshal in charge of the Bureau of Fire Prevention, at any time and upon notification of the revocation of such certificate, the mayor shall revoke any license conditioned upon said certificate. The provisions of this section shall be construed as remedial and retroactive as well as prospective.

90-10. The application for a hazardous material license shall be made in conformity with the general requirements of this code relating to applications for licenses, and in addition the applicant shall state the location of the place at which it is desired or intended to store or use the materials enumerated in Section 90-11 for use in the applicant's business, the maximum aggregate quantity to be so stored, for use, and shall give a description of the business engaged in the location and capacity of all containers or tanks used, and such other information as may be required by the division marshal in charge of the Bureau of Fire Prevention. The division marshal in charge of the Bureau of Fire Prevention, upon request from the Director of Revenue, shall investigate or cause to be investigated the place of business described in such application and the methods and equipment intended to be used by such applicant.

It shall be the duty of each applicant to notify, within seven days, the division marshal in charge of the Bureau of Fire Prevention when the license for the materials enumerated in Section 90-11 is no longer required. Notice shall include a verified statement that the licensee is no longer using the materials enumerated in Section 90-11 in sufficient quantities to require a license.

90-11. A hazardous materials license, as specified in Section 90-10, shall be required under any of the following conditions:

(a) where the combined capacity of all containers used to store or handle corrosive liquids exceeds 55 gallons.

(b) where the combined capacity of all tanks or containers used to store or handle oxidizing materials exceeds 500 pounds.

(c) where the combined capacity of all tanks or containers used to store or handle organic peroxides exceeds 10 pounds.

(d) where the combined capacity of all tanks or containers used to store or handle nitromethane exceeds 500 pounds.

(e) where the combined capacity of all tanks or containers used to store or handle ammonium nitrate exceeds 1,000 pounds.

(f) where any amounts of highly toxic materials are used, stored or handled other than in connection with retail trade in original, sealed containers.

(g) where any amounts of fume hazard gas is stored, used or handled.

(h) where the total amount of highly flammable materials, as defined in Section 92-39, stored exceeds 100 cubic feet.

90-12. The annual license fee for a license under Section 90-11 shall be twenty-five dollars. However, where any such person already is duly licensed under any other provision of this code which requires the division marshal in charge of fire pre-

vention to annually investigate or cause to be investigated the place of business described in such application, the annual license fee for a license under Section 90-11 shall be waived except that where the annual fee for such other license is less than twenty-five dollars, the annual fee for a license under Section 90-11 shall be the difference between such other license fee and twenty-five dollars. Every license issued under this section shall expire on August 31, following the date of issuance.
